

ABB EQmatic Energy Analyzer for KNX

Energy management is getting smarter

Identify energy guzzlers and reduce energy costs – ABB's EQmatic Energy Analyzer makes it possible. The intelligent solution reads electric, gas, water, heat meters and other sensor data via KNX. It accesses meter data via an intuitive, web-based user interface, which can be flexibly configured to meet specific demands. Energy consumption and cost are getting transparent. The smart load control increases energy efficiency. Learn more at abb.com/buildings
