THQMV225D	THQMV225E

Transition benefits

As part of this LCM process, based on design changes and in anticipation for the new PowerMark PRO Plug-on Neutral load center launch, ABB is changing the main breaker field installable kit design and catalog number. The form, fit, and function will remain the same. Starting January 18, 2022, no new orders for this product will be accepted unless product has stock remaining. On June 30, 2022, this product will be obsolete and will not be orderable.

The “E” version is compatible with both the PowerMark GOLD load centers *and* the new PowerMark PRO load centers (when available). Customers with inventory of the “D” version can continue to install them in the current PowerMark GOLD 150A, 200A, and 225A Main Lug Convertible Load Centers. Note: the “D” version is not compatible with PowerMark PRO load centers.

LCM phase	Active	Classic	Last time to buy	Limited	Obsolete
Effective date		---	---	Jan. 18, 2022	Jun. 30, 2022
