SFP Module single-mode 500SSM80
EDS500 series - Ethernet & DSL switches

- Long range SFP for distances up to 80 km
- Suitable for all EDS500 devices with SFP slots (MSA)
- Duplex LC connector / Single-mode fiber
- Monitors the optical signal quality / Alarm generation before link loss

Application
The long range SFP is a pluggable optical transceiver for fiber optical transmission lines of up to 80 km range.

ADVICE
The SFP requires a minimum attenuation of 3 dB.
Do not connect these SFPs directly via fiber optic patch cord.

This SFP type supports monitoring the receiver input power, as well as the transceiver temperature and voltage (via DOM, Digital Optical Monitoring). Additionally, with this SFP type, the optical signal quality and attenuation can be monitored (for instance via SNMP if supported by host). A signal quality threshold can be defined, to enable alarming even before the optical link is lost (due to material aging or similar).
### Technical data

#### Power budget
- Minimum output power: -5 dBm
- Maximum output power: 0 dBm
- Receiver sensitivity: -34 dBm
- Minimum power budget: 29 dB

#### General characteristic
- Data Rate: 100 Mbps Ethernet (125 MBaud)
- Range Classification: Long Range (LR) / 80 km
- Connector: Duplex LC
- Connector Contact Type: Physical Contact (PC)
- RoHS Compliant: Yes

#### Environmental conditions - climatic
- Nominal operating temperature range: -40 °C... 85 °C
- Relative humidity: 5... 95 % (non condensing)
