

HVDC link upgrade with latest control and protection technology

ABB Ability™ MACH™ – enhancing power reliability and control

Built 52 years ago, Konti-Skan was the first **interconnection** between Sweden and Denmark.

Exchanging renewable **hydropower** and **wind energy** for decades.

ABB's MACH **control and protection** system will enable Konti-Skan 1 and Konti-Skan 2 to work **together** as a single system for the first time.
