PRODUCT LIFE CYCLE STATEMENT

ACS800 Single Drives and Drive Modules
ACS800-04/-07
500…2800 kW

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Current life cycle status
The ACS800 product types concerned are in the Classic phase since 1.7.2017, according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep the product types concerned in Classic phase until the end of 2034.

Product availability in Classic phase
During the Classic phase new modules are available as spare parts for the following product types, until further notice:
