## String combiners

Plug&play solutions  
for photovoltaic systems

A wide range of finished, wired and certified products, ready to be installed and able to address residential, commercial and utility scale installations. Maximum protection against faults and lightnings, multi-output versions and monitoring solutions to manage any system up to 1000 and 1500V DC. Resistant to extreme outdoor conditions and dusty environments but light in weight because manufactured in thermoplastic material through a patented co-injection technique. If you need a global leader at your service, get in touch with us.
