

Did you know we deliver over 3 million gallons of water to music lovers?

Glastonbury Festival is one of the world's largest and most popular open-air festivals for music and the performing arts. The five-day festival covers 900-acres and attracts a sellout attendance of 177,000 people each day.

The event uses over three million gallons of water for drinking, washing and showers. The event organizers turned to ABB Measurement & Analytics to ensure water usage is accurately measured using electromagnetic flowmeters and recorders.
