Current life cycle status
The mentioned product sub-types of ACS1000 drive are in the Classic phase since 1.7.2017 according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep the mentioned product sub-type in Classic phase at least until the end of 2020, after which it will be transferred to Limited phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions
In Classic phase complete life cycle services are available for the mentioned product sub-type. Besides the regular maintenance actions it is highly recommended to apply Life cycle Upgrade services (refer to ACS1000 Upgrade service product description). Through ACS1000 Life cycle Upgrade (Aux Power Concept Upgrade, Main Board Upgrade) full range of life cycle services and support is extended at least up to 2027.

Further information
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

Product availability
These product sub-types are not available for sale. It represents a modernization of existing installed base by applying Life cycle Upgrade service.
