

Course duration

The duration is 2 full days, on November 18th and 19th (first session) and December 2nd and 3rd (second session); timing is from 09:00 till 17.30.

Location

Garbagnate Monastero, training room.

Course objective

After this training, you will know what are the technical data required to properly specify and select a main distribution board (System pro E Power, ArTu K) and an automation board (IS2, AM2, C2).

You will know how to read the Technical Catalogues and find the ordering codes and the information to properly choose what you need for the required application.

The basic training includes Standards details, technical and applications information, hands-on sessions, some marketing details and use of the software for the switchboard configuration; the approach is technical, but commercial topics will be discussed as well.

Student profile

The training is intended for people in the LPBS Sales and Marketing organization, who need to be aware about all the products of the PG Power Enclosures and Automation Boards.

Maximum number of participants

The maximum number of participants is 12 people for each session.

Prerequisite

Before participating the training, completion of the on-line events below is requested:

- F632e - Classification of Enclosures (*e-learning*)
- F633e - Typical tests for Enclosures (*e-learning*)
- F634e - Available Marketing tools for Enclosures (*e-learning*)
- F688w - Basics and definitions of enclosures (*webinar*)
