## Current life cycle status
ACQ810 is in the Classic life cycle phase since 1.1.2018, according to the ABB life cycle model outlined above.

## Life cycle plan
It is planned to keep ACQ810 in the Classic phase until the end of 2021, after which it will be transferred to the Limited phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

## Recommended actions
No actions are required. Full range of life cycle services and support are available during the Classic phase.

## Further information
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

## Product availability in Classic phase
The product is not available in the Classic life cycle phase.
