PRODUCT LIFE CYCLE STATUS STATEMENT

ACS1000 air-cooled (Generation 1), ACS1000 water-cooled (Generation 1)

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Current life cycle status
The mentioned product subtypes of ACS1000 drive are in the Limited life cycle phase since 1.1.2021 according to the ABB life cycle management model outlined above.

Life cycle plan
It is planned to keep the mentioned product subtypes in Limited life cycle phase until 31.12.2025.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Product availability in Limited life cycle phase
Manufacturing of these product subtypes has stopped and they are not available for sale.

Recommended actions
Besides the regular maintenance actions it is highly recommended to apply the Life Cycle Upgrade services (Auxiliary power concept upgrade, Main Board Upgrade (AMC34)). By applying these services, full range of life cycle services and support is available (refer to product subtype “ACS1000 Generation 1 after Main Board UG (AMC34)”).

Service availability in Limited life cycle phase
