Workshop repair service
The highest quality repair for your solar inverter module

ABB’s dust-free solar inverter module service workshops offer the perfect environment to fully repair your solar inverter module. From spares replacements to software upgrades, all work is full-load tested, backed by a one-year warranty.

Genuine spare parts
Using genuine parts ensures your solar inverter module operates as designed. The solar inverter module or module is repaired according to the original specification.

Cleaning and load testing
Before repair, the solar inverter modules are thoroughly cleaned, and after repair, tested with a full-load motor.

One-year warranty
ABB provides a one-year warranty for the replaced components.

Global network
A global network of ABB authorized solar inverter module service workshops offer a consistent approach to the high-quality repair process.

Is my solar inverter suitable?
We offer Workshop Repair service for all inverter modules that are in active or classic phase of their life cycle. Check the life cycle phase of your solar inverter and service availability with your ABB contact.
