

Emax2 – The first circuit breaker that saves energy

Turning a protection device into a smart energy saver

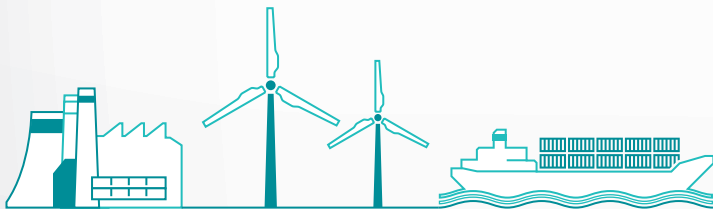

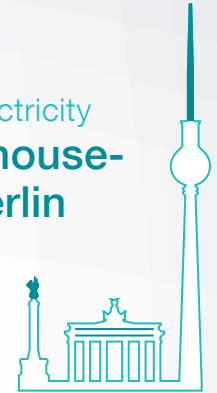

World's first smart circuit breaker uses complex algorithms and power electronics

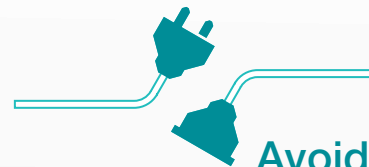

Energy savings would power an electric car to the Sun and back **more than 11 times...**

...or provide electricity to the **entire household's of Berlin**

Protects and controls equipment in industrial and commercial buildings, data centers or ships

Avoids blackouts at peak consumption

Payback **in less than a year** through energy savings

Power and productivity
for a better world™
