The new SACE Tmax XT circuit breakers are made to respond successfully to the most challenging plant engineering requirements. A complete offering up to 250A, 600V ac/dc for distribution, motor protection and switches enable the fulfillment of all requirements.

A new interchangeable range of both thermomagnetic and electronic protection trip units plus a large number of dedicated accessories allow for extreme flexibility.

All that remains is for you to choose:

SACE Tmax XT1 and XT3, with ABB's extraordinary quality and safety can be used in installations for large-scale distribution, in hospitals, and in all service vector applications that require high reliability up to 250A. In addition, motor protection (MCP) and molded case switch versions are offered.

SACE Tmax XT2 and XT4 offer top-of-the-line, advanced performances and functionalities that can be used in the most complex installations. They reach the highest interrupting ratings on the market in the most compact sizes.

The XT2 and XT4 circuit breakers can be easily used in a multitude of applications up to 250A:

- Power distribution with thermomagnetic and electronic trip units
- MCP motor protection with magnetic adjustable thresholds
- MPCB electronic motor protection with integrated overload and phase loss detection
- Molded case switch applications

XTraordinary coverage

ABB is proud to introduce SACE Tmax XT for UL 489 and CSA C22.2 up to 250A. Dual rated for UL/CSA and IEC standards, Tmax XT has unparalleled versatility of use with the ability to easily and efficiently solve all installation problems.

The new SACE Tmax XT for UL/CSA is an extraordinary demonstration of ABB’s innovation and capability. Available in three-pole and four-pole, fixed, plug-in and withdrawable versions, they are equipped with the very latest generation of thermomagnetic and electronic trip units.

This new line provides a new technological standard that allows for the creation of installations with extraordinary performances.

- Extraordinary latest generation electronics
- Extraordinary coverage of plant requirements
- Extraordinary performances in compact dimensions
- Extraordinary simplicity of installation and commissioning
- Extraordinary range of available accessories
