

1. CURRENT LIFE CYCLE STATUS

The SELE1000 Thyristor Bridges, hereafter the product, is in limited phase and it is reaching Obsolete life cycle phase on 1.1.2015.

2. SUPPORT AVAILABILITY IN THE OBSOLETE PHASE

In the Obsolete phase migration to the active product generation is the only possibility.

3. LIFE CYCLE PLAN

The ABB life cycle management approach, outlined above, allows us to manage an orderly transition to a new product while we ensure that our valued customers have access to our continuing support.

4. FURTHER INFORMATION

For more information on drives life cycle management and available services contact your local ABB organization or at <http://www.abb.com/drives>
