

# Flow-X

Flow Computers & Remote Controllers

## Z265e – Web-based training (External version)

### Course duration

1.0 hour, depending on personnel knowledge

### Course type

This is a web-based training course. The course includes self-study material and self-assessment questions. The language of the course is English.

### Course goal

This course gives an overview of the ABB's Flow-X flow computer series.

The training covers the following topics:

- Technical principles
- Product portfolio & technology
- Applications

### Student profile

All ABB stakeholders (customers, universities, partners, ...)

### Course objectives

Upon completion of this course, students will be able to:

- Describe what a flow computer is and how it works
- Explain where a flow computer is used
- Identify the key features of a flow computer
- Identify the Flow-X hardware components
- Explain how the Flow-X is connected to devices and systems
- Describe the operator interfaces and the key software features
- Describe the main applications for the Flow-X flow computer
- Differentiate between the different applications for a flow computer
- Identify possible other applications for the Flow-X flow computer
