Course description

INMVD–105
ACS 5000 Air Cooled Medium Voltage Drive Operation and Maintenance

Course goal

The goal of this course is to train the participants in the safe operation, control, configuration, troubleshooting and maintenance of the air cooled ACS 5000.

Learning objectives

Upon completion of this course the participants will be able to:

□ locate the hardware components, to verify and replace drive’s parts and to perform preventive maintenance.
□ use of the available programming and troubleshooting tools is trained by practical operating exercises.

Participant profile

Electricians, technicians and engineers who operate, maintain or troubleshoot the ACS 5000 air cooled drive

Prerequisites

Basic knowledge of AC motors and drives.
Basic knowledge using computers with Windows.

Topics

Generalities
□ Introduction to product
□ AC motor and DTC control

Hardware description (power electronics & control)
□ Component and PCB functions
□ Hardware schematics and electrical drawings
□ PCB settings and configuration

Air cooling system
□ Cooling circuit description
□ Preventive maintenance

Course type and methods

This is an instructor led seminar with hands-on exercises. The language of the course is English.

Course duration

The duration of the course is 3 days.
Minimum 4 participants
Tailor-made and on-site training on request.
