

ABB Special Report Automation systems

Automation systems

- 5**
ABB Industrial^{IT}
Building the bridge between traditional control and IT

Operational profitability

- 9**
Mastering the assets
ABB's Asset Master software helps curb equipment failure

- 13**
Remote services
Revolutionizing support and service

- 17**
Winning the battle with downtime
Streamlining maintenance with risk-based inspection

- 21**
Drive monitor
The software with a finger on the system's pulse

- 25**
Control loops – pleasure or plague?
Keeping control systems under control

- 30**
Not on my watch
Power management system prevents costly shutdowns

- 35**
Experience counts
A papermaker who knows he can rely on ABB

- 38**
Finding the right balance
Electrification solution for the pulp and paper industry

- 41**
Peace of mind
Increased productivity in cement with ABB's System 800xA

Capital productivity

- 44**
Age is no issue
Evolution of automation systems upholds productivity of older plants

- 48**
Integrated engineering
Revolutionizing design and documentation in engineering

- 53**
Integrated electrical and automation systems
A key to reduced capital and operational costs

- 57**
Powerful renovation
Rejuvenating a coal-fired power plant

- 61**
Analytics in Shanghai
ABB's Analytic Systems Integration Unit in Shanghai

Risk management

- 64**
Process Analytical Technology
Integrated PAT solutions for the Life Sciences industry

- 68**
Flexibility guaranteed
System 800xA libraries – a unified yet flexible platform

72
Center of excellence
Serving local and global metals markets from China

75
Rolling mill simulator
Cold rolling mills benefit from rolling simulations

79
The challenge of device integration
Making sure "plug and play" equals "plug and produce"

82
The system type test
Making sure 800xA really does function as it should

Global responsibility

85
Safety management in process industries
Making sure safety is something you can trust

88
Integrated but separate
Advances in integrated safety control

93
Setting the standard
Global responsibility for quality and safety

96
Safe instruments
Safer instruments mean safer processes
