2-PH UNDER IMPEDANCE PROTECTION DELAYED

- Blocking of all functions except 22x, function 22x changes to an instantaneous function.
- Resetting of indication
- Under impedance 22x, start
- Under impedance 22x, tripping
- Under impedance Z1x, tripping
- Loss of auxiliary voltage
- Connected for RL=110-220V DC change from 111 to 112 and 121 to 122 at RL=48-60V DC
