ABB general purpose drives, ACS310, are dedicated to variable torque applications such as booster pumps and centrifugal fans.

The drive design includes a powerful set of features which benefit pump and fan applications including built-in PID controllers and PFC (pump and fan control) that varies the drive’s performance in response to changes in pressure, flow or other external data. The drives also have pre-programmed protection functions such as pipe cleaning for preventive maintenance.

The ACS310 drives provide built-in energy efficiency features. Energy savings can be easily monitored using the built-in energy calculators, that display energy savings in kilowatt hours and saved carbon dioxide emissions. The savings can also be displayed in local currencies.

Among the energy efficiency calculators is an energy optimizer that helps to improve system’s energy efficiency while operating at partial loads. Load analyzer is a built-in statistical tool to analyze the drive as well as motor dimensioning and further analyze the process energy efficiency and operation. Even the drive’s internal fan is controlled by software to reduce noise and losses, improving energy efficiency.

These features, combined with pre-programmed application macros, an intuitive user interface and several assistant screens, speed up the installation, parameter setting and commissioning of the drive.

**Highlights**
- Pump and fan features such as pump and fan control (PFC and SPFC)
- Pipe cleaning and fill functions
- Energy efficiency calculators
- Energy optimizer
- Load analyzer for optimized dimensioning of the drive, motor and process
- Embedded Modbus EIA-485 fieldbus interface
- FlashDrop tool for fast parameter setting
- Unified height and depth
- Full output current at 50 °C ambient
- Short parameter menu view

**Voltage and power range**
- 1-phase, 200 to 240 V ± 10%:
  - 0.5 to 5 hp (0.37 to 4 kW)
- 3-phase, 200 to 240 V ± 10%:
  - 0.5 to 15 hp (0.37 to 11 kW)
- 3-phase, 380 to 480 V ± 10%:
  - 0.5 to 30 hp (0.37 to 22 kW)

**Applications**
- Booster pumps
- Irrigation systems
- Level control
- Centrifugal fans

**Options**
- Basic and Assistant control panels
- FlashDrop tool for fast cold configuration
- MREL-01 Relay output extension module
- SREA-01 Ethernet adapter
- DriveWindow Light PC tool

* Re-rated 3-phase drive
1) $I_{m}$ maximum phase current at ambient temperature of +10 °C.
2) $I_{A}$ continuous output current at max ambient temperature of +50 °C. 10% overloadability for one minute every ten minutes.

### Mains connection

- **Voltage and power connection**
  - 1-phase, 200 to 240 V ± 10%:
    - 0.5 to 5 hp (0.37 to 4 kW)
    - 3-phase, 200 to 240 V ± 10%:
      - 0.5 to 15 hp (0.37 to 11 kW)
      - 3-phase, 380 to 480 V ± 10%:
        - 0.5 to 30 hp (0.37 to 22 kW)
- **Frequency**: 48 to 63 Hz

### Motor connection

- **Motor types**: Asychronous induction motors
- **Voltage**: 3-phase, from 0 to $U_{app}$
- **Frequency**: 0 to 500 Hz
- **Switching frequency**: 4, 8, 12, and 16 kHz (derated)
- **Type of control**: Scalar U/f, Linear, squared, and user definable U/f profiles
- **Energy optimizer**

### Environmental limits

- **Degree of protection**: IP20/Optional NEMA 1 enclosure
- **Ambient temperature**: 14 to 122 °F (-10 to +50 °C), no frost allowed

### Product compliance

- **Markings**: CE and C-Tick approvals, UL, cUL and GOST R, RoHS compliant
- **Harmonics**: For reducing THD in partial loads and to comply with EN/IEC 61000-3-12 with external AC input chokes.
- **EMC**: Class C3 (2nd environment unrestricted distribution) built-in standard, Class C2 and C1 with external optional EMC filters

### Typical I/O connections

- **ACS310: X1**
  - DI configuration NPN connected (sink)
    - +24 V
    - GND
    - DI1
    - DI2
    - DI3
    - DI4
    - DI5
  - DI configuration PNP connected (source) with external power supply
