

Push production limits without overheating your drives and motors.

For optimum productivity, motor-driven applications must be reliable, predictable and safe. That's why ABB has devised a suite of life cycle services for its

www.abb.com/drives, www.abb.com/drivespartners

variable-speed drives that span the value chain, from the moment you make an enquiry to the disposal and recycling of the drive. The results include production

reliability, lowest operational costs, least environmental impact and the best safety. To find out more, call ABB.
