

Installation solutions for your hotel

First-class solutions for high-class hotels.
That something special intelligently
designed.

Entering the future.
An unforgettable experience.
Over and over again.

Intro

Design, comfort and a sense of security are what characterize the atmosphere in high-class hotels. Modern electrical installation technology sets the tone for the days activities. You will transport your guests into the future with fascinating switch ranges and state-of-the-art technology for the perfect control of light, shading, climate and media. And at the same time profit from efficiency, because much will adjust itself automatically.

Welcome to the world of Busch-Jaeger – the traditional and innovative brand for electrical installation technology that is part of the internationally successful ABB-Group.

First-class reception. In a special atmosphere.

01

01 SMARTtouch panel

02 Busch-iceLight®

03 Design covers made of real metal

02

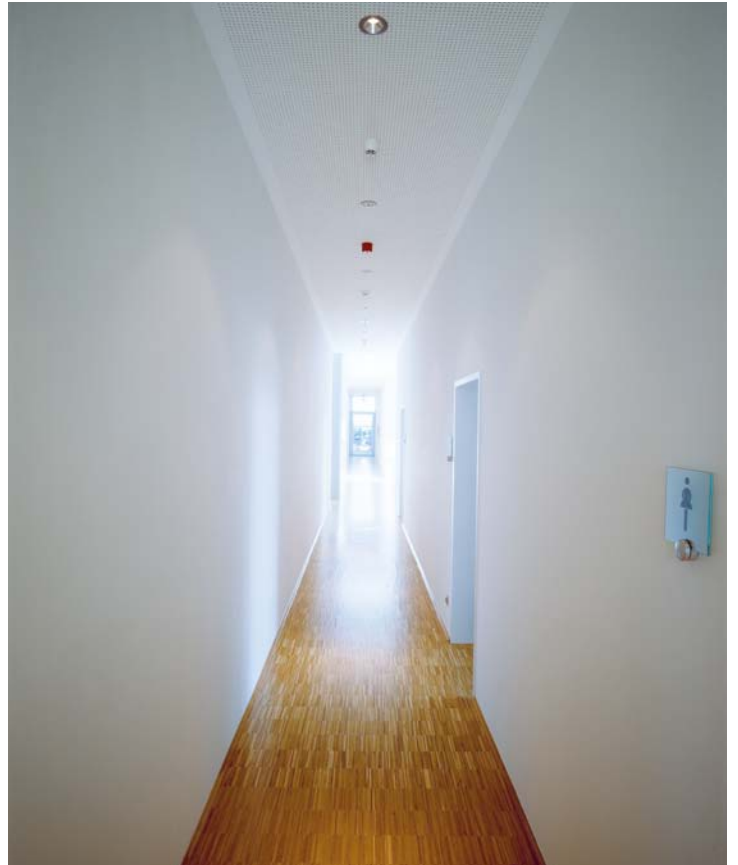

03

Clarity and comfort for reception and lobby.

Pleasant clarity: The multifunctional control panel gives your reception personnel a perfect overview of building installations - and perfect control of important functions simply with a contact of the touch panel. Your guests enjoy that superior welcome with clear signals in a stylish exterior: with Busch-iceLight®. The special effect is created by combining LED technology with high-quality acrylic glass, with individual signal inserts and with design covers made of real metal.

01

05

01 Busch-steplight®

02 Busch-iceLight® wall module Orientation

03 Busch-Watchdog 180 FM sensor Comfort

04 Busch-Watchdog Presence tech BasicLINE Corridor

05 Busch-Object socket outlet

Solutions for floors and other general areas.

Busch-steplight® connects socket outlet and orientation light. LEDs discreetly radiate light downward, to ensure, for example, that a step is not overlooked. As an energy-saving orientation the numerous versions of Busch-iceLight® make a first-class impression. And the Busch-Watchdog motion detectors, which switch lights on according to demand, ensure comfort together with an energy-saving effect. Ideal for your cleaning teams: The Busch-Object socket outlet also projects the plug at an angle, to prevent it from being pulled out while in a hurry.

Feeling at home. Only more so.

01

02

03

05

06

01 Bell switch with LED display

02 Intelligent card switch

03 Service button with access reader and bell

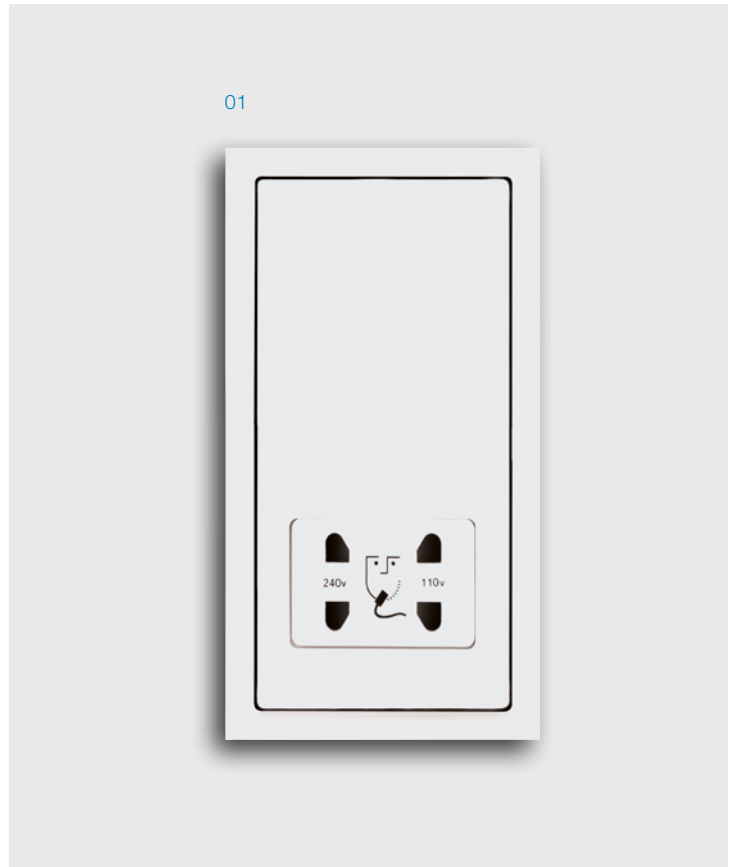

04 Busch-iceLight® wall module Orientation

05 Busch-iceLight® wall module Ambience

06 Busch-iceLight® ceiling module

Access, ambience, service: everything first class.

Comfort begins already at the door. For example, with a bell switch that indicates to the service personnel: "Please do not disturb" or "Please clean". Upon request also with integrated non-contact card reader which allows the guest easy access. When the card is inserted in the card switch in the hotel room, certain light are automatically switched on and the temperatures adjusted. The Busch-iceLight® Ambience range with its numerous versions cares for a decorative lighting effect, either shining downwards or as ceiling light, for example.

02

04

05

06

01 Shaver socket outlet

02 Busch-Comfort switch

03 2gang combination with volume control and 5 cm loudspeaker

04 Busch-Watchdog presence tech BasicLINE mini

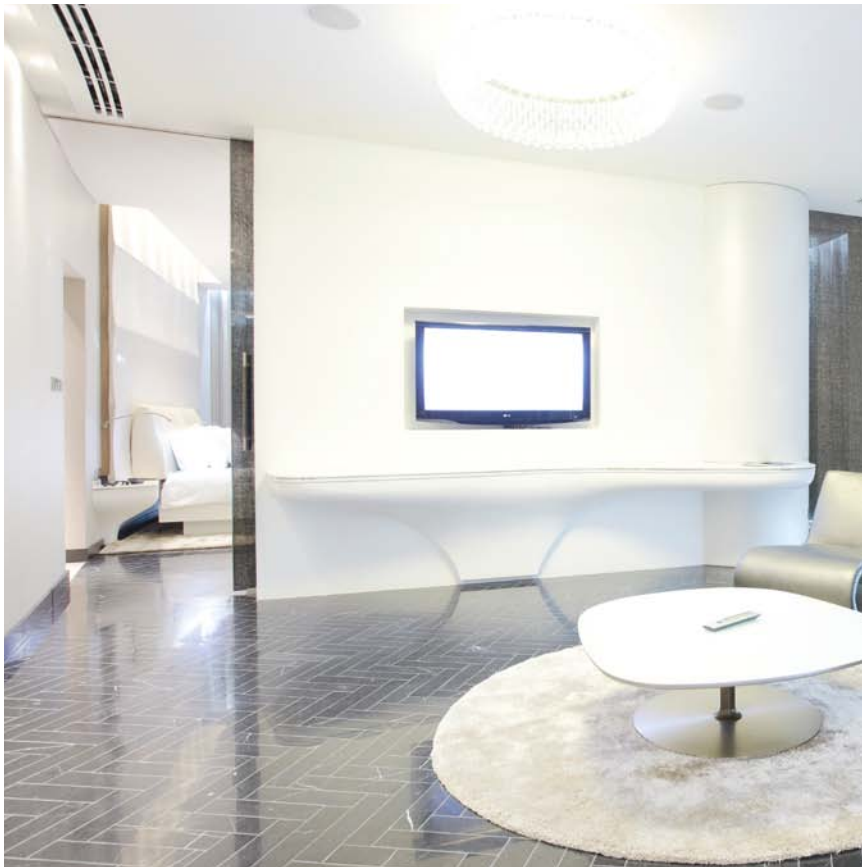

05 Short-time timer

06 SCHUKO® socket outlet with hinged lid

The comfort is seen in the detail.

A touch of luxury in the bathroom - the lighting, for example. The Busch-Comfort switch can switch the lights normally, automatically in response to movement or time-controlled. Or you can allow a ceiling motion detector to provide illumination when required. Whether timer, loudspeaker with volume control for individual listening pleasure, protected socket outlet or functional shaver socket outlet - with ABB-Busch-Jaeger you can fit out the bathroom practically, elegantly and to a high standard.

Whether room or suite: Feeling comfortable is a personal thing.

01

02

03

Impressive functions controlled intuitively.

Comfortable use of exclusive equipment - at a glance, with a minimum of touches. The KNX touch sensor, for example, is sufficient to dim the lights and operate the blinds. Or the functional elegance of the Bush-priOn® suffices to centrally and intuitively control the lights, the air-conditioning, the blinds and the music. Even more exclusive is the fascinating Busch-ComfortTouch®. For the enjoyment of all networked functions in the suite - from lighting, temperature and shading up to video player, sound system or the Internet.

01 Busch-priOn®

02 Busch-ComfortTouch®

03 KNX 2gang control element, dimmer and blind

04

01 Rotary dimmer

02 Room thermostat, conventional

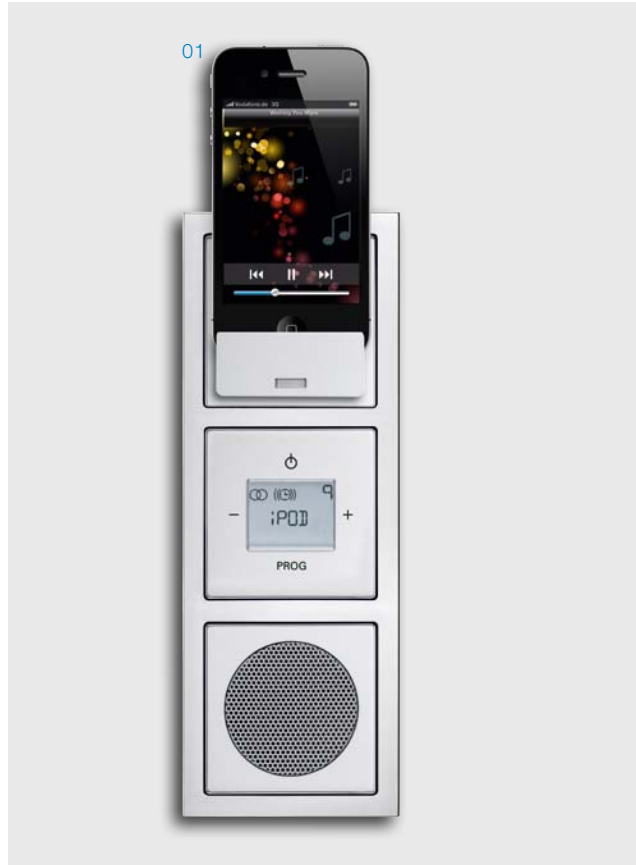

03 Room thermostat, KNX

04 3gang combination horizontal: SCHUKO® socket outlet.
Switch: central off. Double switch: TV/reading.

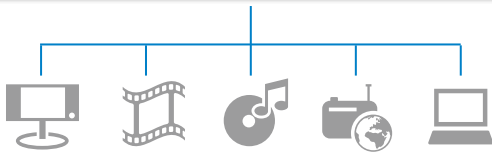

Light and warmth for all requirements.

With ABB-Busch-Jaeger the guest can effortlessly set his personally preferred atmosphere. Available are conventional light dimmers and self-explanatory room thermostats as well as KNX control elements that use networked functions and that change between presence or absence temperature at the press of a button. A comfort classic is the 3gang combination adjacent to the bed with socket outlet, a central off switch and the comfortable selection between TV and reading light.

Professional requirements. Special equipment.

02

01 3gang combination Busch-iDock – iPod*/iPhone* docking station, Busch-DigitalRadio, 5 cm loudspeaker

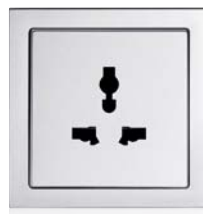

02 3gang combination: media hub

03 Universal socket outlet

04 Antenna socket outlet, 3gang

05 RJ45 Internet socket outlet, 2gang

03

04

05

The communication center in the room.

More and more private and business guests expect optimum access to media and comprehensive use of media. ABB-Busch-Jaeger offers connections and combinations for almost every type of requirement. From the classic telephone and antenna connections via network access and Internet connection up to connections for high-quality signals. iPhone* or iPod* are in perfect hands in the Busch-iDock, and in combination with a Busch-DigitalRadio provide the proper sound.

01

02

03

04

05

Solutions for atmosphere and efficiency in the restaurant.

Hotel restaurants must combine a stylish atmosphere with efficient processes. Here, various ideas are on offer. For example, the Busch-iceLight® LED light system or the practical floor socket outlets which are ideally suited, among others, for the connection of cleaning devices.

01 Busch-iceLight® wall module ambience

02 SCHUKO® socket outlet with hinged lid made of die-cast aluminium, flush-mounted on wall

Reliable comfort technology for the hygienic sector.

ABB-Busch-Jaeger is also perfect for the washroom - e.g. together with a motion detector that switches on the light only when required. The Busch-Infoline® recommends itself for special tasks, such as those suitable for the handicapped. In the event of an emergency the guest can trigger an alarm that is clearly indicated outside.

03 Busch-Watchdog presence tech

04 Busch-Infoline® alarm indicator

05 Busch-Infoline® emergency call

Ideal settings. From business to wellness.

01

02

03

04

01 SMARTtouch panel

02 Blind key switch

03 Blind switch KNX

04 4gang combination: media hub and universal socket outlet

Equipment as success factor.

Conference and meeting rooms must offer easy access to modern technical room installations. With state-of-the-art connections for modern presentation media and with individual control for lighting and air-conditioning. Here ABB-Busch-Jaeger offers individual solutions such as the blind key switch or networked elements such as KNX blind sensors. With the SMARTtouch the presenter has easy central control of the room and the media equipment - and with it the entire hall.

01

02

03

01 Ceiling loudspeakers, 13 cm

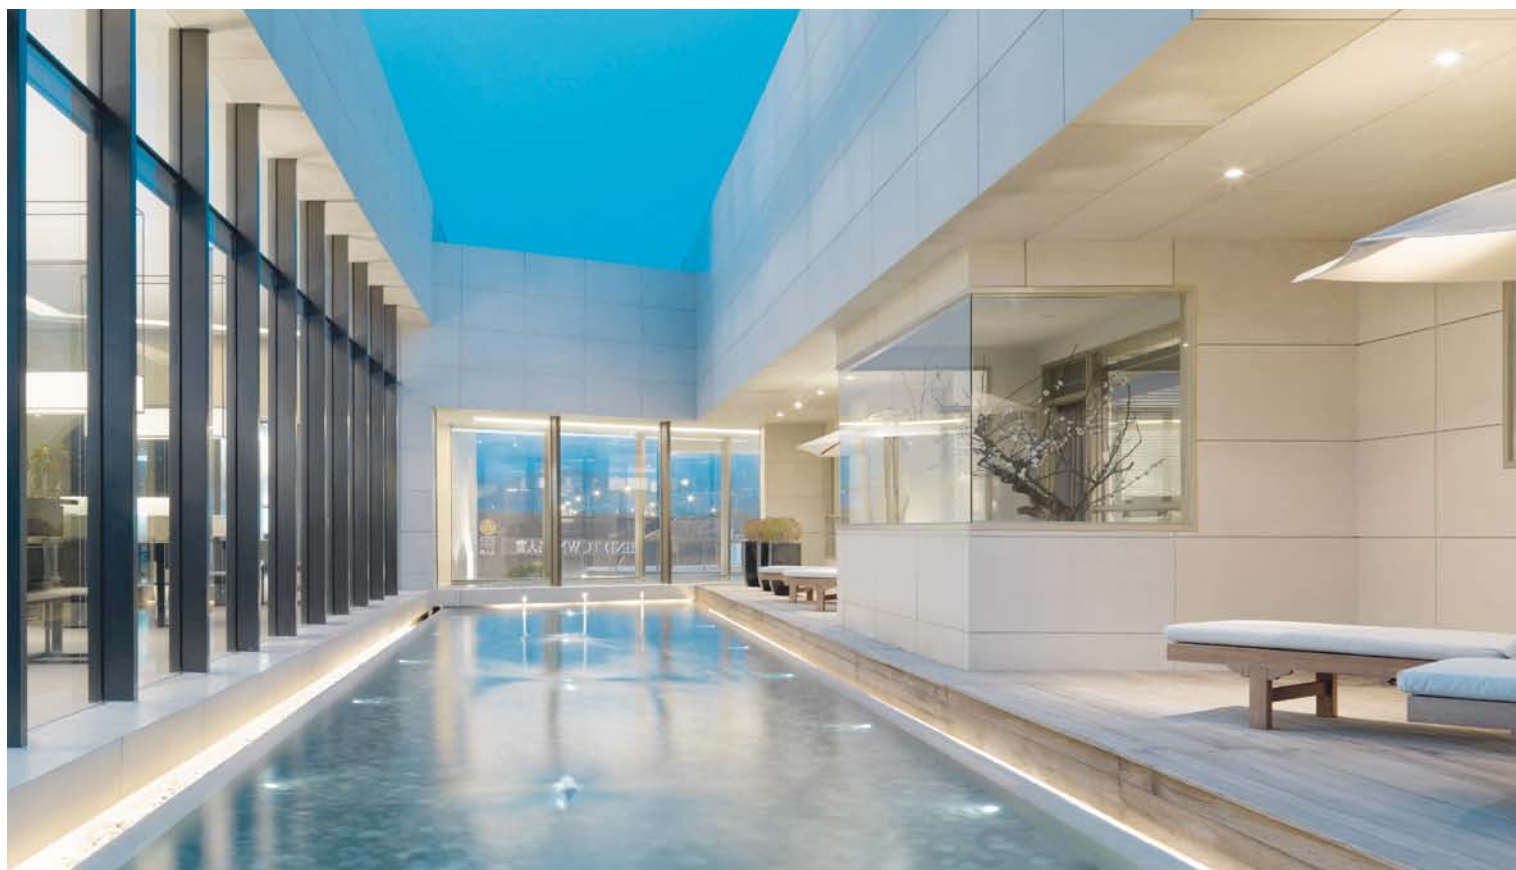

02 Busch-iceLight® wall module ambience

03 Busch-iceLight® wall module orientation

Relax all your senses.

The spa area is all about the atmosphere. A clear case for Busch-iceLight® ambience, the energy saving LED lights for unobtrusive class. With a choice of design panels and light directions for the individual note. And also as the Busch-iceLight® light for orientation that stylishly shows guests, for example, the way to information or to the showers. Also ideal: the ceiling loudspeakers, which ensure excellent sound.

Also outside the hotel: Comfort and security included.

01

01 Motion detector, surface mounted

02

02 Motion detector, flush mounted
Allweather 44®, water protected

03

03 SCHUKO® socket outlet with hinged lid
Allweather 44®, water protected

Present the outside areas in the right light.

Safety and convenience with motion detectors. When a guest steps onto the terrace in the dark, the light goes on and protects him from stumbling and transmits a feeling of safety. It is also a protection against unwanted visitors who are put off by the automatic light. Long distances, narrow corners, large radii - ABB-Busch-Jaeger has the perfect motion detector for every task. And the right socket outlets: weather resistant and dimensionally stable according to safety regulation IP 44.

01

02 ocean® Surface-mounted, water-protected, switch

03 ocean® Surface-mounted, water-protected, key switch

04 ocean® Surface-mounted, water protected, SCHUKO® socket outlet with hinged lid

**Small effort, lasting benefit:
Proven equipment for parking areas.**

Especially in underground car parks of hotels is specific lighting important. Hotels are increasingly leaving the switching of lighting according to requirement to movement detectors by ABB-Busch-Jaeger and are so saving on energy costs. Equally in demand: The highly reliable surface-mounted ocean® series, which includes robust, water-resistant socket outlets and light switches as well as key switches for the underground car park door.

Excellent equipment all-round. For quality work.

01

02

01 Motion detector, flush mounted
Allweather 44®, water protected

02 SCHUKO® socket outlet with hinged lid
Allweather 44®, water protected

Quality proves itself when times are very busy.

Especially in the hotel kitchen must technology and equipment function faultlessly. ABB-Busch-Jaeger supports your kitchen team effectively and discreetly. For example, the water-protected flush-mounted motion detector of the Allweather 44® series whose reliable function remains unaffected even by steam. Or the SCHUKO® socket outlets of the same range, water-protected and with a hinged lid. Kitchen staff can concentrate fully on its activities and rely on ABB-Busch-Jaeger.

01

02

03

04

01 RJ45 Internet socket outlet, 2gang

02 Frame with label field

03 Busch-Watchdog presence tech

04 Busch-Object socket outlet

Practical details for the office.

It is often the small things that make work permanently easier. Some, such as the right network connections, are indispensable. And one quickly learns to appreciate others. The light, for example, that is switched on by the motion detector - with an automatic savings effect when the office is not occupied. Or the frame with the useful labelling field for switches or socket outlets. And last but not least, the Busch-Object socket outlet that does not sustain damage even if the plug is pulled out in haste.

You have your style.
We enhance it.

Design

future® linear – uncompromisingly clear

- » A modern classic
 - » Uncompromisingly simple design
 - » The focus is on the essential
 - » Specific colour spectrum for different architectural styles
-

Unmistakable: The style of a hotel is what it promises and keeps. Characterized by the interplay of external and internal architecture, the equipment and the control elements. And here ABB-Busch-Jaeger switch ranges adapt, accentuate and provide contrast. And so become an unmistakable component of the overall atmosphere. Switch ranges from the noble modern to the practically beautiful. Different high-quality materials for expressive haptic and optics. A selection of colours that matches the radiance of the respective range and the environment. And also depth in variety: the ranges include a variety of switches and control elements for various tasks. For a uniformly unmistakable and recognizable style.

Your individual touch: Part of our ranges.

01

02

03

04

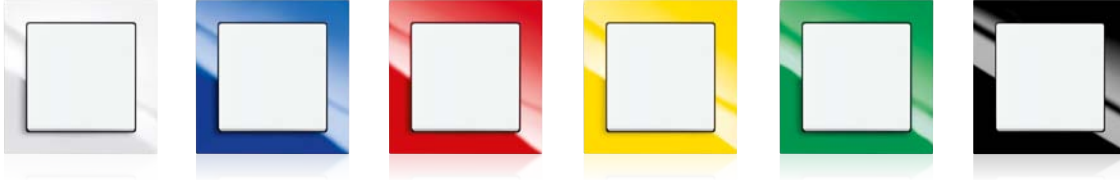

The facets of beauty.

Busch-Jaeger switch ranges turn into a reality what their names promise. For example, the all-round high-quality carat® range, or the inspiring impuls range with its control elements which are in part elegantly backlit. From the classic Reflex SI/SI Linear via impressive high-quality pure stainless steel and up to the shining modern highlights of Busch-ax-cent®: ABB-Busch-Jaeger design is impressive in its promotion of style.

Customizing – to suit your requirements.

ABB-Busch-Jaeger has even more to accentuate the style of your hotel. We make it possible to let the special features of your hotel flow into the visual effect of the control elements. We can print your specification on our products. An impressive idea: Your logo on specific switches - or control elements displaying the colours of your hotel. Why not consult us - we will gladly advise you.

Partners

Bang & Olufsen convinces worldwide with its unmistakable range of high-quality audio, video and multimedia products. In cooperation with ABB-Busch-Jaeger, integrated, high-quality electrical installations and entertainment solutions are created.

Lebens(T)raum Bad (Dream bath room). In association with the initiative of market leaders, Lebens(t)raum Bad (Dream bathroom), ABB-Busch-Jaeger cooperates with leading manufacturers such as Keramag, Grohe, Maico or SAM for integrated and uniform bathrooms that are a safe investment for generations to come.

Miditec. Ideal combination for hotels: The cooperation of ABB-Busch-Jaeger with Miditec as specialist for entry and security systems. For comfort and efficient automatic functions connected with access to guest rooms.

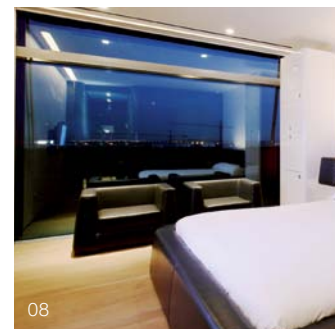

ABB-Busch-Jaeger bundles strengths by means of workable cooperations always there where they are most practical. For example, in cooperation with Bang & Olufsen we combine installation and entertainment technology into uniform systems, and with Miditec we combine access security, comfort and design. ABB-Busch-Jaeger knows no limit when it comes to improving ideas for your hotel. That is why our products are seen in exceptional hotels throughout the world. In Germany and Europe, in the Arabic world or in China. With our design-oriented solutions for noticeably more comfort, efficiency and safety in hotels we are able to regularly make that small but decisive difference. For your guests. And for the success of your hotel.

We look forward to your enquiries and your requests!

High quality. And in good company.
