P290 COURSE DESCRIPTION

MicroSCADA Pro
DMS600 Distribution Management

The aim of this course is to present the MicroSCADA Pro DMS600. Main focus will be on main functions needed and used in a Distribution Management system and the engineering principles of the system.

Objectives
After this course the participant will be able to:
- Describe and use the distribution management system functions
- Install and take the software in to use
- System maintenance and back up

Participant profile
Power distribution system operators and system engineers who are in charge of the system and want to become familiar with DMS600.

Prerequisites
Basic knowledge of power distribution and familiar with computerized systems.

Topics
- DMS600 SW Installation
- User interface introduction
- Main functional modules
- Fault management
- Network analysis
- Switching planning
- Network database engineering
- Integration to MicroSCADA Pro SYS600 data base
