

On-Site Training

Official classroom courseware and equipment brought directly to your team

A skilled and efficient workforce is a plant's most valuable asset. As with your entire production process, your workforce is key to optimizing your equipment's performance and maximizing your return on investment. ABB University US offers On-Site Training services for many standard courses physically at your facility when travel to a training center is not practical.

More students enrolled = More money saved

The cost of class tuition, weekend travel pay, and travel & living expenses for a week of training can add up. On-site training offers a significant cost savings opportunity for group sizes of 6 – 12 students:

Enrollment	In-Center cost*	On-Site cost**
3	\$18,000	\$34,840
4	\$24,000	\$36,136
5	\$30,000	\$37,432
6	\$36,000	\$38,728
7	\$42,000	\$40,024
8	\$48,000	\$41,320
9	\$54,000	\$42,616
10	\$60,000	\$43,912

Calculations are based on a 5 day class
 * In-center costs include an estimate of \$1840 for each student T&L cost.
 ** On-site prices are estimates. Contact ABB University for price quote.

Eliminate your employee travel costs and time away from home while providing your staff with the skills needed to efficiently run your control system.

Audience and additional information

- Effective course delivery format for groups of engineers, maintenance personnel and operators to gain skills and competencies
- Ideal for customers that are upgrading or installing a new system and cannot have several employees simultaneously away from the facility
- Can also be delivered at a local hotel conference room to help avoid classroom distractions

Contact Us

To request a proposal for On-Site Training, e-mail abbuniversity@us.abb.com and specify your system type, desired topics to be included in the training, and anticipated number of students.

An experienced ABB University US representative will conduct a Needs Analysis to identify knowledge gaps and match the best ABB University US courses to meet the team's unique training needs in this customized private class.
