**Small, Powerful and Fast**

Compact, powerful the IRB 140 industrial robot. Six axis multipurpose robot comprising the IRB 140 manipulator and IRC 5 industrial robot controller. Handles payload of 5kg, (11 lbs.) with long reach (810 mm/31.8 in.) of axis 5, optional floor, wall and suspended mounting. Available as Standard, Foundry, Clean Room and Wash versions, all mechanical arms completely IP67 protected, making IRB 140 easy to integrate in and suitable for a variety of applications. Uniquely extended radius of working area due to bend-back mechanism of upper arm, axis 1 rotation of 360 degrees and flexible mounting capabilities.

The compact, robust design with integrated cabling adds to overall flexibility. The Collision Detection option with full path retraction makes the robot reliable and safe.

Using the IRB 140T, cycle-times are considerably reduced where axis 1 and 2 predominantly are used. Reductions between 15-20 % are possible using pure axis 1 and 2 movements.

This faster versions is well suited for packing applications and guided operations together with PickMaster.

IRB Foundry Plus and Wash versions are suitable for operating in extreme foundry environments and other harsh environments with demanding requirements on corrosion resistance and tightness. In addition to the IP67 protection, excellent surface treatment makes the robot high pressure steam washable. The white-finish Clean Room version meets Clean Room class 10 regulations, making it especially suited for environments with stringent cleanliness standards.

The IRC 5 controller has the electronics for controlling the robot manipulator, external axes and peripheral equipment. The IRC 5 also contains system software with all basic functions for operating and programming, including two built-in Ethernet channels with 100 Mbit/s capacity. This ensures a significant increase in computing power as well as improved controller monitoring and supervision.
## TECHNICAL DATA, IRB 140 INDUSTRIAL ROBOT

### SPECIFICATION

<table>
<thead>

Supplementary load (on upper arm alt. wrist)
- on upper arm: 1 kg
- on wrist: 0.5 kg

Number of axes
- Robot manipulator: 6
- External devices: 6

Integrated signal supply: 12 signals on upper arm
Integrated air supply: Max. 8 bar on upper arm

### PERFORMANCE

- Position repeatability: 0.03 mm (average result from ISO test)
- Maximum TCP velocity: 2.5 m/s
- Maximum TCP acceleration: 20 m/s²
- Acceleration time 0-1 m/s: 0.15 sec

### VELOCITY

</tbody>
</table>

### ELECTRICAL CONNECTIONS

- Supply voltage: 200–600 V, 50/60 Hz
- Rated power: 4.5 kW
- Transformer rating: 4.5 kVA
- High pressure steam washable

### PHYSICAL

- Robot mounting: Any angle
- Dimensions: Robot base 400 x 450 mm
- Robot controller H x W x D 950 x 800 x 620 mm

### ENVIRONMENT

- Ambient temperature: Robot manipulator 5 – 45°C (41 - 113°F)
- Robot controller 5 – 52°C (41 - 125°F)
- Relative humidity: Max. 95%
- Degree of protection: Manipulator IP67

### OTHER

- Data and dimensions may be changed without notice.
