

ABB MEASUREMENT & ANALYTICS | DATA SHEET

# LLT100 Laser level transmitter

## Measurement made easy

## Customer benefits

The LLT100 is specifically made for industrial applications and harsh environments. It provides continuous, non-contact level measurement capabilities for process automation and inventory management in industries such as mining, aggregates, oil and gas, chemicals, food and beverages, power, pulp and paper, pharmaceuticals, and water and waste water.

### Optimize process or inventory management

- Precise measurement of any solid or liquid
- Independent of material properties

### Low cost of ownership

- Fast and flexible installation
- No maintenance
- Single product configuration works for many applications

## Main features

ABB brings level transmitters to the next level of non-contact measurements by packaging laser ranging technology with the features required by industrial applications. Using a pulsed laser to perform time-of-flight measurement, the LLT100 provides accurate distance measurements while being powered by a 4 to 20 mA current loop. Available in an aluminum or stainless steel housing, it comes with a variety of process interfaces. It can meet the demands of hazardous areas, high pressure, and high temperature applications.

### Convenient

- Easy setup function
- Articulated embedded graphical user interface
- 2-wire powered and HART 7 communication

### Reliable

- Dust and fog penetration capabilities
- Accurate measurement at short and long range
- Explosion-proof class 1, division 1

## Product configurations

### Base model

Ideal for measuring levels of solids at up to 100 m (328 ft), and liquids at up to 30 m (98 ft) when the process is at normal pressures. This affordable and powerful level transmitter can be used in a wide variety of applications, including hazardous areas.

Range	0.5 to 100 m (2 ft to 330 ft)
Process fitting	ASME class 150, NPS 2 in DN 50 PN 16 flat face
Operating temperature	–40 to 60 °C (–40 to 140 °F)
Process pressure	–1 to 2 bar (29 psi)
Accuracy	11 mm (0.4 in)

### Hygienic model

Ideal for food and beverage or pharmaceutical applications. Model fitted with a 4-inch triclover clamp interface with hygienic certifications. As with all models, available with aluminum or stainless steel housing.

Range	0.5 to 100 m (2 to 330 ft)
Process fitting	4-in triclover clamp
Operating temperature	–40 to 60 °C (–40 to 140 °F)
Process pressure	–1 to 1 bar (15 psi)
Accuracy	11 mm (0.4 in)

## Product configurations

### High pressure model

Ideal for high-pressure applications. Same performance as the base model, but fitted with a choice of pressure-rated flanges. As with all models, it is certified for use in hazardous area zone 1, and its laser beam can be sent safely into zone 0.

Range	0.5 to 100 m (2 to 330 ft)
Process fitting	ASME class 150/300, NPS 2 in DN 50 PN 16/40 raised face
Process temperature	–40 to 60 °C (–40 to 140 °F)
Process pressure	–1 to 49.6 bar (719 psi)
Accuracy	11 mm (0.4 in)

### Accessories

Configure the transmitter to a wide variety of applications.

- Dust tube
- Purge ring for dust tube
- Cooling tube (increases maximum process temperature to 280 °C (535 °F))
- Heated window (requires 4-wire power) (on flameproof/explosion proof configurations only; not available on intrinsically safe units)
- Through-the-glass HMI
- Flange adapters
- Alignment laser pointer
- External relays
- Rotating bracket, swivel flange

---

## Functions

---

## Advantages and new features

The laser transmitter measures any solid or liquid, at short or long range. A single configuration can meet a wide variety of requirements.

The LLT100 can be used in challenging hazardous areas, in the presence of potentially explosive dust or gases. It can be used in class 1/division 1 (zone 1) environments. For zone-rated environments, LLT100s configured with fused glass process flanges are approved for forming the barrier between zone 1 and zone 0, and sending its laser beam into zone 0.

For dusty applications, the dust tube prevents dust deposition on the window, lessening the need for preventive maintenance. For very high dust levels, a purge ring can be added to the dust tube to provide an air flow to enhance dust protection.

High temperature applications are made possible by the addition of a cooling tube. Cooling tubes with different process interfaces and different pressure ratings are available.

---

## Solid applications

A typical LLT100 application is to measure the level of solids in silos and tanks. These vessels can be found in various industries such as mining, aggregates, chemicals, food and beverages, power, pulp and paper, pharmaceuticals, etc.

The high sensitivity of the LLT100 allows level measurements in tall vessels. The transmitter's narrow laser beam can be precisely aimed to circumvent obstacles. Its installation is very flexible, as the transmitter can be placed close to the wall or angled inside the vessel.

Finally, material build-up on vessel walls has no effect on the measurement, as the narrow beam angle ( $<0.3$  degrees) prevents most interactions with the vessel sides.

The new LLT100 sets the new standard for industrial laser level measurement.

---

## Liquid applications

Liquid level measurements represent a large portion of level measurement applications. The LLT100 can detect any liquid, even transparent ones.

The LLT100 comes with the heated window option to prevent condensation on its optics.

In liquid measurement applications, the laser beam must be as perpendicular as possible to the liquid surface. Beam alignment should be within  $\pm 5$  degrees of the vertical. To help in performing laser beam alignment, the swivel flange accessory is very convenient as it provides a simple and efficient way to precisely align the laser beam.

For high pressure applications, the LLT100 comes with a variety of process flanges, rated at up to 49.6 bar (719 psi).

## Mixer/obstruction

Another challenge in the field of level measurement is obtaining reliable measurements in the presence of obstructions or mixing blades.

The very narrow beam (<0.3 degrees) of the LLT100 allows installation of the instrument at almost any place on top of the vessel and its positioning between the vessel wall and the edge of the mixer, thus providing reliable measurements. When it is not possible to avoid the mixer blades, the LLT100 has advanced processing functions that can still perform the measurement reliably by efficiently tracking the real level when the mixer blades cross the path of the laser beam.

## Positioning

Another application for the LLT100 is accurate position measurement for wagons, tipper cars or other moving objects.

An tipper car that is improperly positioned when it unloads its cargo can causes damages and lost time. Similarly, the LLT100 can be used to prevent collisions by moving cranes and other machinery.

The LLT100 can provide accurate position measurement at distances up to 200 m (660 ft) with the added use of a reflector.

## Specification

### Measurement

#### Range

- 0.5 to 30 m (2 to 100 ft) for liquids
- 0.5 to 100 m (2 to 330 ft) for solids
- 0.5 to 200 m (2 to 660 ft) for positioning applications<sup>1</sup>

#### Resolution

- 5 mm (0.2 in)

#### Typical accuracy

- 11 mm (0.4 in)

#### Measuring beam

- Laser wavelength: 905 nm, eye safe, Class 1

#### Laser beam divergence

- < 0.3°

### Environmental conditions

#### Operating temperature

- 40 to 60 °C (–40 to 140 °F)

#### Storage temperature

- 40 to 85 °C (–40 to 185 °F)

#### Survival temperature

- 40 to 80 °C (–40 to 175 °F)

#### Process pressure

- Base model: –1 to 2 bar (29 psi)
- Hygienic model: –1 to 1 bar (15 psi)
- Pressure-rated model: –1 to 49.6 bar (719 psi),  
depending on flange

### Vibration resistance

Compliant with IEC 60068–2–6:2007 Environmental testing – Part 2–6: Tests – Test Fc: Vibration (sinusoidal), 10–150 Hz 0.35mm–50m/s<sup>2</sup>

### Output

#### Analog

- 4 to 20 mA, NAMUR compliant

#### Digital

- HART 7 (multi-variable output)

#### Communication

- Local HMI, EDD/DTM, handheld

### Power supply

Powered from the current loop (flameproof/explosion proof/dust-ignition proof version):

- 4 to 20 mA, 15.5 to 42 V DC (if using HART, minimum input voltage is 21 V DC)

For intrinsically safe version:

- 4 to 20 mA, 15.5 to 30 V DC maximum (21 to 30 V DC for HART)

Heated lens option (for flameproof/explosion proof/dust-ignition protection only)

- 24 V DC (3 W)

### Mechanical

#### Housing material

- Powder coated aluminum (standard),
- 316L stainless steel (SST)(option)

#### Dimensions (W × H × D)

- Universal–flat flange: 247 × 215 × 165 mm (9.7 × 8.5 × 6.5 in)
- Class 150–raised flange: 240 × 242 × 154 mm (9.5 × 9.5 × 6.1 in)
- Class 300–raised flange: 247 × 242 × 165 mm (9.7 × 9.5 × 6.5 in)
- DIN PN 16–raised flange: 247 × 242 × 165 mm (9.7 × 9.5 × 6.5 in)
- DIN PN 40–raised flange: 247 × 242 × 165 mm (9.7 × 9.5 × 6.5 in)
- Hygienic flange: 223 × 215 × 137 mm (8.8 × 8.5 × 5.4 in)

#### Weight of standard model

- Aluminum housing with universal aluminum flange: 3.7 kg (8.2 lb)
- 316L SST housing with universal SST flange: 8.6 kg (19.0 lb)

#### Weight of pressure-rated model (depending on flange)

- Aluminum housing: 6.7 to 7.2 kg (14.8 to 15.9 lb),
- 316L SST housing: 10.0 to 10.5 kg (22.1 to 23.2 lb)

#### Weight of hygienic model

- Aluminum housing: 5.8 kg (12.8 lb)
- 316L SST housing: 9.1 kg (20.1 lb)

#### Protection class

- IP66/IP67/type 4X (for all versions except flange H which is IP66/type 4X)

#### Process fitting

- Flange (ASME 2 in, DN50), hygienic fitting/triclover 4 in (ISO2852)

#### Wetted parts

- Flange A: Aluminum, borosilicate window, silicone O–ring
- Flange B: 316L SST, borosilicate window, silicone O–ring
- Flanges C, D, F, G: duplex 2205 ring with fused borosilicate window (high pressure models) with a 316 SST pressure retaining flange
- Flange H: 316L SST, polycarbonate window, silicone SB70 O–ring, 3–A approved

#### Mean time between failures (MTBF)

- 25 years

<sup>1</sup> When using a reflective target

Specification

Operation

Display

Integrated 128 × 64 pixels LCD display with through-the-glass (TTG) interface

Software features

Volume computation, damping, filtering, thresholds/alarms, user-defined display (with HMI)

## Accessories — specifications

### Dust tube

#### Base plate diameter

165 mm (6.5 in) mounts on LLT100 flanges A and B

#### Length

257 mm (10.1 in)

#### Material

Epoxy powder coated 304 stainless steel

#### Gasket material

Black compressible Buna-N rubber durometer rating shore 60A

#### Function

Static air space prevents dust buildup

### Adjustable swivel flange

#### Outer diameter

210 mm (8.3 in)

#### Mounting bolt pattern

3 bolt holes, 10 mm (0.4 in) diameter

#### Tilt angle for aiming

Continuously adjustable from 0° to 6°

#### Material

Aluminum

### Purge ring

#### Diameter

165 mm (6.5 in), mounts on LLT100 flanges A and B.

#### Function

Allow air purge in front of LLT100 window. Can be used with dust tube to purge tube.

#### Purge air flow:

- Must use oil-free dry air
- Recommended flow between 0.5 and 4 L/min

#### Purge fitting:

- ¼-barbed tube fitting

#### Material

Aluminum

### Adjustable pivot bracket

#### Overall dimensions

185 × 249 × 55 mm (7.3 × 9.8 × 2.2 in)

#### Opening diameter

60 mm (2.4 in)

#### Mounting plate thickness

5 mm (0.2 in)

#### Mounting bolt

4× HHCS 5/8–11 × 2 SS + 8× washers + 2× lock washers + 4× nuts, bolt hole 8 × 18 mm (0.7 in)

#### Material

304 stainless steel

### Reflector

#### Function

Reflective panel for positioning applications up to 200 m (656 ft)

#### Size

90 × 90 cm (36 × 36 in)

#### Material

Aluminum with reflective paint

### Cable glands

#### Description

ATEX cable glands with ½ in NPT or M20 thread size

#### Material

Raw brass/Nickel plated brass

### Demo kit

#### Description

Rugged carrying case with LLT100, dust tube, battery pack, laser pointer tool

### External laser pointer tool

#### Function

Laser pointer accessory used for targeting and aiming purpose.

#### Pointing laser

650 nm wavelength

Less than 1 mW output power

#### Pointing laser safety

Class 2M

## Ordering information

<b>Accessory options — tube (multi-choice)</b>	<b>XXXX</b>
Dust tube	P901
Cooling tube, no window, no pressure rating	P920
Cooling tube, with window, no pressure rating	P921
Cooling tube, process interface NPS 2 in class 150 flange with window	P922
Cooling tube, process interface NPS 2 in class 300 flange with window	P923
Cooling tube, process interface DN 50 PN40 flange with window	P924
<b>Accessory options — bracket</b>	
Rotating bracket	A900
Swivel flange	A910
<b>Accessory options</b>	
Purge ring for dust tube	P910
Laser alignment tool	LAS
Reflector panel	REFL
Polycarbonate sight glass	PSG
Adaptor to LM80 bolt pattern	ADA
<b>Gaskets and O-rings</b>	
Gasket (qty 2) for flat face process flange (A or B) BUNA-N	G900
Triclover O-ring (qty 10), 4 in diameter	G901
<b>Process flange converter</b>	
Stainless steel 3 in/DN80 adapt plate, class 150 & DN80/PN6 bolt ptrn, non-pres. rated	PC03
Stainless steel 4 in/DN100 adapt plate, class 150 & DN100/PN10 bolt ptrn, non-pres. rated	PC04
Stainless steel 6 in/DN150 adapt plate, class 150 & DN150/PN10 bolt ptrn, non-pres. rated	PC06
3 in raised face ANSI class 150 flange converter	FC04
4 in raised face ANSI class 150 flange converter	FC05
6 in raised face ANSI class 150 flange converter	FC06
DIN80 raised face PN40 flange converter	FC10
DIN100 raised face PN40 flange converter	FC11
DIN150 raised face PN40 flange converter	FC12
<b>SIL certification</b>	
SIL2, IEC 61508	CS
<b>Certificate</b>	
Material declaration of compliance EN 10204-type 2.1	MTC
Certificate of origin	COO
Canadian registration number marking on product	CRN
Attested certificate of origin	ACO
Calibration certificate	CC
<b>ID tag plate</b>	
Supplemental declaration of compliance EN 10204-type 2.1 wired-on stainless steel plate	WSSP
Supplemental screwed-on stainless steel plate	SSSP
<b>Hard copy user documentation</b>	
German hardcopy operating instruction manual	M1
French hardcopy operating instruction manual	M2
English hardcopy operating instruction manual	M3
Chinese hardcopy operating instruction manual	M4
