TOV capability

\[ U_c (\text{MAX}) = 0.8 \times U_r \]

Without prior energy

With prior energy = 7 kJ/kV (\(U_r\))
Protective characteristics

Max residual voltage in percent of residual voltage at 10 kA 8/20 impulse

- Lightning (8/20 micros. current wave)
- Switch (30/60 micros. current wave)
- Steep (1/2 micros. current wave)
