

LOYALTY OFFER | ENERGY INDUSTRIES CANADA

# ABB Care Contract Loyalty Offer

## 800xA Smart Client – A thin visualization client

With 800xA Smart Client, even employees who do not have direct access to System 800xA can easily and quickly retrieve more critical information via their office computer.

Smart Client effortlessly harvests real-time data from both System 800xA and integrated systems, and then creates the analyses and reports directly in the platform to suit your needs. You therefore can **spend more time analyzing and understanding the key data**, instead of collecting it. And then turn that data into improvements – resulting in even higher productivity and energy efficiency.

Smart Client utilizes the extended automation capabilities of the System 800xA technology to provide intelligent data access and viewing functions to assist all levels of personnel in making quick, informed decisions, taking the appropriate action, and thereby improving performance. Displays are available inside or outside of the plant facility.

Using Smart Client graphics, to visualize the process. The exact screens you want can be easily built up, without any need for programming. With System 800xA Property Browser and Smart Client Graphics Palette, you can easily decide which information to retrieve and display, using "drag and drop" functions.

Smart Client lets you:

- Transform your computer into production information and tracking portal
- Create personal, meaningful, real-time reports in Excel environment
- Analyze both real-time and historical data, with just a few clicks
