# ABB-free@home™
The freedom of home automation is simpler than ever.

free@
home

Intuitive technology for easy installations.

Make system setup and configuration easy.
ABB-free@home is a smarter home system that supports configuration using geofencing technology and time clock scheduling, as well as logic controls and notifications. Our intelligent setup wizard makes programming easy, and equally easy to modify through our simple drag-and-drop user interface.

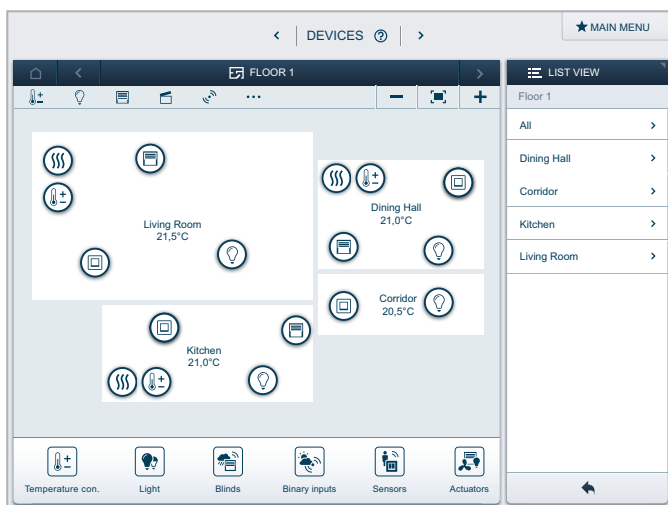

① The house
First, the installer defines the floor plan.

Flexible installation options.
ABB-free@home has the future in mind. After completing the system installation and setup, the installer can easily return to the home to add devices or to make changes to the configuration.

2 **Assigning**
Then, the installer initiates a search for the devices. The devices will upload and allow the installer to drag and drop them into the floor plan.

Support when you need it.
To ensure your success, answers are readily available to you at abb.com/freeathome. From robust FAQs and how-to videos to our informative system manual, we are ready to support you every step of the way.

3

Combining
The system is finalized by linking the control devices with a specific load, creating scenes, setting up time clock schedules and more.

Orchestrate your entire home from a single interface.

Welcome to the future today.
ABB-free@home isn't just another smart home solution. It's smarter than smart. Smarter than complicated installations, one-function devices and automation solutions that don't work together. ABB-free@home connects compatible devices and lets you manage them from one easy-to-use interface. It performs elaborate functions with ease and simplicity, so your home is safer, more comfortable and more enjoyable. That's smarter than smart home living.

The beauty of interoperability.

Making home automation easier than ever.
Smarter than smart home automation means ABB-free@home seamlessly integrates with a growing number of the world's leading smart products such as Philips Hue® Lighting, Sonos® and Amazon Echo®.
