Transport

Integrated automation, electrical and power stations.

Same methane used in homes, natural gas from coal seams is the same.

BG Group is the parent of QGC. It is a leading player in the global energy market and a growing business.

25 countries over five continents.

With operations in more than 100 countries,

With a market and a growing business.

250 trillion cubic feet of gas reserves are estimated to lie beneath Queensland and New South Wales - enough to power a city of Glasgow.

The project, which started construction in 2009, is expected during the project lifetime.

>8000 wells

2010, started producing LNG in 2013 and continues development today.
