

Capital Spares Program

Reduce capital expenditures associated with spare part inventories

Reduce capital expenditures without compromising your inventory of needed critical spare parts

Reduce downtime risk and costly emergencies for critical spares

Eliminate budget surprises from shifting spare part costs

The Capital Spares Program will ensure spares are available for your critical automation equipment when capital expenditures are being squeezed or postponed. The agreement costs can be deferred over 1, 2 or even 3 years. Plus, unlike consignment programs where you never gain ownership of the parts, at the end of the contract period all parts are yours to keep.

The Capital Spares Program provides an inventory of critical spare parts on-site and a path to ownership at a fixed monthly cost.

You select the parts at the start of the contract period, where the parts are stocked and when a part is consumed.

With this agreement, your local ABB service engineer will provide an annual assessment of on-site spares inventory and usage and offer recommendations where applicable.

What the Capital Spares Program can do for your business

- Keeps inventory carrying costs low
- Helps you avoid emergency costs related to spare parts
- A trouble-free solution that gives you ownership of the parts

Why would a business need this program?

- ABB's proven inventory management capabilities assure that premium, OEM parts are maintained in your inventories
- Enables necessary spare parts to be proactively acquired while managing budget constraints
- A structured payment schedule eliminates budget surprises
