ABB high-voltage cable system brings renewable energy to more than a million people.

Walney Extension Wind Farm will be one of the biggest in the world.

Both Walney Extension (generating 660 MW) and the existing wind farm (generating 367 MW) will together be capable of providing over 800,000 households with green energy.

Equivalent to the population of Northern Ireland.

Approximately the same distance as traveling 1.5 times along Hadrian's Wall, built by the Romans across Northern England.

Over 180 km of high-voltage cable under sea and ground.
