### ABB i-bus® KNX Switch Actuators

#### Solutions for a smarter building control

Universal solutions for every application. With the ABB i-bus® KNX switch actuator ranges Combi, Standard and Professional, ABB offers you the highest flexibility for the control of smarter industrial, commercial and residential buildings — and always the suitable product. Fast parameterization of the devices is possible with a template function in the ETS.

**ABB i-bus® KNX Combi Switch Actuators**
- Maximum flexibility — ideal for combined control in every room or for a single room.

**ABB i-bus® KNX Standard Switch Actuators**
- Universal switching in any application — this series fulfils all switching requirements in modern commercial projects.

**ABB i-bus® KNX Professional Switch Actuators**
- Designed for reliable switching of high and capacitive loads and extended energy functionality, especially for large commercial buildings.

### Lights, shading – or simply both? ABB i-bus® KNX Combi Switch Actuators

The Combi range complies ABB’s KNX Switch actuators portfolio. The devices combine performance and flexibility with space-saving design. The ABB i-bus® KNX Combi switch actuators are specifically designed to meet the dynamic requirements of residential projects. They offer maximum flexibility by permitting installation and installation modifications thanks to its compact design, high channel density and safely separable switching and shading functions in one device.

#### Highlights
- Customization and shading in the same device
- Health risks, possible in conventional transmitters
- Security: special arrangement to prevent unauthorized access
- Easy of use through intuitive interface
- Enhanced reliability: twice as much space in the distribution board
- Combines switches and sensors in one module
- Easy status identification without bus voltage
- 6A/10A/16A-AC1
- 8/16/24 outputs

#### Service & Diagnostics: easy maintenance via the i-bus tool

#### Switch Actuators are specifically designed to meet the dynamic requirements of residential projects.

---

### The right solution for every application. ABB i-bus® KNX Standard Switch Actuators

The Standard range offers the largest and most comprehensive portfolio of components covering all common switching requirements in today's commercial projects. These devices offer a wide range of outputs and cover all common switching requirements in modern commercial projects.

#### Highlights
- Customization and shading in the same device
- Security: special arrangement to prevent unauthorized access
- Enhanced reliability: twice as much space in the distribution board
- Combines switches and sensors in one module
- Easy status identification without bus voltage
- 6A/10A/16A-AC1
- 2/4/8/12 outputs

#### Product Information:
- Easy status identification without bus voltage
- Enhanced reliability: twice as much space in the distribution board
- Combines switches and sensors in one module
- Easy status identification without bus voltage
- 6A/10A/16A-AC1
- 2/4/8/12 outputs

---

### Reliable switching of high loads - ideal for major building projects. ABB i-bus® KNX Professional Switch Actuators

Reliable switching of high and capacitive loads and enhanced energy management, and the ability to measure, monitor and metering of loads. The ABB i-bus® KNX Professional range of switch actuators for major building projects is an ideal solution for installation in its own category due to its capability and performance.

#### Highlights
- Easy status identification without bus voltage
- Enhanced reliability: twice as much space in the distribution board
- Combines switches and sensors in one module
- Easy status identification without bus voltage
- 6A/10A/16A-AC1
- 2/4/8/12 outputs

#### Product Information:
- Easy status identification without bus voltage
- Enhanced reliability: twice as much space in the distribution board
- Combines switches and sensors in one module
- Easy status identification without bus voltage
- 6A/10A/16A-AC1
- 2/4/8/12 outputs
