Learning on demand

UNITROL® 1000 E-Learning computer-based training. It is your decision where and when you learn.

You want to learn more about UNITROL® 1000 and do it when it best suits you?

Then what you need is our interactive E-Learning program!

Now available on CD.
With interactive E-Learning program for UNITROL® 1000 Automatic Voltage Regulator you decide where and when you learn.

This program introduces you step-by-step to the various applications of UNITROL 1000. It includes the fundamentals database with necessary background information on UNITROL 1000 and excitation systems in general, which can be consulted anytime.

The interactive elements of the program enable you to carry out realistic exercises on a virtual UNITROL 1000 unit. A practical questionnaire at the end of each chapter helps you to monitor the learning progress.

Content
- Excitation system fundamentals database
- Applications of UNITROL 1000
- How to connect UNITROL 1000
- How to operate UNITROL 1000 using the key pad
- How to use the CMT 1000 software
- Step-by-step commissioning of the UNITROL 1000
- Maintenance and troubleshooting

The E-Learning program is a perfect preparation for the J130 UNITROL 1000 course held at the training center of ABB University Switzerland. During this course you can apply the knowledge gained with E-Learning program to simulators and demo units and acquire practical experience necessary for the commissioning of UNITROL 1000.

More information about this course can be found on our website www.abb.com/abbuniversity in country-section “Switzerland”.
