
ABB E-MOBILITY

Product Life Cycle Announcement Limited for Terra AC metal pedestal for 2 chargers with e-base (6AGC082326)

The life cycle phase for the metal pedestal for 2 chargers with e-base, product order code ABB6AGC082326, will change from **Active** to **Limited** per **2023-07-01**.

In accordance with the ABB global policy, this product decision follows the ABB Life Cycle Management process. For details, please refer to the [Life Cycle Management](#) web page.

Within the Limited life cycle phase, no new orders for ABB6AGC082326 can be placed. Inventory levels will be actively managed towards stock reduction and further obsolescence. ABB E-mobility will ensure certain stock levels are kept for service and maintenance purposes.

The Limited phase will be valid until 2025-07-01, after which the product will enter the Obsolete phase. In the Obsolete phase, replacement of the product and spare parts will be possible only with new products/parts (if specified and available).

The local ABB Sales organization will inform the relevant stakeholders about this upcoming life cycle phase change to adapt their operational strategy accordingly.

The ABB product return policy will be valid during the Limited phase. Any returns after Limited life cycle phase will only be accepted with approval of the undersigned.

For any further questions, please contact your local ABB Sales representative or local ABB Service group.
