Measurement made easy
Engineered solutions for all applications

Digital LCD
• provides reliable and clear indications

Flexible configuration facilities
• provided locally via local LCD keypad, with 1 or 2 lines numeric indication and “Easy setup” menu

Signal characterization
• improves local indication by selectable transfer function

Rugged, compact, lightweight, enclosure to IP67 and Nema 4x
• enables installation in industrial environments

High reliability
• redundant acquisition system ensures enhanced dependability

Comprehensive certification approvals
• give extended applicability in plant hazardous areas

Compatible with all 4 to 20 mA, 2-wire systems

Product in compliance with Directive 2011/65/UE (RoHS II)
Field indication as you need

Model JDF field indicator provides simple and low cost remote indication of a process variable on an easy to read meter, ensuring the most useful display for any specific application.

A reliable measurement is implemented by a redundant acquisition chain and by a diagnostic process that guarantee always the correct output value.

In addition to parallel wiring to the transmitter, JDF200 allows series mode wiring, acting as junction box facility.

JDF200 features a programmable signal display, providing alphanumeric plus bargraph indications:

- Two 5-digit numeric indication
- One graphic bargraph indication
- One 8-digit alphanumeric TAG indication
- A membrane keypad with 4 tactile feedback keys

The functionality as METER is achieved by the graphic bargraph which gives an analog 0-100% indication and by the 5-digit display which gives a digital indication selectable from the following options:

- 4 to 20 mA
- 0 to 100%
- Engineering unit

Specification – Functional

Input range
4 to 20 mA nominal

Operating range
3.2 to 23 mA (current less than 3.2 mA will blank the display)

Maximum overload
400 mA up to 30 minutes

Maximum voltage drop
2.4 V DC @ full scale range
(5.6 V DC in case of hardware failure)

Update time
0.5 sec.

Transfer functions (input to indication)
User-selectable for indication as linear or square root, power of \( \frac{3}{2} \) or \( \frac{5}{2} \), horizontal or spherical tank.

Predefined 22 points linearization table available on request.

Specification – Operative limits

Temperature limits °C (°F)

Ambient
The operating temperature is: -20 to 70 °C (–4 to 158 °F).

Loop integrity is granted without damage to the field indicator in the range -40 to 85 °C (–40 to 185 °F), with display not clearly readable or blank.

IMPORTANT
For Hazardous Atmosphere applications see the temperature range specified on the certificate/approval relevant to the aimed type of protection.

Storage
- -40 to 85 °C (–40 to 185 °F)
...Specification – Operative limits

Environmental limits
Electromagnetic compatibility (EMC)
Comply with EN 61326-1.
Surge immunity level: 2 kV
(according to IEC 61000-4-5 EN 61000-4-5)

Humidity
Relative humidity: up to 100 %
Condensing, icing: admissible

Vibration resistance
Accelerations up to 2 g at frequency up to 1000 Hz
(according to IEC 60068–2–6)

Shock resistance
Acceleration: 50 g
Duration: 11 ms
(according to IEC 60068–2–27)

Wet and dust-laden atmospheres
The transmitter is dust and sand tight and protected
against immersion effects as defined by IEC 60529 (2001)
to IP 67 (IP 68 on request) or by NEMA Type 4X.

Hazardous atmospheres
Type of protection "Intrinsic safety":

REFER TO CERTIFICATES OR OPERATING INSTRUCTIONS FOR AMBIENT TEMPERATURE RANGES (WITHIN THE LIMITS OF -50 TO 85°C) RELATED TO THE DIFFERENT TEMPERATURE CLASSES
### Specification – electrical characteristics and options

**Optional indicator**
Integral display with integral keypad (code L1)
- Wide screen LCD, 128 x 64 pixel, 52.5 x 27.2 mm (2.06 x 1.07 in.) dot matrix.
- Multilanguage.
- Four keys for configuration and management of device.
- Easy setup for quick commissioning.
- User selectable application-specific visualizations.
- The indicator is user orientable, selecting one of 4 possible positions at 90°.

**Indications**
The LCD display provides the following visualizations:
- 8-digit alphanumeric for tag, in the top line (left corner)
- one line of 6-digit with height of 8 mm. or two lines of 8-digit with height of 5 mm., including decimal point, for numeric indication of variables, selectable between current or other 2 process values, plus relevant engineering units
- a bargraph of 30 mm. for indication of the input current signal in percentage with 0 to 100%. Environment

### Specification – Performance specifications

Stated at reference condition to IEC 60770 ambient temperature of 20 °C (68 °F), relative humidity of 65 %, atmospheric pressure of 1013 hPa (1013 mbar).

**Indication accuracy**
- digital: ±0.10 % of span (16 mA) ± 1 digit.
- bargraph: ±1 %

**Resolution**
16-bit conversion.

**Ambient temperature effect**
±0.15 % of span (16 mA), for a temperature variation from 20 °C (68 °F) to the operating temperature limits of –20 or 70 °C (–4 or 158 °F)

**Electromagnetic field**
Meets all the requirements of EN 61326-1.

### Specification – Physical

**Materials**
Electronic housing and covers
- Aluminium alloy (copper content ≤ 0.3 %) with baked epoxy finish (colour RAL9002); AISI 316 L ss.

**Covers O-ring**
Buna N.

**Kit for pipe mounting**
AISI 316 L ss V-bolt with nuts and washers allowing installation on vertical and horizontal 60 mm. (2in) pipe. The field indicator housing provides 4 holes in the casting allowing wall mounting by 6 mm. dia. screws (not supplied).

**Plates**
Identification and certification plates: self-adhesive attached to the electronics housing or AISI 316 ss fastened to the electronics housing with rivets or screws.
- Optional wired-on customer data plate: AISI 316 ss.
- Laser printing on metal or thermal printing on self-adhesive.
  - For AISI 316 L ss housing it is mandatory to select option I2 or I3 for plates in AISI 316 ss.

**Display (code Lx)**
- 4-position (at 90°) user orientable.

**Optional extras**
**Metal plates (code Ix)**
- Code I2: AISI 316 ss identification plate with laser printed tag (up to 31 characters) and scale details (up to 31 characters: lower and upper scale values and engineering unit) screwed to housing. AISI 316 ss certification plate fixed to housing by rivets.
- Code I1: AISI 316 ss wired-on plate with laser printed customized data (4 lines of 32 characters with 4 mm/0.16 in. height).
  - Code I3 = I1 + I2.

**Design and calibration certificates (codes Cx)**

**Tag and manual language (codes Tx and Mx)**

**Electrical connection plug (code Z1)**
One certified stainless steel plug to match electrical connection thread
...Specification – Physical

**Electrical connections**
Two 1/2 in. – 14 NPT or M20x1.5 threaded conduit entries, direct on housing.

**Terminal block**
Three terminals for signal wiring up to 2.5 mm² (14 AWG), also with connection points for test and communication purposes.

**Grounding**
Internal and external 6 mm² (10 AWG) ground termination points are provided.

**Mounting position**
Indicator can be mounted in any position.

**Mass (without options)**
0.9 kg approx (2 lb); add 0.1 kg (0.2 lb) for mounting kit; add 1.05 kg (2.3 lb) for AISI housing.

**Packing**
Carton 27 x 24 x 20 cm approx (11 x 10 x 8 in.).
Mounting dimensions
(not for construction unless certified) – dimensions in mm (inch)
…Dimensions

Wiring as remote indicator

NOTE – This wiring as remote indicator is not applicable for 266 pressure transmitter with surge protection option code S2
NOTE – JDF200 to be used as indicator with all devices ensuring minimum voltage drop on the “ext. meter” terminal

Wiring as junction box

#### Temperature Limit (mandatory for US Certifications)
- Installation to be performed down to -40 °C (-40 °F) ambient temperature: 
  - NB
- Installation to be performed in an extended range down to -50°C (-58 °F) ambient temperature: 
  - NC

#### Certificates (multiple selection allowed)
- Inspection certificate EN 10204–3.1 of calibration (9-point): 
  - C1
- Certificate of compliance with the order EN 10204–2.1 of instrument design: 
  - C6

#### Electrical connection plug
- One certified stainless steel plug (supplied loose): 
  - Z1

---

For applications performed at ambient temperature range down to -50°C (option “NC”) it is mandatory to permanently protect window cover from accidental impact before installing (see specific details in the instruction manual OI/JDF200)

---

### Standard delivery items (can be differently specified by additional ordering code)

- Self-adhesive plastic labels in English
- General purpose (no hazardous area certification)
- Kit for pipe mounting
- Operating instruction manual and labels in english (self-adhesive)
- No inspection certificate
- No electrical connection plug
