ABB Ability™ Verification SRV500 Service Training

ABB Measurement & Analytics training facility at the Stonehouse site delivers a programme of Instrumentation and Analyser training courses, specifically designed to meet client’s needs.

The skills of operations and maintenance play a key role in equipment performance as well as maximising investment.

Course type and methods
This is an instructor led workshop with presentations and demonstrations, extended practical sessions with the SRV500 measurement verification software and discussion.

Participant profile
The course is designed for engineers and technicians who are responsible for the day to day verification of field devices.

Course objectives
On completion of the training, students will have been trained to use the ABB Ability verification for measurement devices software.

Prerequisites
- ABB Ability Verification for measurement devices application (SRV500) installed on a laptop
- C2V files to be generated from each machine and provided to ABB, minimum 2 weeks in advance of the training to allow the licences to be secured
- Relevant drivers for all ABB comms devices must be installed
- Laptop/tablet/PC running 32- or 64-bit versions of Windows™ 10

Course outline
- Introduction to verification
- ABB Ability Verification for measurement devices overview
- Configuration of software
- Practical session - Software overview/demonstration
- Practical session - Testing

Duration
One day training course. Classroom or remote delivery available.
