

Tru-Break™ switchgear module — three-phase and single-phase

elastimold™

Safe

- Easy-to-see viewing windows
- Dead-front construction
- Clear visual verification of circuit isolation

Reliable

- Proprietary ethylene propylene diene monomer (EPDM) rubber formulation
- Maintenance-free operation*
- Withstands harsh conditions

Flexible

- Rated for use with 15–29.3 kV, 800 A, 20 kA systems
- Completely modular
- Retrofit options available on existing switchgear**

Available for pad-mounted or submersible applications

Because there's no room for doubt when it comes to safety.

*Tru-Break switchgear module is considered maintenance-free because it contains no oil or gas to monitor or maintain.

**Ask your ABB Representative for compatible configurations.
