## AC Induction low inertia motors High dynamic performance series

Power and productivity  
for a better world™

**ABB**

We provide motors and generators, services and expertise to save energy and improve customers' processes over the total lifecycle of our products, and beyond.

# AC Induction low inertia motors

### Flange-mounted motor, large flange

#### Code I / code II

					
IM B5	IM V1	IM V3	*)	*)	*)
IM 3001	IM 3011	IM 3031	IM 3051	IM 3061	IM 3071

### Foot- and flange-mounted motor with feet, large flange

#### Code I / code II

					
IM B35	IM V15	IM V36	*)	*)	*)
IM 2001	IM 2011	IM 2031	IM 2051	IM 2061	IM 2071

\*) Not stated in IEC 60034-7.

Note: If the motor is mounted shaft upwards, take measures to prevent water or any other liquid from running down the shaft into the motor.

# High dynamic performance (HDP) series

High Dynamic Performance series have been designed to be used in rough operating conditions and to operate only with a frequency converter. Square frame design and high overload capacity gives the motor an excellent dynamic response due to low moment of inertia and high pulse torque. Motors can be equipped with an integrated holding brake and/or a wide variation of feedback devices.

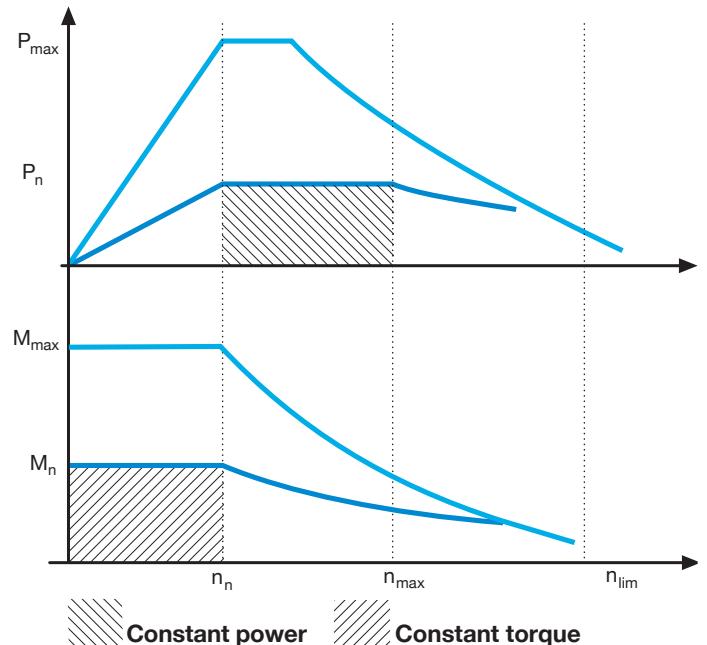

## Industries and applications

High Dynamic Performance series are ideal for:

### DC motor replacement

Plastic & rubber	Extruders Injection moulding machines Mixers
Paper	Printing machines Paper-making machines Sheet-fed printing, commercial printing Paper and cardboard cutters Winding and unwinding Conveyors
Metal	Coilers and de-coilers machines Presses Winding and unwinding Conveyors Wire-drawing machines Cable stranding machines
Machine tools	
Automotive	Test stands

## HDP - Power and torque calculation

$n_n$	Nominal speed
$n_{max}$	End constant power
$n_{lim}$	Mechanical limit speed
$P_n$	Nominal power
$P_{max}$	Max power
$M_n$	Nominal torque
$T_{max}$	Max torque

## Main formulas

Formula	Symbol	Unit	Meaning
$P = M \times \omega$	$P$	(W)	Power
	$M$	(Nm)	Torque
	$\omega$	(rad/s)	Angular speed
$\omega = n \times \frac{2\pi}{60}$	$\omega$	(rad/s)	Angular speed
	$n$	(RPM)	Rev.per minute
$M_{RMS} = \sqrt{\frac{\sum M^2 \times t}{T}}$	$MRMS$	(Nm)	Average torque
	$M$	(Nm)	Cycle torque
	$t$	(s)	Cycle time
	$T$	(s)	Total time

# Frequency converter drives — Full range of products to meet your motor and machine control needs

A wide selection of ABB drives and programmable logic controllers is available for HDP motors and machine control. Our drive products offer flexible choices ranging from different enclosure alternatives and safety features to control performance. Most of the drives are equipped with direct torque control (DTC) enabling premium motor control, even without a feedback device. The AC500 range of PLCs offers a scalable platform for machine control with powerful programming and supervision software. Automation Builder is a new PC suite integrating PLC and drive programming with many other useful features for engineering productivity.

## ABB industrial drives

ABB industrial drives are highly flexible AC drives that can be customized to meet the precise needs of industrial applications. The new-generation ACS880 drives are part of ABB's new all-compatible drives portfolio that is designed to provide customers across industries and applications with unprecedented levels of compatibility, flexibility and ease of use.

ACS880 series - all-compatible drive with everything built-in:

- Power range 0.55 to 560 kW (208 to 690 V)
- IP20, IP21 and IP55 enclosures
- Compact drives with all important features built-in, saving installation space and time
- Premium motor control with direct torque control (DTC)
- Integrated safety features with safe torque off (STO) as standard and several safety functions as an option
- A broad range of options offer flexibility and universal connectivity

For further information, see catalog "ABB industrial drives, ACS880, single drives", code: 3AUA0000098111 EN.

## ABB machinery drives

ABB machinery drives can be flexibly configured to meet demands set by different machines. The drives have a broad range of standard and optional features. User-specific programming offers additional flexibility to meet challenging machine requirements.

ACS850 series - flexibility and scalability for machinery applications:

- Power range 0.37 to 560 kW and voltage range 380 to 500 V
- IP20 enclosure for cabinet installation
- Compact size and side-by-side mounting save space in cabinets
- Premium motor control with direct torque control (DTC)
- Standard control program can be easily modified to meet specific application needs, and function block programming with DriveSPC software provides additional flexibility
- Integrated safety with safe torque off (STO)

For further information, see catalog "ABB machinery drives, ACS850", code: 3AUA0000041481 EN

## ABB motion control drives

ABB motion control drives offer dynamic and highly accurate motor control for both single and multi-axis systems. The drives have open communication options as well as real-time Ethernet technologies such as EtherCAT® and PowerLink. In addition to drives, ABB offers complete motion control solutions, including motion controllers, programmable logic controllers, safety features and human-machine interfaces. All of which seamlessly interface to provide a complete machine control solution.

ACSM1 series - the flexible workhorse for many high performance applications:

- Current range 3 to 635 A rms (0.75 to 355 kW)
- Voltage range 230 to 500 V AC (3-phase)
- IP20 enclosure for cabinet installation
- Different product variants, options and programming flexibility ensure an optimum solution

- Premium motor control with direct torque control (DTC)
- Regenerative supply for applications with high braking power duty cycles
- Integrated safety with safe torque off (STO)

For further information, see catalog “ABB motion control drives, ACSM1”, code: 3AFE68675073 EN.

High availability configurations are easy to implement for CPU redundancy. The AC500-XC series is the first choice for eXtreme Conditions such as vibrating machines used in harsh ambient environments such as extreme humidity and temperature. -Automation Builder is the effortless, straightforward engineering suite for PLCs, drives, HMI, robots, motion and internet services.

For further information, see catalog “PLC Industrial Automation”, code: 1SBC125003C0205 EN and [www.abb.com/plc](http://www.abb.com/plc)

MotiFlex e100 series - versatile motion control drive for a wide range of applications:

- Current range 1.5 to 65 A rms in three frame sizes
- Voltage range 180 to 528 V AC (3-phase)
- IP20 enclosure for cabinet installation
- Ethernet PowerLink technology for real-time motion control
- Mint programming for multitasking control of communications, logic, motion and HMI interaction in a powerful yet simple programming language.

For further information, see flyer “ABB motion control products, MotiFlex e100 servo drives”, code: 3AU0000116019 EN.

### **ABB’s programmable logic controllers (PLCs)**

ABB offers a comprehensive range of scalable, powerful PLCs, integrated engineering software suite and robust HMI control panels. The PLC range starts with the affordable compact AC500-eCo. AC500 is the powerful flagship PLC, offering a wide range of performance levels and the AC500-S is the Safety PLC which can be used with the AC500 combining safe and non-safe applications into the same platform.

## Bearings

The motors are normally fitted with single-row deep groove ball bearings as listed in the table below. If the bearing at the D-end is replaced with a roller bearing (NU-type), higher radial forces can be handled. Roller bearings are suitable for belt drive applications. For high speed applications a special ball bearing or roller bearing should be used. Other special bearings may be mounted upon request, please check with ABB if required.

### Basic version with deep groove ball bearings

Motor type	D-end	N-end
CH (H100)	6308-2Z/C3*	6206-2Z/C3*
CM (H132)	6310-2Z/C3*	6308-2Z/C3*
CN (H160)	6312-2Z/C3*	6309-2Z/C3*
CR (H200)	6315-2Z/C3*	6314-2Z/C3*
RT (H250)	6322-C3/LGHP2	6319-C3/LGHP2

\* Bearing greased for life

### Version with deep groove high speed ball bearings

Motor type	D-end	N-end
CH (H100)	6308-C3/LGHP2	6206-2Z/C3*
CM (H132)	6310-C3/LGHP2	6308-2Z/C3*
CN (H160)	6312-C3/LGHP2	6309-2Z/C3*
CR (H200)	6315-C3/LGHP2	6314-2Z/C3*
RT (H250)	6319-C3/LGHP2	6319-C3/LGHP2

\* Bearing greased for life

### Maximum mechanical motor speed according to bearing type and mounting

Mounting	Horizontal B3 - B5 - B35				Vertical V1 - V5 - V15 - V3 - V6 - V35			
	Standard		High speed		Standard		High speed	
D-end bearing	Ball bearing greased for life	Roller bearing re-greasable	Ball bearing re-greasable	Roller bearing re-greasable	Ball bearing greased for life	Roller bearing re-greasable	Ball bearing re-greasable	Roller bearing re-greasable
N-end bearing	Ball bearing greased for life		Ball bearing greased for life		Ball bearing greased for life		Ball bearing greased for life	
	rpm	rpm	rpm	rpm	rpm	rpm	rpm	rpm
CH (H100)	7500	6700	11000	8000	5300	6700	7500	7500
CM (H132)	6000	5000	8500	6700	4300	5000	5300	5300
CN (H160)	5300	4800	6700	5600	3600	4800	5300	5300
CR (H200)	4300	3800	5600	5300 <sup>(1)</sup>	2800	3200	5600 <sup>(1)</sup>	5300 <sup>(1)</sup>
RT (H250)	3800 <sup>(1)</sup>	3000 <sup>(1)</sup>	4800 <sup>(1)</sup>	N/A	3000 <sup>(1)</sup>	3000 <sup>(1)</sup>	4500 <sup>(1)</sup>	N/A
			4200 <sup>(2)</sup>				4200 <sup>(2)</sup>	

<sup>(1)</sup> Frame size 200 & 250 with re-greasable bearings

<sup>(2)</sup> Frame size 250 with stator length 6

Insulated bearing at N-end is required from 100kW and above. HDP motors frame size 200 & 250 are equipped with insulated bearing at N-end as standard. Smaller frames can also be equipped with an insulated bearing as an option.

Bearing life depends on the environment and the radial force. Average life time of the bearings is 20.000 hrs of operation.

### Version with roller bearing at D-end

Motor type	D-end	N-end
CH (H100)	NU308/LGMT3	6206-2Z/C3*

CR (H200)	NU315/LGHP2	6314-2Z/C3*
RT (H250)	N/A	N/A

\* Bearing greased for life

## Lubrication

The motors are delivered with bearing grease for use at normal temperatures in dry or humid environments. The motors are lubricated for ambient temperatures 40°C.

Motor sizes 100 to 200 are provided with bearings greased for life. As an option motor sizes 100-200 can be provided with regreasable bearings. Motor size 250 is provided with regreasable bearings.

The lubrication interval L1, suitable for regreasable bearings, is defined as the number of operating hours after which 99 percent of the bearings are adequately lubricated.

On delivery, the motors are ready lubricated with high quality grease. Please find details and instructions in HDP Motor Manual before first start-up. The recommended grease can be found in ABB's HDP Motors Manual delivered together with the motor.

### Standard ball bearings

# Terminal box

## Standard terminal box and dimensions

### Terminal box standard delivery IP54-motors

Terminal boxes are mounted on the top of the motor at N-end as standard on frame sizes 100, 132, 160 and 200. On the 250 frame size the terminal box is mounted on the right hand side seen from the D-end as standard. The terminal boxes can be turned 4x90° to allow cable entries from different positions. Motor sizes 100, 132 and 160 come with a terminal box made of aluminum alloy with threaded cable entries. Motor size 200 come with an terminal box made of steel with an connection flange with threaded cable entries. Motor size 250 come with an terminal box made of steel with an un-drilled connection flange. Cable glands are not included as standard on HDP-motors, but can be ordered as a separate option.

Motor type	Threaded holes
CH IP54 (H100)	1xM50 + 1xM20 + 3xM16
CM IP54 (H132)	1xM50 + 1xM20 + 3xM16
CN IP54 (H160)	1xM50 + 1xM20 + 3xM16
CR IP54 (H200)	2xM63 + 1xM20 + 1xM16
RT IP54 (H250)	Blind flange

### Terminal boxes and boards

The pictures below show examples of standard terminal boxes and the corresponding terminal boards for various motor sizes.

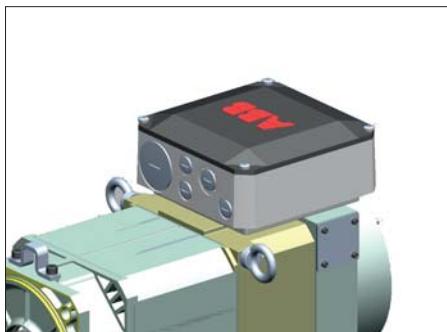

Fig. 1. Terminal box for motor sizes 100 - 160.

## Bearings

The motors are normally fitted with single-row deep groove ball bearings as listed in the table below. If the bearing at the D-end is replaced with a roller bearing (NU-type), higher radial forces can be handled. Roller bearings are suitable for belt drive applications. For high speed applications a special ball bearing or roller bearing should be used. Other special bearings may be mounted upon request, please check with ABB if required.

### Basic version with deep groove ball bearings

Motor type	D-end	N-end
VH (H100)	6308-2Z/C3*	6206-2Z/C3*

			4200 <sup>(2)</sup>				4200 <sup>(2)</sup>	

<sup>(1)</sup> Frame size 200 & 250 with re-greasable bearings

<sup>(2)</sup> Frame size 250 with stator length 6

Insulated bearing at N-end is required from 100kW and above. HDP motors frame size 200 & 250 are equipped with insulated bearing at N-end as standard. Smaller frames can also be equipped with an insulated bearing as an option.

Bearing life depends on the environment and the radial force. Average life time of the bearings is 20.000 hrs of operation.

### Version with roller bearing at D-end

Motor type	D-end	N-end

## Lubrication

The motors are delivered with bearing grease for use at normal temperatures in dry or humid environments. The motors are lubricated for ambient temperatures 40°C.

Motor sizes 100 to 200 are provided with bearings greased for life. As an option motor sizes 100-200 can be provided with regreasable bearings. Motor size 250 is provided with regreasable bearings.

The lubrication interval L1, suitable for regreasable bearings, is defined as the number of operating hours after which 99 percent of the bearings are adequately lubricated.

On delivery, the motors are ready lubricated with high quality grease. Please find details and instructions in HDP Motor Manual before first start-up. The recommended grease can be found in ABB's HDP Motors Manual delivered together with the motor.

### Standard ball bearings

# Terminal box

## Standard terminal box

### Terminal box standard delivery IP23-motors

Terminal boxes are mounted on the right hand side seen from the D-end as standard on all IP23-motors. The terminal boxes can be turned 4x90° to allow cable entries from different positions. Motor sizes 100 and 132 come with a terminal box made of aluminum alloy with threaded cable entries. Motor sizes 160 and 200 come with a terminal box made of steel with an connection flange with threaded cable entries. Motor size 250 come with an terminal box made of steel with an un-drilled connection flange. Cable glands are not included as standard on HDP-motors, but can be ordered as a separate option. It is possible to order an larger terminal box than standard on IP23-motors.

Motor type	Threaded holes
VH IP23 (H100)	1xM50 + 1xM20 + 3xM16
VM IP23 (H132)	1xM50 + 1xM20 + 3xM16
VN IP23 (H160)	2xM63 + 1xM20 + 1xM16
VR IP23 (H200)	2xM63 + 1xM20 + 1xM16
VT IP23 (H250)	Blind flange

### Terminal boxes and boards

The pictures below show examples of standard terminal boxes and the corresponding terminal boards for various motor sizes.

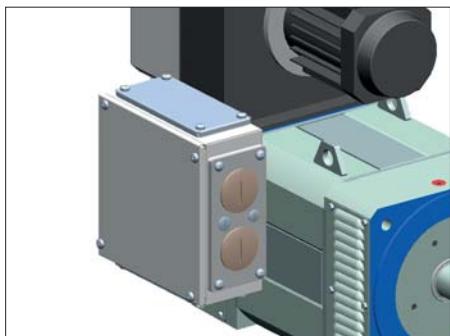

Fig. 1. Terminal box for motor sizes 100 - 160.

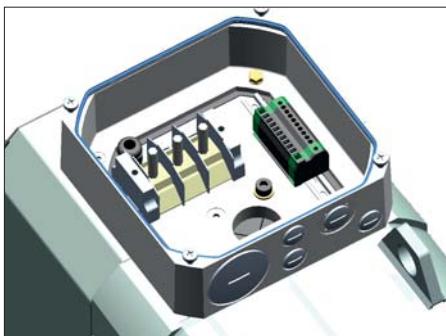

Fig. 2. Terminal board for motor sizes 100 - 160.

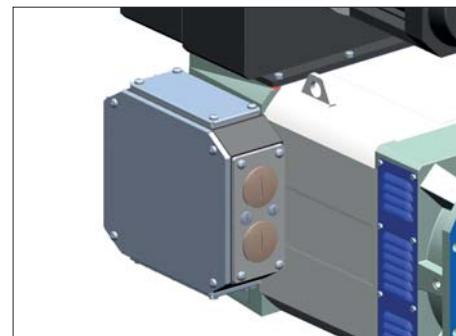

Fig. 3. Terminal box for motor sizes 200.

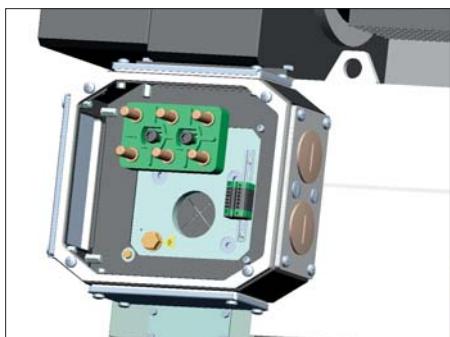

Fig. 4. Terminal board for motor sizes 200.

Fig. 5. Terminal box for motor sizes 250.

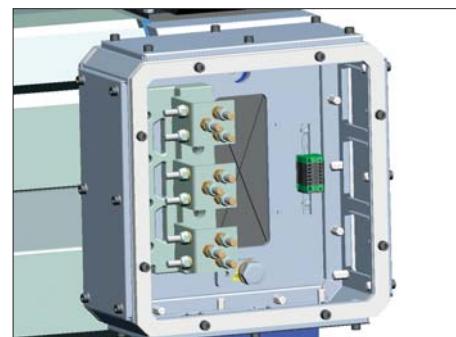

Fig. 6. Terminal board for motor sizes 250.

Fig. 7. Terminal box for motor sizes 250 (\_XL).

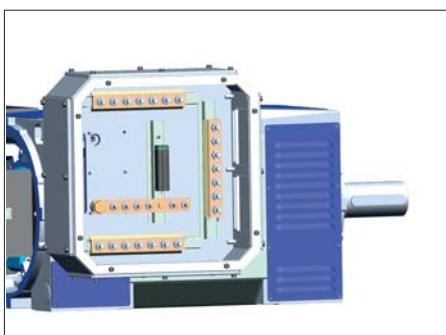

Fig. 8. Terminal board for motor sizes 250 (\_XL).

# Terminal box Dimensions

## Frame dimensions

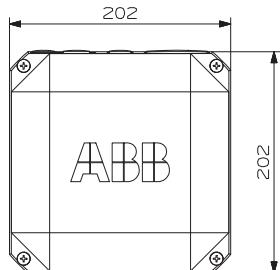

Fig. 1. Motor sizes 100 – 160 VH and VM, standard design with 3 terminals

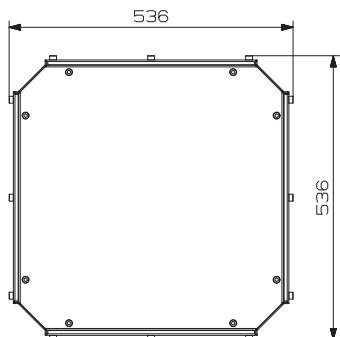

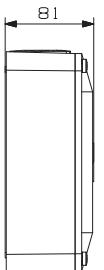

Fig. 5 Motor sizes 250, special oversized design with 21 terminals

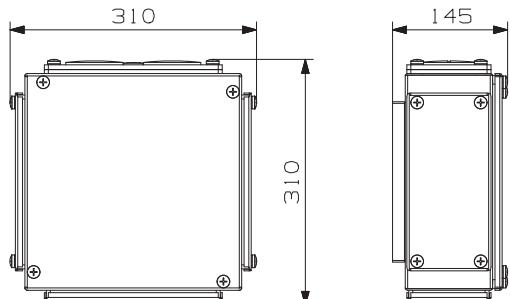

Fig. 2. Motor sizes 160 VN, standard design with 3 terminals

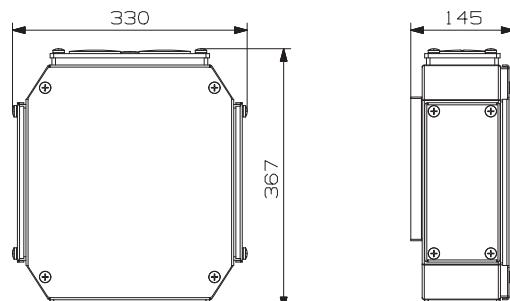

Fig. 3. Motor sizes 200 VR, standard design with 6 terminals

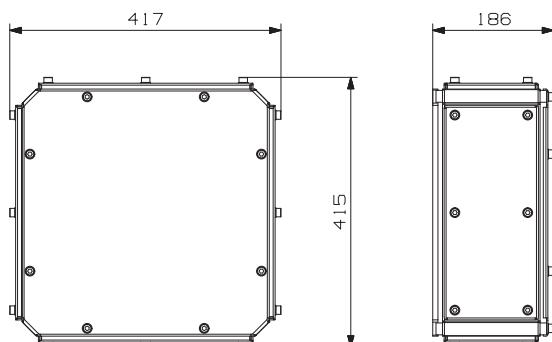

Fig. 4. Motor sizes 250, standard design with 9 terminals

# Rating plate

Rating plate is in table form giving values for speed, current, power factor, frequency and torque for one voltage. Values for the external fan motor will also be visible both on the motor rating plate and on the fan motor rating plate.

# Ordering information

When placing an order, specify motor type and other product codes according to the following example.

## Explanation of the product code

Motor type	Shaft height	Stator length	Nominal speed	Construction and mounting details	Supply voltage	Painting	Accessories
V	M	3	1	A00002001	A	0	00
1	2	3	4	5 6 7 8 9 10 11 12 13	14	15	16 17

### Position 1

V: IP23 HDP, H100 - H250

W: IP23 HDP (UL)\*, H100 - H250

### Position 2

H: H100

M: H132

N: H160

R: H200

T: H250

### Position 3

Stator length; from 1 to 6 (see technical data)

### Position 4

Nominal speed; from 0 to 7: (0=500 rpm, 1=1000, 2=1500, A=1750, 3=2000, 4=2500, 5=3000, 6=3500, 7=4000)

### Position 5

Terminal box position and fan position

A: IP23 terminal box right side and fan upside

D: IP23 terminal box left side and fan upside

### Position 6

Mounting

From 100 to 200: 0=B3/B5/B35, 1=V15\*, 3=V35\*

250: 4=B3, 0=B5\*, 5=V5\*, 6=V6\*

### Positions 7 and 8

Position transducer

00: Without transducer

OK: HTL 1024 ppr\*

2K: TTL 1024 ppr\*

03: HTL 2048 ppr\*

2J: TTL 2048 ppr\*

50: 0,5 Vpp 1024 sin/cos\*

53: 1Vpp 2048 sin/cos\*

### Position 9

Holding brake

0: Without brake

1: Standard spring brake\*

2: Special spring brake high torque\*

### Position 10

Shaft details

2: With keyway, without oil seal

3: Without keyway, without oil seal

### Position 11

Bearings type

0: Ball bearings

1: Roller bearings\*

7: High speed ball bearings\*

8: High speed roller bearings\*

### Position 12

Shaft details

0: Standard for H100, H132, H160, H250

1: Standard for H200

### Position 13

Thermal protection

1: 3 x Thermal switch in terminal box, 140°C

2: 3 x PTC in terminal box, 140°C

9: 3+3 thermal switch in terminal box, 120°C and 140°C\*

A: 3+3 PTC in terminal box, 120°C and 140°C\*

B: PT100, 2-wire in stator winding, one per phase\*

C: PT100, 3-wire in stator winding, one per phase\*

### Position 14

A: 400 V motor power supply and 400 V 50 Hz fan power supply

B: 460 V motor power supply and 460 V 60 Hz fan power supply

### Position 15

Painting

0: Black RAL 9005

### Positions 16 and 17

Accessories

00: No accessories

01: 230 V Anti-condensation heaters\*

02: Micro switch for radial fan\*

04: Insulated ball bearing for size H100, H132, H160

(not necessary for H200 and H250 since this function is basic)\*

\* see price list for additional cost adders. Selection of options may extend lead time.

## High dynamic performance motors, IP23 series

Typical exploded view of frame size H200

1	Endshield, D-end	11	Kit blower with screws	21	Foot cover seal
2	Endshield, N-end	12	Screws for bearing cover, D-end	22	Side closing seal
3	Stator	13	Encoder cover plate with screws	23	Terminal box support seal
4	Bearing, D-end	14	Adapt. shaft for encoder with screws	24	Blower seal
5	Bearing, N-end	15	Encoder	25	Nuts for tierods with washers
6	Rotor with shaft	16	Tierods	26	Encoder connector
7	Inner bearing cover, D-end	17	IP23 protection cover with screws	27	Lower protection with screws
8	Terminal box	18	Key	28	Washers
9	Terminal board	19	Side closing sheet with screws	29	Encoder flange with screws
10	Terminal box cover with screws	20	Foot cover sheet with screws		

# Motors in brief

## High dynamic performance motors, IP23 series

Size	HDP	IP23 100	IP23 132	IP23 160	IP23 200	IP23 250
Stator	Paint colour shade	Black RAL 9005				
Feet		Integrated in end shields				
	Material	Diecast aluminium alloy			Cast iron	
Bearing end shields	Material	Diecast aluminium alloy			Cast iron	
	Paint colour shade	Black RAL 9005				
Bearings	D-end	6308-2Z/C3	6310-2Z/C3	6312-2Z/C3	6315-2Z/C3	6322-C3/LGHP2
	N-end	6206-2Z/C3	6308-2Z/C3	6309-2Z/C3	6314-2Z/C3	6319-C3/LGHP2
Axially-locked bearings	Inner bearing cover	As standard locked at D-end				
Lubrication		Permanently lubricated shielded bearings			Relubrication. Grease temp range -40 to 150°C	
Terminal box	Material	Aluminum	Aluminum	Steel	Steel	Steel
	Screws	Steel 8.8, zinc electroplated and chromated				
Connections	Cable entries	1 × M50, 1 × M20, 3 × M16		2 × M63, 1 × M20, 1 × M16		Blind plate
	Cable glands	Available on request				
Fan cover	Material	Steel				
	Paint colour shade	Black RAL 9005				
Stator winding	Material	Copper				
	Insulation	Class F				
	Temperature rise	Class F				
	Winding protection	3 × bimetal detectors, 140°C or 3 × PTC thermistors as standard, 140°C				
Rotor winding	Material	Diecast aluminum			Copper	
Balancing method		Half key balancing				
Key ways		Closed keyway				
Heating element 220-240V	On request CE	21W	40W	26W	54W	65W
Heating element 110-120V	On request UL	28W	53W	35W	63W	84W
Enclosure		IP23				
Cooling method		IC 06 - radial cooling				
Ambient conditions	Ambient conditions	0-40°C				
	Altitude conditions	0-1000 meter above sea level				

# Accessories

## Holding brake

As an accessory the HDP motor can be equipped with an electrically driven brake that mechanically acts on the motor shaft. The motor's mechanical brake is intended to be used as a holding brake; whose main function is to lock the motor shaft when the converter is discharged. Upon request, HDP motors can be supplied with the standard brake or the improved brake. The motors equipped with a brake are subject to special speed limitations which are summarized below.

<b>Motor type</b>	<b>Version</b>	<b>Torque (Nm)</b>	<b>Power (W)</b>	<b>Current (A)</b>	<b>Voltage (V)</b>	<b>Max speed (rpm)</b>
CH IP54 (H100)	Standard	55	33	1.38	24VDC	5500
	Improved	80	33	1.38	24VDC	5500
CM IP54 (H132)	Standard	80	33	1.38	24VDC	5500
	Improved	185	67	2.79	24VDC	4000
CN IP54 (H160)	Standard	185	67	2.79	24VDC	4000
	Improved	400	67	2.79	24VDC	4000
CR IP54 (H200)	Standard	400	67	2.79	24VDC	4000
	Improved	800	469	2.13	230VAC	3000
RT IP54 (H250)	Standard	On request	On request	On request	On request	On request
	Improved	On request	On request	On request	On request	On request
VH IP23 (H100)	Standard	80	33	1.38	24VDC	5500
	Improved	125	33	1.38	24VDC	5500
VM IP23 (H132)	Standard	180	67	2.79	24VDC	4000
	Improved	400	67	2.79	24VDC	4000
VN IP23 (H160)	Standard	400	67	2.79	24VDC	4000
	Improved	800	469	2.13	230VAC	3000
VR IP23 (H200)	Standard	800	469	2.13	230VAC	3000
	Improved	1200	884	2.21	400VAC	2300
VT IP23 (H250)	Standard	1200	884	2.21	400VAC	2300
	Improved	2400	On request	On request	400VAC	On request

## Cooling fan

ABB HDP-motors are equipped with an external cooling fan as standard. IP54 versions have an axial cooling fan, IC416 except frame size 250 which have an radial cooling fan, IC06. IP23 versions have an radial cooling fan, IC06. HDP-motors can also be delivered without cooling fan if an separate cooling source will be used. Please check for required air flow/volume from ABB.

Protection	Frame size	Supply voltage	Power (W)	Current (A)	Certification
IP54	CH (H100)	400V 50Hz	53	0.15	CE
		460V 60Hz	70	0.11	CE
		230V 60Hz 1-ph	83	0.37	CE/UL
	CM (H132)	400V 50Hz	110	0.22	CE
		460V 60Hz	200	0.35	CE

# Feedback devices — Connectors —

## Thermal protection — T-box connections

### Feedback devices

ABB HDP-motors can be equipped with different feedback devices for positioning and/or speed control.

The connector type is normally a 12 pin M23 intercontec male connector, IP67 protected. Different encoder types may require another number of pins.

For more information, please contact ABB.

#### Incremental encoders

HTL (10-30V) pulse encoders, output A+A-, B+B-, Z+Z-, 512/1024/2048/4096 ppr

TTL (5V) pulse encoders, output A+A-, B+B-, Z+Z-, 512/1024/2048/4096 ppr

Sin/cos incremental pulse encoder

#### Absolute encoders (SSI, Endat, Hiperface)

Single turn

Multi turn

#### Resolvers

### Connectors and cables

#### Signal connectors<sup>1)</sup>

400014148	loose signal connector 12 pin for encoder HTL-TTL-1Vpp
16091979	loose signal connector 17 pin for absolute encoder

<sup>1)</sup> To be ordered separately.

Encoder cables with motor connector <sup>1)</sup>	Length <sup>2)</sup> [m]
HDP1255L0	5
HDP12510L	10
HDP12515L	15
HDP12520L	20
HDP12530L	30

<sup>1)</sup> To be ordered separately.

<sup>2)</sup> Other lengths available on request.

#### Cable characteristics

Multipolar cable with double shield for mobile application (Al/polyester and copper)
3 pairs AWG 26 and 3AWG 20 single
PVC transparent external sheath (style UL 2095)
Operating temperature +80°C
Working voltage 300V
Capacity: 120 pF/m between wires pairs 20°C
Number of cycles: minimum 3 millions
Minimum bending radius: 65mm
Reference standard: UL 758
Outside diameter: 7.5 ± 0.2mm

### Thermal protection

HDP-motors are equipped with Bimetal detectors, break type (NCC), (3 in series), 140°C, in stator winding as standard. If required, it's possible to replace the bimetal detectors with PTC thermistors (3 in series), 140°C in stator winding.

Other available solutions which can be combined :

- PTC thermistors (3 in series, 120°C & 3 in series, 140°C), in stator winding
- KTY thermistors (3 in series 110°C or 130°C) in stator winding
- PT100 (2- or 3-wire) in stator winding, one per phase

# Total product offering

## Motors, generators and mechanical power transmission products with a complete portfolio of services

**ABB is the leading manufacturer of low, medium and high voltage motors and generators, and mechanical power transmission products. ABB products are backed by a complete portfolio of services. Our in-depth knowledge of virtually every type of industrial process ensures we always specify the best solution for your needs.**

### › Low and medium voltage IEC induction motors

- Process performance motors
- General performance motors
- High voltage cast iron motors
- Induction modular motors
- Slip-ring modular motors
- Synchronous reluctance motors

### › Low and medium voltage NEMA motors

- Steel frame open drip proof (ODP) motors
- Weather protected, water cooled, fan ventilated
- Cast iron frame (TEFC)
- Air to air cooled (TEAAC) motors

### › Motors and generators for explosive atmospheres

- IEC and NEMA motors and generators, for all protection types

### › Synchronous motors

### › Synchronous generators

- Synchronous generators for diesel and gas engines
- Synchronous generators for steam and gas turbines

### › Wind power generators

### › Generators for small hydro

### › Other motors and generators

- Brake motors
- DC motors and generators
- Gear motors
- Marine motors and generators
- Single phase motors
- Motors for high ambient temperatures
- Permanent magnet motors and generators
- High speed motors
- Smoke extraction motors

- Wash down motors
- Water cooled motors
- Generator sets
- Roller table motors
- Low inertia motors
- Traction motors and generators

### › Life cycle services

- Installation and commissioning
- Spares and consumables
- Preventive maintenance
- Predictive maintenance
- Condition monitoring
- On-site and workshop
- Remote troubleshooting
- Technical support
- Engineering and consulting
- Extensions, upgrades and retrofits
- Replacements
- Training
- Service agreements

### › Mechanical power transmission components, bearings, gearings

# Life cycle services and support

## From pre-purchase to migration and upgrades

**ABB offers a complete portfolio of services to ensure trouble-free operation and long product lifetimes. These services cover the entire life cycle. Local support is provided through a global network of ABB service centers and certified partners.**

### Pre-purchase

ABB's front-end sales organization can help customers to quickly and efficiently select, configure and optimize the right motor or generator for their application.

### Installation and commissioning

Professional installation and commissioning by ABB's certified engineers represent an investment in availability and reliability over the entire life cycle.

### Engineering and consulting

ABB's experts provide energy efficiency and reliability appraisals, advanced condition and performance assessments and technical studies.

### Condition monitoring and diagnosis

Unique services collect and analyze data to provide early warnings of problems before failures can occur. All critical areas of the equipment are covered.

### Maintenance and field services

ABB offers life cycle management plans and preventive maintenance products. The recommended four-level maintenance program covers the entire product lifetime.

### Spare parts

Spare parts and support are offered throughout the life cycle of ABB products. In addition to individual spares, tailored spare part packages are also available.

### Repair and refurbishment

Support for all ABB motors and generators and other brands is provided by ABB's global service organization. Specialist teams can also deliver emergency support.

### Migration and upgrades

Life cycle audits determine the optimum upgrades and migration paths. Upgrades range from individual components to direct replacement motors and generators.

### Training

Product and service training courses take a practical approach. The training ranges from standard courses to specially tailored programs to suit customer requirements.

### Specialized support

Specialized support is offered through ABB's global service organization. Local units provide major and minor repairs as well as overhauls and reconditioning.

### Service contracts

Service contracts are tailored to the customer's needs. The contracts combine ABB's entire service portfolio and 120 years of experience to deploy the optimal service practices.
