

ABB panel meter portfolio

India & Global

Accurate electrical measuring and
power monitoring

- Complete portfolio
- Simple and compact design
- Digital turnkey solution for monitoring, optimization and control
- Improve reactivity and reduce uncoordinated maintenance

ABB's energy efficiency product portfolio is the new, complete assortment of product range comprising of single function, multifunction, dual source, power metering and fully connected, state-of-the-art range of network analyzers, guaranteeing basic to complete power quality analysis and accurate energy efficiency monitoring of all the energy assets: industrial and commercial buildings, facilities, data centers.

ABB Energy Efficiency Portfolio

Metering solutions from basic to advanced

Single function and multi function Metering solutions

ABB digital VAF Meters, KWh meters, Ammeters and Voltmeters are optimal to replace analogue devices. With these models all entry-level measuring requirements are covered.

Basic Metering solutions

On top of the simplest measurements, ABB basic multi-function meters also monitor Energy and Power. They are available with option for Modbus communication.

Measurement made simple

Value proposition

Simple to use

- Intuitive visualization of the 3 phase parameters on the bright LED display
- Enhanced clarity in data reading and device configuration

Easy choice

- Only 6 product codes to cover the main measurement requirements
- Maximum 2 steps to select the correct product for your application

Easy to install and stock

- Compact product design and optimized volumetric weight of packaging
- No tools required for product mounting thanks to mounting clips

System integration

- Remote monitoring in any Modbus RTU supervision system thanks to the optional RS485 port for M1M 12
- Quick system integration thanks to basic communication protocol map

M1M DS

Your benefits

For distributors

- Save space needed for internal stock
- Fast selection of the correct product for your orders
- Handle a minimum set of order codes

For panel builders

- Reduce the time needed for meter installation on the panel
- Fast selection of the correct product for your application
- Increase the number of projects covered with the same product

M1 Single Function Measurement Devices

Features : M1A, M1V and M1M 11

1

Intuitive visualization

Clear and simple reading of the measurement data for all 3 phases on the wide LED displays.

2

Compact design

Only 52mm inside the switchboard to ensure optimized logistics and reduced footprint in the panel

3

Electrical system monitoring

Complete electrical parameters measurement, from simple VAF (voltage, current, frequency) to power and energy monitoring

M1 Multi Function and Dual Source Measurement Devices

Features : M1M 10, M1M 12 and M1M DS

4

Easy to use

Simple front keypad to navigate in setup and menus.

5

Remote measurement

Availability of RS485 interface with the support of communication protocol Modbus RTU facilitating the communication and connection of the device with remote locations.

M1 Single Function Measurement Devices

M1A, M1V and M1M 11

Ordering codes

M1A

M1A

M1A is a digital ammeter for current measurement, providing the measurement of the single-phase or three-phase electrical parameters and allowing easy replacement of different analogue meters.

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
-	-	M1A 1-1 Ammeter 1Ph (CI 1.0)	1SYG235145R4051	0.19	1
-	-	M1A 3-1 Ammeter 3Ph (CI 1.0)	1SYG235135R4051	0.19	1
-	-	M1A 3-05 Ammeter 3Ph (CI 0.5)	1SYG234905R4051	0.19	1

M1A

M1V

M1V is a digital voltmeter for voltage (and Frequency) measurement, providing the measurement of the single-phase or three-phase Voltage as well as Frequency (for 3Ph Voltmeter) and allowing easy replacement of different analogue meters.

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
-	-	M1V 1-1 Volt Meter 1Ph	1SYG233965R4051	0.19	1
-	-	M1V 3-1 Volt Meter 3Ph	1SYG233955R4051	0.19	1
-	-	M1V 3-05 Volt Meter 3Ph	1SYG233695R4051	0.19	1

M1M 11

M1M11 is a digital kWh meter for energy measurement, providing the measurement of the single-phase or three-phase energy consumption.

M1M 11

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
Modbus RTU RS485	-	M1M 11-1 Modbus kWh meter 1%	1SYG233685R4051	0.22	1
Modbus RTU RS485	-	M1M 11-05 Modbus kWh meter 0.5%	1SYG232395R4051	0.22	1

M1 Multi Function Measurement Devices

M1M 10, M1M 12 and M1M DS

Ordering codes

M1M 10

M1M 10

M1M 10 is a VAF meter for basic electrical system monitoring, providing the measurement of the main single-phase and three-phase electrical parameters and allowing easy replacement of different analogue meters.

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
-	350811	M1M 10	1SYG235081R4051	0.3	1

M1M 12

M1M 12

M1M 12 is a multi-function meter, providing what is needed to monitor the electrical system and allowing statistical metering of active energy consumption.

M1M 12 product range includes option with built-in communication protocol (Modbus RTU) through RS485 communication port, allowing easy integration with Modbus supervision systems.

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
-	075912	M1M 12	1SYG207591R4051	0.3	1
Modbus RTU RS485	075813	M1M 12 Modbus	1SYG207581R4051	0.3	1

M1M DS

M1M DS

M1M DS is a digital dual source meter along with power parameters for two source measurement for example EB/DG.

Communication protocol and interface	Bbn EAN 8012542	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.
-	-	M1M DS Dual source meter	1SYG232385R4051	0.21	1
Modbus RTU RS485	-	M1M DS Modbus Dual source meter	1SYG232375R4051	0.21	1

M1M Power Meters

Introducing the new ABB power meters ranges M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30 an easy solution for any standard application in buildings and industry.

M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30 are the new ABB ranges of power meters, offering exactly what is needed to monitor the electrical system and analyze the power quality in a single device.

The new M1M power meters offer allows to easily and cost-effectively cover the main submetering and power quality monitoring requirements in commercial and industrial buildings, either small or mid/large-sized, e.g. inside power factor correction boards, motor control center or sub-distribution switchboards.

ABB's complete multifunction meters product line, now including. M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30 ranges, are capable to cover all needs, from basic electrical parameters measurement to advanced power quality analysis.

ABB's power meters are simple to use, with a common and intuitive user experience from installation to operations, allowing to fully exploit the reliable, IEC-compliant measurements.

Thanks to their connectivity capabilities, M1M can get leverage on the integration in ABB scalable energy and asset management solutions to monitor, optimize and control the complete electrical system, such as System pro M compact® InSite and ABB Ability™ Energy and Asset Manager cloud-computing platform.

Measurement made simple

The complete M1M range, offering all the measurement features required for basic power quality monitoring and submetering in a single power meter; making measurement simple.

—
Complete offer

ABB meters to cover all needs

Select in maximum 2 steps the right and most competitive power meter to cover all basic electrical system measurement needs. Thanks to integrated functionalities and communication protocols, the same product version fits an increased number of projects and wide applications range.

—
Easy to use

Common user experience

Common and intuitive menu structure all over the different ranges on clear and large backlit LCD/LED displays, helping to reduce the time needed to operate the power meters. Feedback on correct operations and quick reactivity on the system events are ensured by alarms icons and frontal LEDs on all product versions.

—
Easy to install

Optimized installation process

Compact power meters, ensuring a very limited footprint inside the panel, provide a common, vertical disposition of the terminals for easy wiring of cables directly from the sides. No special tool is required for product mounting thanks to mounting clips.

—
Energy Efficiency

Reliable and accurate measurement

Complete set of measurement functionalities, from multi-function meters to intermediate power meters, compliant with accuracy standard IEC 61557-12 to allow improving energy efficiency of the electrical system. Remote communication on main communication protocol, Modbus RTU and Modbus TCP/IP.

Your benefits

For distributors

- Reduce selection time of the correct product thanks to reduced range complexity
- Manage a limited number of order codes from a single supplier
- Save space needed for internal stock
- Have the product on stock when needed and reduce delivery time

For panel builders

- 1 supplier only for all measurement products covering wide range of projects
- Increase competitiveness in projects
- Reduce time needed for product selection thanks to simple range composition
- Reduce time for installation and operations
- Minimum space requirements in the panel

M1M Power Meters - features

M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30

1

Bright display

Simple reading of the measurement data for all 3 phases on the wide LED display.

2

Easy navigation

LEDs on the sides to help during the navigation in the menu pages.

3

Common experience

Same intuitive menu structure all over the different M1M meters, with 4 pushbuttons keyboard for simplified access to the device.

4

Electrical system monitoring

Reliable electrical parameters measurement for basic applications compliant with IEC 61557-12, including voltage, current, frequency, power, energy.

5

Comfortable wiring

Vertical disposition of the removable terminals all over M1M range makes the cabling inside the switchboard easy to be completed.

6 Intuitive visualization
Clear visualization of the measurements with self-guided menus on the bright backlit LCD displays.

7 Compact design
Only 65mm inside the switchboard to ensure optimized logistics and reduced footprint in the panel.

8 Manual-less configuration
Guided wizard for first commissioning helping to save time for the basic configuration.

9 Power quality measurement
Complete set of power quality features according to IEC 61557-12, including main KPIs and datalogger functionality on flash memory.

10 Remote measurement
Availability of Modbus RTU and Modbus TCP/IP communication protocols and I/O options for easy integration in any system.

M4M Network Analyzers

Discover the benefits

M4M as a stand-alone network analyzer guarantees all power monitoring needs in the energy distribution system: from high-accuracy energy efficiency monitoring of electrical parameters to complete power quality analysis. Thanks to its connectivity capabilities, M4M can get leverage on the integration in ABB scalable energy and asset management solutions. Thanks to MID certification, M4M allows now to fulfill all legal requirements for accounting and energy acquisition.

—
-50% Time for integration
in the ABB turnkey solution

Full connectivity

Natively integrated in sub-distribution management System pro M compact® InSite and ABB Ability™ Energy and Asset Manager cloud-solution, M4M benefits from the scalability of the ABB digital solutions: from stand-alone visualization and commissioning to monitoring, optimization and control of the complete electrical system.

—
Reliable and accurate power
monitoring

Energy Efficiency

ABB's M4M range of network analyzers gathers data from the electrical system and provides a complete power quality analysis and high accuracy energy monitoring. MID certification available to ensure certified and tamper-proof measurement for billing applications and fulfilment of legal requirements for accounting and energy acquisition.

—
-40% Time for installation
and commissioning

Simple and Intuitive

M4M makes configuration and operations simple and fast, from easy installation and wiring thanks to compact dimensions, all-removable terminals and Rogowski coils, to intuitive use and data access thanks to touchscreen color display, mobile APP and desktop software.

—
Improve reactivity and reduce
uncoordinated maintenance

Realtime supervision

M4M network analyzers make information easy to access from any area of the system, providing a comprehensive range of accurate data and notifications that enhance reactivity to the events on the electrical system and allowing to avoid overloads, outages and uncoordinated maintenance.

Explore the M4M ranges

M4M network analyzers are available in different versions which ensure all power monitoring needs, from basic to more complete power quality analysis.

EQUIPPED WITH GRAPHIC COLOR DISPLAY AND 5 PUSHBUTTONS KEYBOARD, M4M 20 RANGE ALLOWS COMPLETE MONITORING AND BASIC POWER QUALITY ANALYSIS.

EQUIPPED WITH TOUCHSCREEN COLOR DISPLAY, M4M 30 RANGE ALLOWS COMPLETE POWER QUALITY ANALYSIS AND ENERGY EFFICIENCY EVALUATIONS.

M4M 2X ON DIN-RAIL WITHOUT DISPLAY, ENSURING HIGH FLEXIBILITY TO PROJECT SPECIFICATIONS COMPARED TO STANDARD NETWORK ANALYZERS.

MID-certification

Availability of MID approval to ensure certified and tamper-proof measurement for billing applications.

Graphic color display

M4M 20 and M4M 30 are equipped with a graphic color display and common app-based menu for an intuitive visualization.

Bluetooth-enabled

All M4M network analyzers are equipped with Bluetooth module for smart commissioning via mobile app.

Full communication

A complete set of embedded communication protocols, including Modbus RTU, Modbus TCP/IP, Profibus DP-V0 and BACnet/IP

Input/Output

Control on the system thanks to I/O options including digital outputs, programmable I/O or programmable analogue outputs.

Datalogger

Data logging features are available, from complete notification logs to flash memory and RTC for 1-year data logging of trends.

Rogowski version

M4M Rogowski versions are compatible with ABB's R4M Rogowski coils for easy retrofit in existing installations.

Access to M4M network analyzers

M4M network analyzers offer the strongest scalability to access the measurement data, from color graphic display to smartphone app and desktop software, up to webserver and cloud-platform when integrated in the ABB digital solutions.

M4M Network analyzers

Accurate electrical measuring and power monitoring.

Simple in every aspect, M4M enables accurate energy efficiency evaluations and perfectly fits the ABB solution for monitoring, optimization and control of electrical system.

Accurate measurement
Class 0,5 measurement according to IEC 61557-12 and advanced power quality functionalities, including historical measurements.

Option for MID Approval
Class C accuracy in accordance with 2014/32/EU for billing applications

Clear visualization
Color display and App-structured menu for advanced graphic visualization.

Smart commissioning
Bluetooth module for easy configuration through EPiC Mobile App unique commissioning tool.

Intuitive access
Simplified access to the device via touch screen display or 5 pushbuttons keypad.

Easy to install
Fast one-hand mounting and comfortable installation with clips in only 57 mm depth inside the panel.

Fast wiring
All-removable terminals and one tool process to speed up the wiring activities.

Full communication
ABB Ability™ native network analyzers with complete communication protocols and I/O options for integration in any system.

Intuitive interface

Touchscreen display and easy-to-access App-structured menu make network analyzers' configuration and operation simple and quick. Graphic color display for advanced visualization of the Class 0,5S accurate parameters, interactive pop-ups and complete notifications. Quick navigation is ensured by Homepage and favorite page setting.

Full integration

Natively integrated in sub-distribution management System pro M compact InSite and ABB Ability™ Energy and Asset Manager cloud-solution. To allow monitoring, optimization and control of the complete electrical system. Wide integration in all main applications through embedded communication protocols (Modbus RTU, Modbus TCP/IP, BACnet/IP, Profibus DP V0).

Smart commissioning

All M4M network analyzers are equipped with Bluetooth BLE module, ensuring smart configuration and quick visualization via unique EPiC commissioning tool, both available as mobile App and desktop software. Availability of remote firmware update regularly at any time guarantees the latest and the most secure version of the device with no impact on operations.

Installation in any panel

Comfortable installation and secure fix on the panel is ensured by the easy-to-use clips, with different thickness setup for compatibility with any panel. One-hand mounting of the device thanks to the hooks on the housing. The reduced depth of only 57 mm inside the panel makes M4M suitable even in small-size switchboards.

Fast installation and wiring

All terminals on M4M are removable, including the current transformers (CTs) inputs for current measurement, allowing to carry out the wiring directly on the terminals and speeding up the process. Moreover, the vertical disposition of the terminals makes the cabling inside the switchboard more comfortable.

Rogowski coils compatibility

Specific M4M versions compatible with ABB's R4M Rogowski coils allow to retrofit in existing installations, integrating power quality metering with 0 downtime. The pre-wired terminals of R4M coils allow to save up to 70% time for current transformers cabling compared to standard CTs.

Beyond connected

Scalable and connected solutions

—
01
Connected sub
distribution board
installed in an office

Digitalization is changing the world of energy distribution making it safer, smarter and more sustainable.

Thanks to its flexibility, also existing installations can be easily revamped within a day and without replacing any existing components, reducing installation and configuration time nearly to zero, and in turn, minimizing operational downtime costs.

—
02
Sub distribution
solutions architecture
scheme

A fundamental aspect of this is that technology is making it easier to collect useful data and to use it for analysis.

Connectivity based solutions increase awareness of resources and process behaviors: asset management can then be optimized through the control and monitoring of operations and costs.

Once the system is installed and connected, the data collected on the intuitive web user interface can be used for a variety of needs, from reducing energy consumption to identifying potential risks for operational continuity.

It fosters a more conscious utilization of resources that improves energy efficiency and aligns with challenging sustainability targets.

Receiving customized alerts and configuring automatic actions are just some of the functionalities to optimize the management of energy and assets. Constant diagnostics and real time notifications ensure total transparency over how the electrical system is performing.

ABB's solutions for sub distribution protect, monitor, measure and eventually make your installation smart and fully connected.

Compliance with highest energy efficiency standards and complete control over the total facility consumptions to save up to 20% of energy and reduce CO2 emissions by 15%. All that is guaranteed with ABB's safe, smart and sustainable solutions for sub distribution that go beyond connectivity.

With our scalable solutions any size of public, commercial or industrial building can easily be connected to the cloud or data can be accessed via the web server.

01

02

Beyond connected, no matter the project stage

Whether you're retrofitting an old building, adding a new installation or any stage in between – we offer flexible and scalable solutions to save time in all stages of the design process.

Meet your needs for improving energy impact, reducing supervision costs and adding value to the structure.

Using safe, smart and sustainable solutions for sub distribution that go beyond connectivity.

- **Scalable, fully connected solutions** that can be implemented across all project stages
- **Increased efficiency** of electrical systems and compliance to highest energy efficiency standards to save up to 20% of energy and to cut CO2 emissions by 15%
- **Replicable and easy configuration** to save time comparing product features and select the right solution
- **Updated and secured system** thanks to FW update to ensure data security guaranteed by encrypted SNMP V3 and SSL certificate
