

Keeps your drinking water clean
without polluting the environment

DODGE[®]

Designed to last longer with less impact on the environment, Dodge[®] Torque-Arm[®] II gear reducers work to help water/wastewater facilities provide clean drinking water. The Dodge Torque-Arm II gear reducer runs cooler, which contributes to a long and reliable life. Dodge Torque-Arm II speed reducers offer unmatched torque ratings, industry proven reliability, new patented features, and power ratings that surpass all other shaft mounted speed reducers on the market.
