Course type and methods
This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50% of the course is hands-on lab activities.

Student Profile
This training is targeted to system and application engineers, commissioning and maintenance personnel, service engineers and system integrators.

Prerequisites
Students should have basic knowledge of Windows 10, Windows 2016, and Office 2016. They should also have taken SPlus Engineering (US909 or S312), and the fundamentals of Process Control Systems (M111 or S311).

Course objectives
Upon completion of this course the participants will be able to:
• Explain the Symphony Plus architecture and the function of the different components
• Navigate within the Symphony Plus Operation Explorer
• Create/Manage and Deploy configuration databases

Main topics
• Symphony Plus Architecture
• Symphony Plus Operations Explorer
• SPlus Engineering Project and Tag database
• Historical Data Collection
• Trend Displays
• Alarms and Events
• Symphony Plus Graphic Displays
• Symphony Plus Graphic Elements
• User Security
• Backup and restore

Duration
The duration is 5 days

Learn the basic engineering and operational features of the Symphony Plus Human System Interface.
## Course Outline
