# PLC Automation product family

## Overview

1

ABB offers a comprehensive range of scalable PLCs and robust HMI control panels as well as high-availability solutions. Since its launch in 2006, the AC500 PLC platform has achieved significant industry recognition for delivering high performance, quality and reliability.

### Comprehensive range

ABB delivers scalable, flexible and efficient ranges of automation components to fulfill all conceivable automation applications. ABB's automation devices deliver solutions with high performance and flexibility to be effectively deployed within diverse industries and applications including water, building infrastructure, data centers, renewable energy, machinery automation, material handling, marine and more.

### Engineering suite

ABB Automation Builder is the integrated software suite for machine builders and system integrators wanting to automate their machines and systems in a productive way. Combining the tools required for configuring, programming, debugging and maintaining automation projects from a common intuitive interface, Automation Builder addresses the largest single cost element of most of today's industrial automation projects: software.

### Programmable Logic Controllers PLCs

The AC500, AC500-eCo, AC500-S and AC500-XC scalable PLC ranges provide solutions for small, middle and high-end applications. Our AC500 platform offers different performance levels and is the ideal choice for high availability, extreme environments or safety solutions. Our AC500 PLC platform offers interoperability and compatibility in hardware and software from compact PLCs up to high end and safety PLCs.

### Control panels

The CP600-eCo and CP600 HMI control panels offer a wide range of features and functionalities for maximum operability. ABB control panels are distinguished by their robustness and easy usability, providing all the relevant information from production plants and machines at a single touch.

### Automation Builder

Automation Builder integrates engineering and maintenance for PLC, Drives, Motion, HMI and Robotics. Automation Builder complies with the IEC 61131-3 standard offering all 5 IEC programming languages for PLC and drive configuration. In addition, Automation Builder includes continuous function chart, C/C++, extensive function block libraries and powerful embedded simulation and visualization features. Automation Builder supports various languages (English, German, French, Chinese, Spanish) and comes with new libraries, FTP functions, SMTP, SNMP, smart diagnostics and debugging capabilities. Download Automation Builder from [www.abb.com/automationbuilder](http://www.abb.com/automationbuilder).

### AC500-eCo

This compact PLC offers flexible and economical configurations for your modern control system. The ideal choice for smaller applications.

### AC500

Our powerful flagship PLC with a wide range of performance, communications and I/O capabilities for industrial applications. The ideal choice for complex high speed machinery and networking solutions.

### AC500-XC

Extreme Condition PLC variant of the AC500 platform with extended operating temperature, immunity to vibration and hazardous gases, use at high altitudes and in humid conditions.

### AC500-S

This safety PLC (SIL3, PL e) is designed for safety applications involved in factory or machinery automation area. The ideal choice to implement and manage complex safety solutions.

### CP600-eCo

The economic control panel series offers touch screen graphic displays from 4.3" up to 10.1". The user-friendly configuration software PB610-B Panel Builder 600 Basic provides the most commonly used HMI functions. Comprehensive sets of graphic symbols are available to support the design of tailor-made HMI solutions.

### CP600

This control panel series offers a wide range of touch screen graphic displays from 4.3" up to 15". The user-friendly configuration software PB610 Panel Builder 600 provides state-of-the-art HMI functions. Comprehensive sets of graphic symbols are available to support the design of tailor-made HMI solutions. CP600-WEB panels are available for the visualization of HMI applications provided by the AC500 WebServer. They include the Microbrowser instead of an HMI application.

(7) Project Version Control

**Discover engineering productivity when engineering your discrete automation solutions.**

Automation Builder is ABB's integrated programming, maintenance and simulation environment for PLCs, safety, robots, motion, drives and control panels.

Automation Builder combines the proven ABB tools Robot-Studio, Drive Manager, Mint WorkBench, Panel Builder and succeeds Control Builder Plus.

**The Automation Builder minimizes your efforts for project code and data administration.**

Improve your productivity with seamless engineering, common data storage, a single project archive, time-saving library blocks for device integration, and one common software installer.

Reduce engineering efforts and maintenance costs using easy-to-use libraries for wind, water, solar, drives, motion, robotics and safety applications.

Benefit from the simplicity of IEC 61131-3, PLCopen, C/ C++, RAPID and MINT programming languages.

Speed up your project with the powerful ECAD and MS EXCEL® interfaces of Automation Builder.

**Simplified diagnostics and maintenance reduce downtime.**

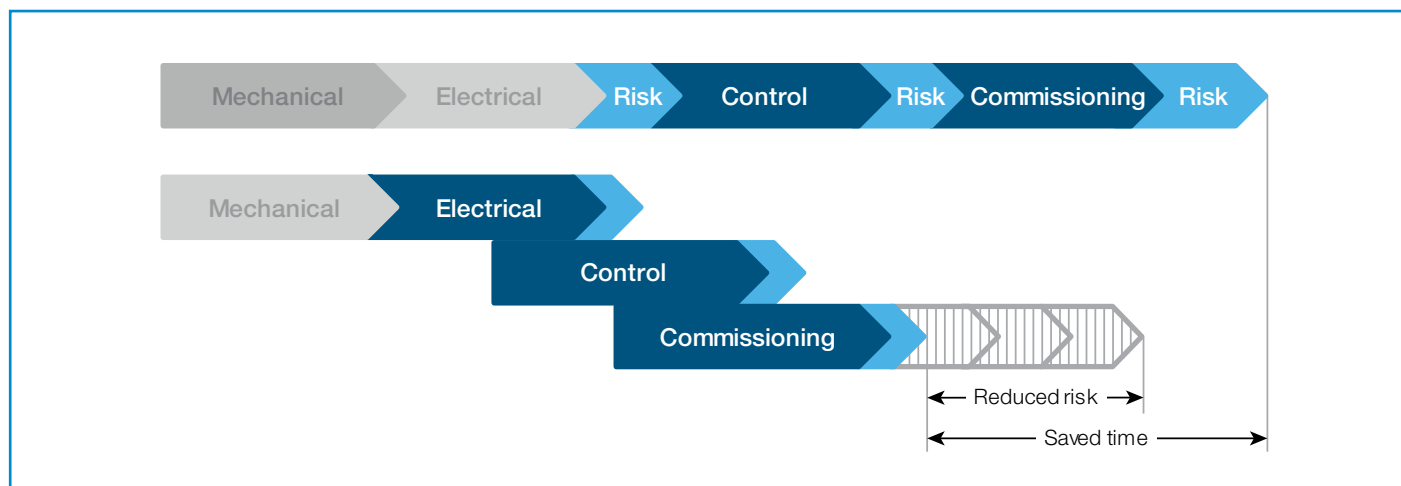

Automation Builder is the perfect software suite for the configuration and programming of various ABB controller families in one single project.

Safe and restore your applications with a consistent joint backup.

**Download Automation Builder from [www.abb.com/automationbuilder](http://www.abb.com/automationbuilder).**

Familiarize with Automation Builder using a 30 days test license.

After having tried and tested with your individual applications, you can use the free Automation Builder Basic or purchase the Automation Builder Standard or Premium.

Streamline and simplify your engineering process: Reduce risk and save time.

# PLC Automation product family

## AC500 libraries

1

A good investment for system integrators and end-users, AC500 libraries improve stability while reducing warranty costs and service. Library packages contain easy-to-use examples for minimal programming effort and quick implementation of complex and demanding applications.

1 Motion control library

2 Solar library

3 Water library

4 Temperature control library

AC500 libraries deliver the seamless integration of drives, HMI and supervisory systems for the quick and easy building and commissioning of automation solutions. AC500 solution libraries by ABB are maintained to ensure that your programs can also be used with less risk.

**Motion control library**

Library package for decentral, central and coordinated motion according to the PLCopen® standard.

**Solar library**

Library package for solar trackers increasing energy efficiency, providing quick commissioning and excellent positioning accuracy.

**Water library**

Library package with energy efficiency functionalities offering quick commissioning of water applications, such as pump stations with remote communication.

**Drive integration library**

Library package for the quick integration of ABB ACS drives using different fieldbusses – free-of-charge included in Automation Builder.

**Temperature control library**

Library package for the advanced PID temperature control of demanding applications, for example extrusion.

## PLCs at a glance...

1

AC500 Programmable Logic Controllers with scalable, state-of-the-art technology for better performance.

Standard industrial communication fieldbus, network and protocols supported by the 'One Platform' solution make the AC500 the perfect automation solution in even the most

demanding environments. Flexible and scalable superior CPUs deliver performance whenever and wherever you need it.

(1) Requires Library PS552-MC-E.

(2) AC500-S and AC500-S-XC are extension CPU modules. They require an AC500 or AC500-XC CPU to operate. The latter supports all communication interfaces.

# PLC Automation product family

## AC500-eCo

### 1 AC500-eCo central processing unit (CPU)

- Different memory options
- Integrated communication option.

### 2 S500-eCo I/O modules

- Up to 10 expansions
- Decentralized extension available.

### 3 Terminal blocks

- Three types of pluggable terminal blocks available.

# PLC Automation product family AC500 and AC500-XC

## 1 Terminal base

- Common for all AC500 CPU types
- For 1, 2 or 4 communication modules
- With serial interfaces.
- With 1 or 2 Ethernet interfaces

## 2 Communication modules

- For PROFIBUS DP®, Ethernet, Modbus TCP, EtherCAT®
- CANopen®, PROFINET® IO or serial programmable
- Up to 4 pluggable.

## 3 AC500 central processing unit (CPU)

- Different performance, memory, network, operating conditions options
- Integrated communication.

## 4 S500 I/O modules

- Up to 10 expansions
- Decentralized extension available.

## 5 Terminal units

- Up to 10 terminal units
- Decentralized extension available.

# PLC Automation product family

## AC500-eCo system characteristics

1

Locally, AC500-eCo CPUs are expandable with up to 10 I/O modules. AC500-eCo CPUs with different performance levels are available.

1 AC500-eCo CPUs are locally expandable with up to 10 I/O modules (standard S500 and S500-eCo I/O modules can be mixed).

2 Wall mounting

3 SD-card adapter

4 SD-card

5 Adapter with realtime clock

6 Adapter with COM2 & realtime clock

7 Adapter with COM2

8 Terminal blocks

9 RS485 isolator for COM1

10 COM1 USB

11 COM2 USB programming cable

AC500-eCo Starter kit. For more information, see page 149

## AC500 PM595 Controller system characteristics

1

The flagship of the AC500 platform, the AC500 PM595 Controller, was designed as scalable, flexible and efficient as the entire AC500 range.

With the AC500 CPU PM595, ABB launched a new core for machine control applications. Its high-performance processor with generous memory offers performance, security and reliability for the upcoming challenges of automation applications.

A variety of connectivity capabilities, integrated safety and utilizability even under rough environment provide machine builders with valuable benefits when performing their automation tasks.

**1** AC500 CPUs are locally expandable with up to 10 I/O modules (standard S500 and S500-eCo I/O modules can be mixed).

**2** CPU with integrated connectivity and terminal base

**3** Communication module  
Up to 2 modules for multiple combinations to communicate with nearly everything

**4** S500 Terminal unit

**5** S500 I/O module

**5** S500-eCo I/O module

**6** SD-card

**7** Battery

**8** Pluggable marker holder for I/O modules with template

## Condition monitoring system CMS based on AC500

1

### Predictable performance for your operations

Optimize your assets with a condition monitoring system (CMS) based on the proven AC500 platform. The new FM502 module can help you to improve your operations resulting in greater efficiency and higher reliability while minimizing service and operating costs.

### Add predictable performance and productivity

The new CMS module brings further reliability and easy integration with all kinds of machinery systems, enabling precise management of the real-time condition of your operation. This transparency takes your business and productivity to a new level with more efficient machines, predictable performance and significant reduction in maintenance costs.

No matter whether as stand-alone condition monitoring or integrated into machine or process control, the module is perfectly suited to build optimized, self-analyzing automation solutions that simultaneously perform condition monitoring, control, protection, safety and data logger functions with one controller. The fast data logger function also contributes to consistent high quality production, due to the possibility to combine control and production information directly.

CMS also protects against machine failures, unforeseen sudden damage, incorrect installation, and reduces maintenance and wear. Virtually no unscheduled downtimes boost plant availability and reliability.

### Advantages

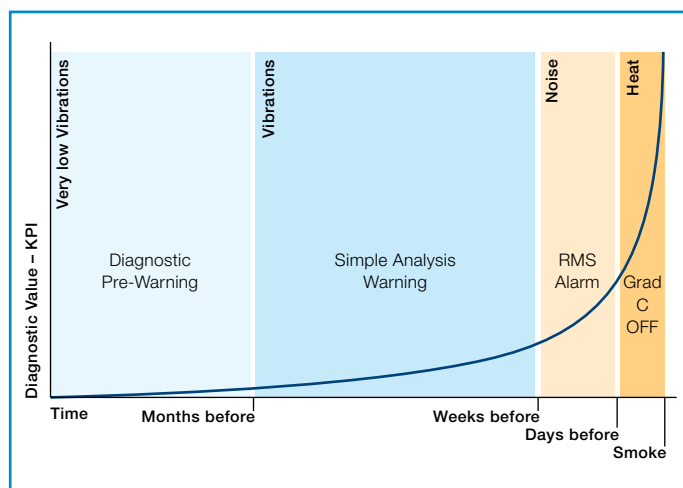

- Planned maintenance rather than spontaneous repair ensures predictable performance
- Approaching damage is identified very early
- Protection against spontaneous failures and operation in critical conditions
- Reduction of costs in maintenance and lost production time
- Plant availability is increased
- Optimum utilization of the aggregates until real end of life
- Simple to use, maintain, adapt or expand

### AC500 + CMS = increased machine efficiency

All based on the AC500 platform modularity provides ultimate flexibility: Communication and I/O modules can be added and combined with Safety.

### Expandable, robust and proven

- Stand-alone CMS or control integrated
- Expandable by AC500 communication modules and AC500 I/O modules
- Proven and future proof, as based on AC500 platform
- Extreme conditions XC version available
- Fast data logger, e. g. for production quality
- Fast protection in parallel to condition monitoring

- 1** Terminal base: TF501 or TF521
- 2** Accomodating: 0 or 2 communication modules
- 3** PM592 CPU
- 4** FM502 CMS module
- 5** Expandable by I/O terminal units
- 6** Expandable by further I/O modules

# PLC Automation product family

## Extreme conditions

1

PLC AC500-XC – the rugged variant of AC500 for extreme indoor and outdoor conditions.

The PLC AC500-XC is reliable, functionally safe and operational even under rough environmental conditions.

1 Terminal base

2 Extreme conditions communication module

3 Extreme conditions CPU

4 Extreme conditions CPU with integrated connectivity and terminal base

5 Extreme conditions S500 terminal unit

6 Extreme conditions S500 I/O module

**Operation in extremely humid environments**

- Increased resistance against 100 % humidity and condensation.

**Extended operating temperature**

- -40 °C up to +70 °C operating temperature.

**Reliable in high altitudes**

- Operation in altitudes up to 4000 m above sea level or air pressures up to 620 hPa.

**Extended immunity to corrosive gases and salt mist**

- G3, 3C2 immunity
- Salt mist EN 60068-2-52 / EN 60068-2-11.

**Extended immunity to vibration**

- 4 g rms random vibration up to 500 Hz
- 2 g sinusoidal vibration up to 500 Hz.

**Extended EMC requirements**

- EN 61000-4-5 surge immunity test
- EN 61000-4-4 transient / burst immunity test.

# PLC Automation product family

## Functional Safety

1

AC500-S Safety PLC is the solution for complex machine safety applications requiring maximum reliability, efficiency and flexibility.

This safety PLC protects people, machines and processes, the environment and investments - the ideal choice for wind turbine, crane, hoist and robot applications.

1 Safety CPU

2 S500 Safety I/O module

3 Safety terminal unit

**Better integration and ease of programming**

Featuring a consistent look and feel across the entire range, the AC500 is the PLC of choice for applications where uncompromised flexibility, comprehensive integration and seamless communication are a must. Automation Builder seamlessly integrates your safety application in ABB PLC, Safety, Drives, Motion, HMI and Robotics. Through integrated standard languages, such as IEC 61131-3, Automation Builder is easy to use thus allowing you to get started in virtually no time at all. And what is more: intuitive system configuration using one single tool ensures optimal transparency.

The AC500-S Safety PLC, ABB's latest addition to the AC500 family, facilitates the implementation of even most complex safety applications. Support of safety-relevant calculations, such as COS, SIN, TAN, ASIN, ACOS and LOG makes the AC500-S the ideal solution for crane engineering, wind power generation, robotics and hoisting applications. Safety programming with Structured Text (ST) and full support for Function Block Diagram (FBD) and Ladder Diagram (LD) programming gives you greater flexibility and simplifies safety application development. The AC500-S Safety PLC is also available in a version for extreme conditions.

# PLC Automation product family

## CP600-eCo and CP600 control panels

1

With comprehensive but easy-to-use functionalities, ABB control panels stand out from competitor products. At one single touch, they intuitively provide operators with tailor-made operational information for production plants and machines. CP600-eCo / CP600 control panels make machine operation efficient, predictable and user-friendly.

### Build effective graphic interfaces with Panel Builder 600 - efficient representation of your information

Automation Builder programming station

## PLC Automation website – online tools

1

The [www.abb.com/plc](http://www.abb.com/plc) website is a mine of information on our products and documentation.

The screenshot shows the ABB PLC Automation website homepage. At the top, there is a navigation bar with 'HOME', 'OFFERINGS', and 'PLC AUTOMATION'. The ABB logo is in the top right corner with the tagline 'Power and productivity for a better world'. Below the navigation bar, the main heading is 'PLC Automation'. A search bar is visible on the right. The main content area features a large image of PLC hardware and a call to action: 'Are you looking for support or purchase information? Contact us'. Below this is a section titled 'Our offering' with four categories: 1. Programmable Logic Controllers PLCs (image of PLC rack), 2. Automation Builder (image of a computer monitor), 3. Control panels (image of several control panels), and 4. Legacy products (image of two legacy PLC units). Below 'Our offering' is a 'Highlights' section with three buttons: 'Latest product news', 'Main catalog', and 'Follow us' (with a YouTube icon). The 'Industries and applications' section features seven images representing different industries: Cranes, Food and beverage, HVAC, Marine, Mining, and Plastics and rubber, with a separate image for 'Water and wastewater'. The 'Services' section includes buttons for 'Documents and downloads', 'Application examples', 'Frequently asked questions', 'Training locations', 'Training courses', 'Business Online (spare parts)', and 'Success stories'.

**1** Programmable Logic Controllers PLCs

- AC500-eCo (CPUs, S500-eCo I/O modules, Accessories)
- AC500 (CPUs, Communication modules, Communication interface modules, S500 I/O modules, Accessories, Condition Monitoring CMS)
- AC500-XC (CPUs, Communication modules, Communication interface modules, S500 I/O modules, Accessories, Condition Monitoring CMS)
- AC500-S (CPUs, S500 I/O modules)

**2** Automation Builder engineering suite

- Download link [www.abb.com/automationbuilder](http://www.abb.com/automationbuilder)

**3** Control panels

- CP400 (Devices, Software, Accessories)
- CP600-eCo (Devices, Software, Accessories)
- CP600 (Devices, Software, Accessories)

**4** Legacy products

- AC31 and previous series
- CP500
- Wireless products

**5** Highlights

- Latest product news
- Main catalog
- YouTube

**6** Industries and applications

**7** Services

- Documents and Downloads
- Application examples (for Automation Builder programming)
- FAQs
- Training locations and courses
- Business Online (spare parts)
- Success Stories

**8** Related products (Drives, Drives channel network, Motion control, Robotics)

**9** Contact information for your country

The screenshot displays a web interface with two main sections. The top section, titled '8 Related products', features four buttons: 'Drives', 'Drives channel network', 'Motion control', and 'Robotics'. Below this is a section titled '9 Contact information' with the heading 'What would you like to do?'. It includes a blue button labeled 'I need more information' and a small 'ABB Sales' icon. The primary focus is a 'Submit your inquiry' form. This form has a yellow warning box that says 'Please select country from the list below'. It contains a 'Country' dropdown menu, and input fields for 'Name', 'Company', 'E-Mail', and 'Phone'. A large text area is provided for 'Your message'. At the bottom of the form are links for 'Privacy policy', 'Cancel', and 'Send message'. To the right of the form, the text 'Your local ABB Sales Team' is displayed above another 'Please select country from the list' prompt. A 'Close' button is located in the bottom right corner of the page.

## Key features

2

Stay in control of your project: Automation Builder integrates engineering tools for PLCs, safety, robots, motion, drives and control panels.

Reduce risk and save time: Automation Builder integrates products into solutions that create value for your customers.

Build your distinct solution: Automation Builder is open for your specific products and communication technology.

Connect to best in class tools: Automation Builder enables you to adapt the tool chain to your needs and workflows.

### Automation Builder Engineering Suite

- Engineering Productivity and Maintenance for PLCs, safety, robots, motion, drives and control panels.
- Supports IEC61131-3, CFC, C/ C++. Optional: MINT, Rapid for motion and robotics applications.
- Language packs for English, German, Chinese, Spanish, French

# AC500-eCo

## Key features

3

- Up to 10 I/O modules connected to the CPU
- Compatible with all standard I/O modules (S500 and S500-eCo)
- Digital I/O module with configurable I/O available

High performance variant with large memory available

- Three different types of terminal blocks available
- Integrated onboard I/O
- AC versions with integrated power supply

Comprehensive communication options:

- Ethernet for communication and web server for user defined visualization
- Up to two serial ports for decentralized I/O and communication

# AC500-eCo

## Ordering data

PM554

### AC500-eCo CPUs

- 1 RS485 serial interface (2nd is optional)
- Centrally expandable with up to 10 I/O modules (standard S500 and/or S500-eCo modules can be mixed)
- Optional SD card adapter for data storage and program backup
- Variants with integrated Ethernet (Ethernet includes web server)
- Minimum cycle time per instruction: Bit 0.08 µs, Word 0.1 µs, Float-point 1.2 µs.

# AC500-eCo

## Ordering data

FM562

### Positioning module

- For central expansion of the AC500 or AC500-eCo CPUs
- For decentralized expansion in combination with communication interface modules CI50X-PNIO or CI54X-DP
- The FM562 module provides Pulse Train Outputs for 2 axes. Profile generator integrated.

| Number of axis | Input signal                       | Output signal                      | Terminal block required |          | Type  | Order code      | Price | Weight (1 pce) kg |
|----------------|------------------------------------|------------------------------------|-------------------------|----------|-------|-----------------|-------|-------------------|
|                |                                    |                                    | 9 poles                 | 11 poles |       |                 |       |                   |
| 2              | 4 digital inputs 24 V (2 per axis) | 4 pulse outputs RS422 (2 per axis) | 1                       | 1        | FM562 | 1SAP233100R0001 |       | 0.15              |

Terminal blocks (9 or 11 poles) are necessary for each S500-eCo I/O. The terminal blocks must be ordered separately. Library PS552-MC-E is required for programming this module.

(1) Real-time clock requires optional TA561-RTC or TA562-RS-RTC.

(2) COM2 requires TA562-RS-RTC or TA562-RS.

# AC500-eCo

## Technical data

### Digital S500-eCo I/O modules

| Type  | DI561 | DI562 | DI571 | DI572 | DO561   | DO562   |
|---|-------|-------|-------|-------|---------|---------|
| Supply voltage  | -     | -     | -     | -     | 24 V DC | 24 V DC |
| Current consumption on UP<br>Max. typ. (without load current) | -     | -     | -     | -     | 0.005 A | 0.005 A |

#### Number of channels per module

| Digital                            | inputs  | 8 | 16 | 8 (AC) | 16 (AC) | -          | -          |
|------------------------------------|---------|---|----|--------|---------|------------|------------|
|                                    | outputs | - | -  | -      | -       | 8          | 16         |
| Configurable as Input or Output DC |         | - | -  | -      | -       | -          | -          |
| Relay / Transistor                 |         | - | -  | -      | -       | Transistor | Transistor |

#### Additional configuration of channels as:

|              |    |  |  |  |  |                |
|--------------|----|--|--|--|--|----------------|
| Fast Counter | no |  |  |  |  | not applicable |
|--------------|----|--|--|--|--|----------------|

#### Digital inputs

|                      |                    |  |                         |  |   |   |
|----------------------|--------------------|--|-------------------------|--|---|---|
| Input signal voltage | 24 V DC            |  | 100-240 V AC            |  | - | - |
| Input time delay     | typically 4...8 ms |  | typically 15 ms / 30 ms |  | - | - |

#### Input current per channel

|                  |          |                |   |        |   |   |
|------------------|----------|----------------|---|--------|---|---|
| At Input voltage | 24 V DC  | typically 5 mA | - | -      | - | - |
|                  | 5 V DC   | typically 1 mA | - | -      | - | - |
|                  | 15 V DC  | > 2.5 mA       | - | -      | - | - |
|                  | 30 V DC  | < 8 mA         | - | -      | - | - |
|                  | 40 V AC  | -              | - | < 3 mA | - | - |
|                  | 164 V AC | -              | - | > 6 mA | - | - |

#### Output current

|  |   |   |   |   |                             |     |
|--|---|---|---|---|-----------------------------|-----|
| Nominal current per channel                        | - | - | - | - | 0.5 A at UP = 24 V          | -   |
| Maximum (total current of all channels)            | - | - | - | - | 4 A                         | 8 A |
| Residual current at signal state 0                 | - | - | - | - | < 0.5 mA                    | -   |
| Demagnetization when switching off inductive loads | - | - | - | - | must be provided externally | -   |

#### Switching frequency

|   |   |   |   |   |                           |   |
|---|---|---|---|---|---------------------------|---|
| For resistive load                                | - | - | - | - | limited by CPU cycle time | - |
| For inductive load                                | - | - | - | - | max. 0.5 Hz               | - |
| For lamp load                                     | - | - | - | - | max. 11 Hz at max. 5 W    | - |
| Short circuit / overload proofness                | - | - | - | - | no                        | - |
| Overload indication (I > 0.7 A)                   | - | - | - | - | no                        | - |
| Output current limiting                           | - | - | - | - | no                        | - |
| Proofness against reverse feeding of 24 V signals | - | - | - | - | no                        | - |

#### Contact rating

|                          |   |   |   |   |   |   |
|--------------------------|---|---|---|---|---|---|
| For resistive load, max. | - | - | - | - | - | - |
| For inductive load, max. | - | - | - | - | - | - |
| For lamp load            | - | - | - | - | - | - |

#### Lifetime (switching cycles)

|                     |   |   |   |   |   |   |
|---------------------|---|---|---|---|---|---|
| Mechanical lifetime | - | - | - | - | - | - |
| Lifetime under load | - | - | - | - | - | - |

#### Maximum cable length for connected process signals

|       |            |       |  |  |       |  |
|-------|------------|-------|--|--|-------|--|
| Cable | shielded   | 500 m |  |  |       |  |
|       | unshielded | 300 m |  |  | 150 m |  |

#### Potential isolation

## Technical data

### FM562 positioning module

The FM562 module contains Pulse Train Outputs for 2 axes. Profile generator for simple motion control tasks are integrated. The RS422 outputs allow a direct connection to Stepper- or Servo drives. Function blocks in PLCopen® motion control style allow the integration of the module in an application. These function blocks are contained in the library PS552-MC-E.

## System data

### Environmental conditions

#### Process and supply voltages

|              |                                     |  |
|--------------|-------------------------------------|--|
| 24 V DC      | Process and supply voltage          | 24 V DC (-15 %, +20 % without ripple)    |
|              | Absolute limits                     | 19.2...30 V inclusive ripple             |
|              | Ripple                              | < 5 %                                    |
|              | Protection against reverse polarity | 10 s                                     |
| 120 V AC     | Line voltage                        | 120 V AC (-15 %, +10 %)                  |
|              | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)   |
| 230 V AC     | Line voltage                        | 230 V AC (-15 %, +10 %)                  |
|              | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)   |
| 120–240 V AC | Wide-range supply                   |  |
|              | Line voltage                        | 102...264 V / 120...240 V (-15 %, +10 %) |
|              | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)   |

#### Allowed interruptions of power supply

|           |              |   |
|-----------|--------------|---|
| DC supply | Interruption | < 10 ms, time between 2 interruptions > 1 s, PS2  |
| AC supply | Interruption | < 0.5 periods, time between 2 interruptions > 1 s |

**Important:** Exceeding the maximum power supply voltage (>30 V DC) for process or supply voltages could lead to unrecoverable damage of the system. The system could be destroyed. The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2. For the supply of the modules, power supply units according to PELV specifications must be used.

#### Climatic conditions

|              |                      |  |
|--------------|----------------------|--|
| Temperature  | Operation            | 0...60 °C (horizontal mounting of modules)<br>0...40 °C (vertical mounting of modules and output load reduced to 50 % per group) |
|              | Storage              | -40...+70 °C   |
|              | Transport            | -40...+70 °C   |
| Humidity     | Without condensation | Max. 95 %  |
| Air pressure | Operation            | > 800 hPa / < 2000 m   |
|              | Storage              | > 660 hPa / < 3500 m   |

#### Electromagnetic Compatibility

|   |  |
|---|--|
| Radiated emission (radio disturbances)              | Acc. to IEC61000-6-4                       |
| Conducted emission (radio disturbances)             | Acc. to IEC61000-6-4                       |
| Electrostatic discharge (ESD)                       | Acc. to EN 61000-4-2, zone B, criterion B  |
| Fast transient interference voltages (burst)        | Acc. to EN 61000-4-4, zone B, criterion B  |
| High energy transient interference voltages (surge) | Acc. to EN 61000-4-5, zone B, criterion B  |
| Influence of radiated disturbances                  | Acc. to IEC 61000-4-3, zone B, criterion A |
| Influence of line-conducted interferences           | Acc. to IEC 61000-4-6, zone B, criterion A |

In order to prevent operating malfunctions, it is recommended, that the operating personnel discharge themselves prior to touching communication connectors or perform other suitable measures to reduce effects of electrostatic discharges. The connector of the I/O-Bus must not be touched during operation.

#### Mechanical data

|                      |                             |  |
|----------------------|-----------------------------|--|

| <a href="#">System data</a>    | <a href="#">4/84</a> |

# AC500

## Key features

4

A high performance PLC:

- Highly modular
- From 8 to +80 000 I/Os
- More communication possibilities (Ethernet, Internet, PROFINET®, PROFIBUS®, Modbus®, CANopen®, EtherCAT® ...)

Common AC500 platform benefits: Automation Builder engineering suite, I/O modules, scalable and flexible

- Eight programming languages available (five IEC61131-3, CFC, C-code and C++)
- Data logging
- SD card for program back-up
- High Availability (HA) option
- Screw or spring terminal for I/Os
- Extensive programming libraries

### AC500 CPUs

- 2 internal serial interfaces, RS232 / RS485 configurable
- Display and 8 function keys for diagnosis and status
- Centrally expandable with up to 10 I/O modules, 320 I/Os (S500 and/or S500-eCo modules allowed)
- Simultaneous operation of up to 4 external communication modules in any desired combination
- Optional SD card for data storage and program backup
- Can also be used as slave on PROFIBUS® DP, DeviceNet or CANopen® via FieldBusPlug, CANopen® also using CM588 slave communication module
- Ethernet version provides web server and IEC 60870-5-104 remote control protocol.

### AC500 CPU PM595

- 2 Ethernet interfaces with integrated switch and software configurable protocol (PROFINET, EtherCAT (4))
- 2 independent Ethernet interfaces
- 2 serial interfaces, RS232 / RS485 configurable
- Provides web server and IEC 60870-5-104 telecontrol protocol
- Centrally expandable with up to 10 I/O modules (S500 and/or S500-eCo modules allowed)
- Simultaneous operation of up to 2 external communication modules in any desired combination

| Program memory<br>MB | Cycle time in $\mu$ s<br>per instruction min.<br>Bit/Word/Float. point | Integrated communication                                       | Type             | Order code      | Price | Weight<br>(1 pce)<br>kg |

(1) Ethernet communication.

(2) Provides integrated web server and IEC 60870-5-104 remote control protocol on each interface independently.

(3) Provides integrated 4 GB flashdisk for user data storage and data logging.

(4) Availability on demand.

(5) Only to be used with dedicated terminal base TB523-2ETH.

# AC500

## Ordering data

TB511-ETH

TB541-ETH

### Terminal base

- For mounting and connection of the CPUs and communication modules, not needed for PM595
- 1 to 4 plug-in communication modules
- Connection for communication coupler integrated in the CPU
- I/O interface for direct connection of up to 10 expansion modules
- Fieldbus-neutral FieldBusPlug-Slave interface not for TB523-2ETH
- Connection COM1: 9-pole pluggable terminal block
- Connection COM2: 9-pole Sub-D (not for TB523-2ETH).

| Number of coupler slots | Connection for coupler integrated in the CPU | Type           | Order code      | Price | Weight (1 pce)<br>kg |
|-------------------------|--|----------------|-----------------|-------|----------------------|
| 1                       | Ethernet RJ45                                | TB511-ETH      | 1SAP111100R0270 |       | 0.215                |
| 2                       | Ethernet RJ45                                | TB521-ETH      | 1SAP112100R0270 |       | 0.215                |
| 2                       | 2x Ethernet RJ45                             | TB523-2ETH (1) | 1SAP112300R0277 |       | 0.250                |
| 4                       | Ethernet RJ45                                | TB541-ETH      | 1SAP114100R0270 |       | 0.215                |

Note: These TBs are compatible with previous AC500 CPU versions (R01xx) and new ones (R02xx).  
(1) Can only be used together the PM591-2ETH.

FM502-CMS

TF501-CMS

TF521-CMS

### AC500 Condition Monitoring CMS

- PLC integrated condition monitoring and fast protection for high frequency signals (vibration, current, voltage, speed/encoder)
- FM502-CMS module needs function module terminal base TF5x1 for direct interfacing to CPU, communication couplers, other I/O
  - for stand-alone or control/safety integrated condition monitoring
- PM592 CPU to be used on same TF5x1 for data storage and signal processing or communication
  - C-code interface for own complex diagnosis algorithms, 4GB Flash disk for raw fingerprints and indicator trending
- FM502-CMS module:
  - 16 fast, precise analog inputs, all synchronously sampled; configurable as IEPE or +-10V
  - individual measurement configuration (start, stop, trigger) per channel
  - per channel up to 50ksamples/s and 24bit ADC resolution, adjustable sampling
  - encoder inputs (5V or 24V) up to 300kHz counter; 12 modes, incl. absolute SSI (1MHz)
  - fast data logging, compact WAV-Files delivered automatically to CPU, incl. synchronized encoder signal if configured
  - analogue values always available for fast protection in I/O image of CPU
- Included in Automation Builder: Configuration, libraries for CMS control and wav file handling, examples
- Available download package: Signal processing library, example programs with simple diagnosis, logging and automated triggering (2)

DA501

### Analog/digital mixed I/O

Standard I/O module with high functionality:

- 16 digital input or 16 digital output channels
- 8 configurable In/Output channels
- first two inputs are also usable as high-speed counter (up to 50 kHz) together with AC500 CPU, CS31 or CI5xx communication interface modules.
- 4 independent analog input channels configurable for voltage, current, 12 bit + sign, 1-2 wire connection
- Galvanic isolation per module
- Compatible with all CI5xx modules.

CD522

- DC541 occupies one communication module slot on the AC500 CPU terminal base, no terminal block required
- Usable with all CI5xx modules.

| Functionality                                | Number of | Input signal | Output type | Output signal  | Terminal unit | Type         | Order code      | Price | Weight<br>(1 pce)<br>kg |

## Technical data

### CD522 encoder module

The CD522 module offers accuracy and dynamic flexibility for a customized solution. It has two independent encoder inputs onboard and is easily configured using the Automation Builder software for 10 different operation modes and for frequencies up to 300 kHz (depending on CPU cycle time). The CD522 module also integrates outputs for pulses and for PWM as well as normal inputs and outputs, depending on selected encoder mode.

## Technical data

### Analog/digital mixed I/O expansion modules

For all modules: max cable length for connected process signals is 1000 m for shielded cable and 600 m for unshielded ones.  
For all Input modules, the signal resolution for channel configuration is: -10...+10 V: 12 bit + sign; 0...10 V, 0...20 mA, 4...20 mA: 12 bits.

## Technical data

### DC541-CM interrupt I/O and fast counter module

In the operating mode counter, the channels can be configured as follows:

Input, Output, 32-bit up/down counter (uses C0...C3) as a 32-bit counter without limit, 32-bit periodic counter as a 32-bit counter with a limit, limiter for a 32-bit counter (limit channel 0), 32-bit up counter (forward counter) with the frequencies 50 kHz, 5 kHz and 2.5 kHz, pulse-width modulation (PWM) with a resolution of 10 kHz, time and frequency measurement, frequency output.

## Technical data

### AC500 Condition Monitoring CMS: FM502-CMS

The FM502-CMS function module offers precision and dynamic flexibility for customized solutions in condition monitoring, precise measurement or fast data logging applications. It has 16 fast, precise and synchronized analog inputs with 50k Samples/s (SPS), 24bit ADC resolution, completed with encoder inputs (incremental or absolute) with counter and additional DI and DC inputs/outputs onboard. It is easily configured using the Automation Builder software and the special libraries. Overall it has 12 different operation modes. One FM502 function module can be placed on the right side of PM592-ETH CPU with a special function module terminal base TF5x1, to interface directly to the CPU. While long measurements can be flexibly configured, started and stopped, all inputs are available in the I/O Image of CPU for immediate use (measurement, protection, control, ...)

(1) Plug-in terminal block included.

(2) 10 / 100 Mbit/s, full/half duplex with auto-sensing, 2-port switch integrated.

# AC500

## Technical data

### Communication interface modules

For all modules: max cable length for connected process signals is 1000 m for shielded cable and 600 m for unshielded ones.  
For all Input modules, the signal resolution for channel configuration is: -10...+10 V: 12 bits + sign; 0...10 V, 0...20 mA, 4...20 mA: 12 bits.  
Temperature: 0.1 °C.

| Type   | DC551-CS31   | CI590-CS31-HA (1)                                 | CI592-CS31  |

# AC500

## System data

### Operating and ambient conditions

#### Voltages according to EN 61131-2

|  |                                     |  |
|--|-------------------------------------|--|
| 24 V DC  | Process and supply voltage          | 24 V DC (-15 %, +20 % without ripple)                          |
|  | Absolute limits                     | 19.2...30 V inclusive ripple                                   |
|  | Ripple                              | < 5 %  |
|  | Protection against reverse polarity | 10 s   |
| 120 V AC   | Line voltage                        | 120 V AC (-15 %, +10 %)  |
|  | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)                         |
| 230 V AC   | Line voltage                        | 230 V AC (-15 %, +10 %)  |
|  | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)                         |
| 120-240 V AC   | Wide-range supply                   | -  |
|  | Line voltage                        | 102...264 V / 120...240 V (-15 %, +10 %)                       |
|  | Frequency                           | 47...62.4 Hz / 50...60 Hz (-6 %, +4 %)                         |
| Allowed interruptions of power supply acc. to EN 61131-2 | DC supply                           | Interruption < 10 ms, time between 2 interruptions > 1 s, PS2  |
|  | AC supply                           | Interruption < 0.5 periods, time between 2 interruptions > 1 s |

**Important:** Exceeding the maximum power supply voltage (> 30 V DC) for process or supply voltages could lead to unrecoverable damage of the system. The system could be destroyed.

|              |           |  |
|--------------|-----------|--|
| Temperature  | Operation | 0...60 °C (horizontal mounting of modules)<br>0...40 °C (vertical mounting of modules and output load reduced to 50 % per group) |
|              | Storage   | -40...+70 °C   |
|              | Transport | -40...+70 °C   |
| Humidity     | Operation | Max. 95 %, without condensation  |
| Air pressure | Operation | > 800 hPa / < 2000 m   |
|              | Storage   | > 660 hPa / < 3500 m   |

### Creepage distances and clearances

| Insulation Test Voltages, Routine Test, according to EN 61131-2  |              | High voltage pulse 1.2/50 µs | AC voltage during 2 seconds |
|--|--------------|------------------------------|-----------------------------|
| Circuits against other circuitry   | 230 V        | 2500 V                       | 1350 V                      |
|  | 120 V        | 1500 V                       | 820 V                       |
|  | 120...240 V  | 2500 V                       | 1350 V                      |
| 24 V circuits (supply, 24 V inputs/outputs), if they are electrically isolated against other circuitry |              | 500 V                        | 350 V                       |
| COM interfaces, electrically   | isolated     | 500 V                        | 350 V                       |
|  | not isolated | not applicable               | not applicable              |
| FBP interface  |              | 500 V                        | 350 V                       |
| Ethernet   |              | 500 V                        | 350 V                       |

The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

### Main dimensions mm, inches

| Type      | Nr communication modules | Length L |        |
|-----------|--------------------------|----------|--------|
|           |                          | mm       | inches |
| TB511-ETH | 1                        | 95.5     | 3.76   |
| TB521-ETH | 2                        | 123.5    | 4.86   |
| TB541-ETH | 4                        | 179.5    | 7.07   |

## System data

### Power supply units

For the supply of the modules, power supply units according to PELV specifications must be used.

### Electromagnetic Compatibility

#### Immunity

|   |                   |   |
|---|-------------------|---|
| <b>Against electrostatic discharge (ESD)</b>                                |                   | According to EN 61000-4-2, zone B, criterion B  |
| Electrostatic voltage in case of  | air discharge     | 8 kV  |
|   | contact discharge | 4 kV, in a closed switch-gear cabinet 6 kV (1)  |
| <b>ESD with communication connectors</b>                                    |                   | In order to prevent operating malfunctions, it is recommended, that the operating personnel discharge themselves prior to touching communication connectors or perform other suitable measures to reduce effects of electrostatic discharges. |
| <b>ESD with connectors of Terminal Bases</b>                                |                   | The connectors between the terminal bases and CPUs or communication modules must not be touched during operation. The same is valid for the I/O-Bus with all modules involved.  |
| <b>Against the influence of radiated (CW radiated)</b>                      |                   | According to EN 61000-4-3, zone B, criterion A  |
| Test field strength   |                   | 10 V/m  |
| <b>Against transient interference voltages (burst)</b>                      |                   | According to EN 61000-4-4, zone B, criterion B  |
| Supply voltage units  | AC / DC           | 2 kV  |
| Digital inputs/outputs  | 24 V DC           | 2 kV  |
|   | 120/230 V AC      | 2 kV  |
| Analog inputs/outputs   |                   | 1 kV  |
| CS31 system bus   |                   | 2 kV  |
| Serial RS485 interfaces (COM)   |                   | 2 kV  |
| Serial RS232 interfaces (COM, not for PM55x and PM56x)                      |                   | 1 kV  |
| ARCNET  |                   | 1 kV  |
| FBP   |                   | 1 kV  |
| Ethernet  |                   | 1 kV  |
| I/O supply, DC-out  |                   | 1 kV  |
| <b>Against the influence of line-conducted interferences (CW conducted)</b> |                   | According to EN 61000-4-6, zone B, criterion A  |
| Test voltage  |                   | 3 V zone B, 10 V is also met  |
| <b>High energy surges</b>   |                   | According to EN 61000-4-5, zone B, criterion B  |
| Power supply DC   |                   | 1 kV CM (2) / 0.5 kV DM (2)   |
| DC I/O supply   |                   | 0.5 kV CM (2) / 0.5 kV DM (2)   |
| Buses, shielded   |                   | 1 kV CM (2)   |
| AC-I/O unshielded   |                   | 2 kV CM (2) / 1 kV DM (2)   |
| I/O analog, I/O DC unshielded   |                   | 1 kV CM (2) / 0.5 kV DM (2)   |
| <b>Radiation (radio disturbance)</b>  |                   | According to EN 55011, group 1, class A   |

(1) High requirement for shipping classes are achieved with additional specific measures (see specific documentation).

(2) CM = Common Mode - DM = Differential Mode.

# AC500-XC

## Key features

5

Lower lifetime cost and many of the traditional practices are not required, such as: HVAC for the panel, shock absorbers, door sealing, etc...

- Resistance to:
- High humidity
  - Salt mist
  - Vibration
  - High altitude
  - Corrosive gases
  - Temperature: from -40 to +70 °C

All the benefits from AC500 range: Automation Builder engineering suite, I/O modules, scalable and flexible, same high performance communication, libraries and web services.

### AC500 CPUs

- 2 internal serial interfaces, RS232 / RS485 configurable
- Display and 8 function keys for diagnosis and status
- Centrally expandable with up to 10 I/O modules (S500) for a total of 320 Digital I/Os or 160 Analog I/Os
- Simultaneous operation of up to 4 external communication modules in any desired combination
- Optional SD card for data storage and program backup
- Can also be used as slave CANopen® using CM588-CN-XC slave coupler
- Ethernet version provides web server and IEC 60870-5-104 remote control protocol.

### AC500 CPU PM595

- 2 Ethernet interfaces with integrated switch and software configurable protocol (PROFINET, EtherCAT (4))
- 2 independent Ethernet interfaces
- 2 serial interfaces, RS232 / RS485 configurable
- Provides web server and IEC 60870-5-104 telecontrol protocol
- Centrally expandable with up to 10 I/O modules (S500 and/or S500-eCo modules allowed)
- Simultaneous operation of up to 2 external communication modules in any desired combination

| Program memory<br>MB | Cycle time in $\mu$ s<br>per instruction min.<br>Bit/Word/Float. point | Integrated communication                                       | Type                | Order code      | Price | Weight<br>(1 pce)<br>kg |

(1) Ethernet communication.

(2) Provides integrated web server and IEC 60870-5-104 remote control protocol on each interface independently.

(3) Provides integrated 4 GB flashdisk for user data storage and data logging.

(4) Availability on demand.

### Terminal base

- For mounting and connection of the CPUs and communication modules, not needed for PM595
- 1 to 4 plug-in communication modules
- Connection for communication coupler integrated in the CPU
- I/O interface for direct connection of up to 10 expansion modules
- Connection COM1: 9-pole pluggable terminal block
- Connection COM2: 9-pole Sub-D (socket).

### AC500 Condition Monitoring CMS-XC

- PLC integrated condition monitoring and fast protection for high frequency signals (vibration, current, voltage, speed/encoder)
- FM502-CMS module needs function module terminal base TF5x1 for direct interfacing to CPU, communication couplers, other I/O
  - for stand-alone or control/safety integrated condition monitoring
- PM592 CPU to be used on same TF5x1 for data storage and signal processing or communication
  - C-code interface for own complex diagnosis algorithms, 4GB Flash disk for raw fingerprints and indicator trending
- FM502-CMS module:
  - 16 fast, precise analog inputs, all synchronously sampled; configurable as IEPE or +-10V
  - individual measurement configuration (start, stop, trigger) per channel
  - per channel up to 50ksamples/s and 24bit ADC resolution, adjustable sampling
  - encoder inputs (5V or 24V) up to 300kHz counter; 12 modes, incl. absolute SSI (1MHz)
  - fast data logging, compact WAV-Files delivered automatically to CPU, incl. synchronized encoder signal if configured
  - analogue values always available for fast protection in I/O image of CPU
- Included in Automation Builder: Configuration, libraries for CMS control and wav file handling, examples
- Available download package: Signal processing library, example programs with simple diagnosis, logging and automated triggering (2)

(1) Availability planned for Q1/2016.

### I/O modules

- For central expansion of the AC500-XC CPU
- For decentralized expansion in combination with communication interface module (not for DC505-FBP)
- DC: channels can be configured individually as inputs or outputs
- Terminal unit required (refer to table below).

### Digital I/O

| Number of DI/DO/DC | Input signal | Output type | Output signal     | Terminal units | Type     | Order code      | Price | Weight (1 pce) kg |

### Analog/digital mixed I/O

Standard I/O module with high functionality:

- 16 digital input or 16 digital output channels
- 8 configurable In/Output channels
- First two inputs are also usable as high-speed counter (up to 50 kHz) together with AC500-XC CPU, CS31 or CI5xx-XC communication interface modules
- 4 independent analog input channels configurable for voltage, current, 12 bit + sign, 1-2 wire connection
- Galvanic isolation per module
- Usable with all CI5xx modules.

DA501-XC

## Technical data

### CD522-XC encoder module

The CD522-XC module offers accuracy and dynamic flexibility for a customized solution. It has two independent encoder inputs onboard and is easily configured using the Automation Builder software for 10 different operation modes and for frequencies up to 300 kHz (depending on CPU cycle time). The CD522-XC module also integrates outputs for pulses and for PWM as well as normal inputs and outputs, depending on selected encoder mode.

## Technical data

### Analog/digital mixed I/O expansion module

For all modules: max cable length for connected process signals is 1000 m for shielded cable and 600 m for unshielded ones.  
For all Input modules, the signal resolution for channel configuration is: -10...+10 V: 12 bit + sign; 0...10 V, 0...20 mA, 4...20 mA: 12 bits.

## Technical data

### DC541-CM-XC interrupt I/O and fast counter module

In the operating mode counter, the channels can be configured as follows:

Input, Output, 32-bit up/down counter (uses C0...C3) as a 32-bit counter without limit, 32-bit periodic counter as a 32-bit counter with a limit, limiter for a 32-bit counter (limit channel 0), 32-bit up counter (forward counter) with the frequencies 50 kHz, 5 kHz and 2.5 kHz, pulse-width modulation (PWM) with a resolution of 10 kHz, time and frequency measurement, frequency output.

## Technical data

### AC500 Condition Monitoring CMS: FM502-CMS-XC

The FM502-CMS-XC function module offers precision and dynamic flexibility for customized solutions in condition monitoring, precise measurement or fast data logging applications. It has 16 fast, precise and synchronized analog inputs with 50k Samples/s (SPS), 24bit ADC resolution, completed with encoder inputs (incremental or absolute) with counter and additional DI and DC inputs/outputs onboard. It is easily configured using the Automation Builder software and the special libraries. Overall it has 12 different operation modes. One FM502 function module can be placed on the right side of PM592-ETH-XC CPU with a special function module terminal base TF5x1, to interface directly to the CPU. While long measurements can be flexibly configured, started and stopped, all inputs are available in the I/O Image of CPU for immediate use (measurement, protection, control, ...)

|  |  |                                     |
|--|--|-------------------------------------|
| <b>Type</b>  | <b>FM502-CMS-XC</b>  |                                     |
| <b>Data storage</b>  |  |                                     |
| Fast user data memory of FM502   | 128 MB (ca. 33 million Samples: e.g 40 s record length on 16 channels at 50k SPS or 5.8 h record length on 16 channels at 100 SPS) |                                     |
| File Format delivered to PM592 flash   | WAV (compact binary) per channel, all channels in one *.zip w. time stamp  |                                     |
| <b>Analog inputs</b>   |  |                                     |

| <b>Process voltage L+</b>  |  |   |
| Nominal voltage  | 24 V DC  |   |
| Max. ripple  | 0,05   |   |
| Current consumption from L+ (FM502 and PM592, no communication module)         | Max. 0.43 A + max. 0.5 A per output  |   |
| Inrush current from L+ (at power up, FM502 and PM592, no communication module) | 1.2 A²s  |   |
| Electrical isolation   | Yes, (PM592 and FM502 to other I/O-Bus modules )                           |   |
| Max. power dissipation within the FM502 module                                 | 6.5 W (outputs unloaded)   |   |
| <b>5-V-encoder supply output</b>   |  |   |
| Nominal voltage  | 5 V DC (+/- 5%), 100 mA max.   |   |

(1) High Temperatures:

Operation of FM502-XC version in the operating temperature range between +60 °C and +70 °C with following deratings:

No use of 24 V encoder mode

Analog inputs: maximum number of configured input channels limited to 75 % per group AI0..AI7 and AI8..AI15

# AC500-XC

## Technical data

### AC500-XC communication modules

- Up to 4 communications modules can be used on an AC500-XC CPU
- No external power supply required.

(1) Plug-in terminal block included.

(2) 10/100 Mbit/s, full/half duplex with auto-sensing, 2-port switch integrated.

# AC500-XC

## Technical data

### Communication interface modules

For all modules: max cable length for connected process signals is 1000 m for shielded cable and 600 m for unshielded ones.  
For all Input modules, the signal resolution for channel configuration is: -10...+10 V: 12 bits + sign; 0...10 V, 0...20 mA, 4...20 mA: 12 bits.  
Temperature: 0.1 °C.

# AC500-XC

## System data

### Environmental conditions

#### Process and supply voltages

|                                       |                                     |  |
|---------------------------------------|-------------------------------------|--|
| 24 V DC                               | Process and supply voltage          | 24 V DC (-25 %, +30 % inclusive ripple)                      |
|                                       | Absolute limits                     | 18 ... 31.2 V inclusive ripple                               |
|                                       | Ripple                              | < 10 %   |
|                                       | Protection against reverse polarity | yes  |
| Allowed interruptions of power supply | DC supply                           | Interruption < 10 ms, time between 2 interruptions > 1s, PS2 |

**Important:** Exceeding the maximum process or supply voltage (< -35 V DC and > + 35 V DC) could lead to unrecoverable damage of the system. For the supply of the modules, power supply units according to PELV or SELV specifications must be used. The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

#### Temperature

|                     |                |   |
|---------------------|----------------|---|
| Operating           | -40 ... +70 °C |   |
|                     | -40 ... -30 °C | Proper start-up of system; technical data not guaranteed  |
|                     | -40 ... 0 °C   | Due to the LCD technology, the display might not be readable  |
|                     | -40 ... +40 °C | vertical mounting of modules possible, output load limited to 50% per group with the following deratings:   |
|                     | +60 ... +70 °C | System is limited to max. 2 Communication Modules per Terminal Base<br>Applications certified for cULus up to 60 °C<br>Digital inputs: maximum number of simultaneously switched on input channels limited to 75 % per group (e.g. 8 channels => 6 channels)<br>Digital outputs: output current maximum value (all channels together) limited to 75 % per group (e.g. 8 A => 6 A)<br>Analog outputs only if configured as voltage output: maximum total output current per group is limited to 75 % (e.g. 40 mA => 30 mA)<br>Analog outputs only if configured as current output: maximum number of simultaneously used output channels limited to 75 % per group (e.g. 4 channels => 3 channels) |
| Storage / Transport | -40 ... +85 °C |   |

#### Humidity

|                     |                               |
|---------------------|-------------------------------|
| Operating / Storage | 100 % r. H. with condensation |
|---------------------|-------------------------------|

#### Air pressure

|           |   |
|-----------|---|
| Operating | -1000 m .... 4000 m (1080 hPa ... 620 hPa)<br>>2000 m (<795 hPa): max. operating temperature must be reduced by 10 K (e.g. 70 °C to 60°C) |
|-----------|---|

#### Immunity to corrosive gases

|           |   |
|-----------|---|
| Operating | Yes, according to:<br>ISA S71.04.1985 Harsh group A, G3/GX<br>IEC 60721-3-3 3C2 / 3C3 |
|-----------|---|

#### Immunity to salt mist

|           |   |
|-----------|---|
| Operating | Yes, horizontal mounting only, according to:<br>IEC 60068-2-52 severity level 1 |
|-----------|---|

**Note:** Unused communication sockets (RJ45, Sub-D, FBP) must be covered with TA535 Protective Caps for XC devices in case of salt mist environments.

#### Electromagnetic Compatibility

|   |  |
|---|--|
| Radiated emission (radio disturbances)              | Yes, according to:<br>CISPR 16-2-3                       |
| Conducted emission (radio disturbances)             | Yes, according to:<br>CISPR 16-2-1, CISPR 16-1-2         |
| Electrostatic discharge (ESD)                       | Yes, according to:<br>IEC 61000-4-2, zone B, criterion B |
| Fast transient interference voltages (burst)        | Yes, according to:<br>IEC 61000-4-4, zone B, criterion B |
| High energy transient interference voltages (surge) | Yes, according to:<br>IEC 61000-4-5, zone B, criterion B |
| Influence of radiated disturbances                  | Yes, according to:<br>IEC 61000-4-3, zone B, criterion A |
| Influence of line-conducted interferences           | Yes, according to:<br>IEC 61000-4-6, zone B, criterion A |
| Influence of power frequency magnetic fields        | Yes, according to:<br>IEC 61000-4-8, zone B, criterion A |

**Note:** In order to prevent malfunctions, it is recommended that the operating personnel discharge themselves prior to touching communication connectors or perform other suitable measures to reduce effects of electrostatic discharges. Unused sockets for Communication Modules on Terminal Bases must be covered with TA524 Dummy Communication Module. I/O-Bus connectors must not be touched during operation.

# AC500-S

## Key features

---

Easy integration: Simple expansion of a non-safety ABB PLC with safety functions.

One common diagnostic system for safety and standard CPUs.

eXtreme Conditions (-XC) version is available.

6

---

PROFINET®/PROFIsafe® interface for decentralized safety I/Os, safe position and speed monitoring as well as triggering of safety drive functions.

---

Easy implementation of flexible configuration concept (one safety program for various machine types). Safety CPU can be configured to work even if non-safety CPU is in STOP mode.

---

Automation Builder productivity suite providing integrated support of ST, Ladder (LD) and Function Block Diagram (FBD) programming. Trigonometric functions are supported for easy implementation of complex kinematic tasks.

# AC500-S

## System data

### Operating and ambient conditions

#### Voltages according to EN 61131-2

|   |                                     |  |
|---|-------------------------------------|--|
| 24 V DC   | Process and supply voltage          | 24 V DC (-15 %, +20 % without ripple)                    |
|   | Absolute limits                     | 19.2...30 V inclusive ripple                             |
|   | Ripple                              | < 5 %  |
|   | Protection against reverse polarity | Yes  |
| Allowed interruptions of power supply<br>acc. to EN 61131-2 | DC supply                           | Interruption < 10 ms, time between 2 interruptions > 1 s |

**Important:** Exceeding the maximum power supply voltage (> 30 V DC) for process or supply voltages could lead to unrecoverable damage of the system. The system could be destroyed.

|              |           |  |
|--------------|-----------|--|
| Temperature  | Operation | 0...60 °C (horizontal mounting of modules)   |
|              |           | 0...40 °C (vertical mounting of modules and output load reduced to 50 % per group) |
|              | Storage   | -40...+70 °C   |
|              | Transport | -40...+70 °C   |
| Humidity     |           | Max. 95 %, without condensation  |
| Air pressure | Operation | > 800 hPa / < 2000 m   |
|              | Storage   | > 660 hPa / < 3500 m   |

6

### Creepage distances and clearances

|  |                             |
|--|-----------------------------|
| Insulation Test Voltages, Routine Test, according to EN 61131-2  | AC voltage during 2 seconds |
| 24 V circuits (supply, 24 V inputs/outputs), if they are electrically isolated against other circuitry | 350 V                       |

The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

# AC500-S

## System data

### Power supply units

For the supply of the modules, power supply units according to PELV specifications must be used.

### Electromagnetic Compatibility

#### Immunity

|   |                   |   |
|---|-------------------|---|
| <b>Against electrostatic discharge (ESD)</b>                                |                   | According to EN 61000-4-2, zone B, criterion B  |
| Electrostatic voltage in case of  | air discharge     | ±8 kV   |
|   | contact discharge | ±4 kV   |
| <b>ESD with communication connectors</b>                                    |                   | In order to prevent operating malfunctions, it is recommended, that the operating personnel discharge themselves prior to touching communication connectors or perform other suitable measures to reduce effects of electrostatic discharges. |
| <b>ESD with connectors of Terminal Bases</b>                                |                   | The connectors between the Terminal Bases and CPUs or Communication Modules must not be touched during operation. The same is valid for the I/O-Bus with all modules involved.  |
| <b>Against the influence of radiated (CW radiated)</b>                      |                   | According to EN 61000-4-3, zone B, criterion A  |
| Test field strength   |                   | 10 V/m  |
| <b>Against transient interference voltages (burst)</b>                      |                   | According to EN 61000-4-4, zone B, criterion B  |
| Supply voltage units  | DC                | 2 kV  |
| Digital inputs/outputs  | 24 V DC           | 2 kV  |
| Analog inputs   |                   | 1 kV  |
| <b>Against the influence of line-conducted interferences (CW conducted)</b> |                   | According to EN 61000-4-6, zone B, criterion A  |
| Test voltage  |                   | 10 V zone B   |
| <b>High energy surges</b>   |                   | According to EN 61000-4-5, zone B, criterion B  |
| Power supply  | DC                | 1 kV CM (1) / 0.5 kV DM (2)   |
| DC I/O supply, add. DC-supply-out   |                   | 0.5 kV CM (2) / 0.5 kV DM (2)   |
| I/O analog, I/O DC unshielded   |                   | 1 kV CM (2) / 0.5 kV DM (2)   |
| <b>Radiation (radio disturbance)</b>  |                   | According to EN 55011, group 1, class A   |

(1) High requirement for shipping classes is achieved with additional specific measures (see specific documentation).

(2) CM = Common Mode; DM = Differential Mode.

### Mechanical Data

### Creepage distances and clearances

|   |                                    |
|---|------------------------------------|
| <b>Insulation Test Voltages, Routine Test, according to EN 61131-2</b>  | <b>AC voltage during 2 seconds</b> |
| <b>24 V circuits (supply, 24 V inputs/outputs), if they are electrically isolated against other circuitry</b> | 350 V                              |

The creepage distances and clearances meet the requirements of the overvoltage category II, pollution degree 2.

# AC500-S-XC

## System data

### Power supply units

For the supply of the modules, power supply units according to PELV specifications must be used.

### Electromagnetic Compatibility

#### Immunity

|   |   |
|---|---|
| <b>Against electrostatic discharge (ESD)</b>                                | According to EN 61000-4-2, zone B, criterion B  |
| Electrostatic voltage in case of  |   |
| air discharge   | ±8 kV   |
| contact discharge   | ±4 kV   |
| <b>ESD with communication connectors</b>                                    | In order to prevent operating malfunctions, it is recommended, that the operating personnel discharge themselves prior to touching communication connectors or perform other suitable measures to reduce effects of electrostatic discharges. |
| <b>ESD with connectors of Terminal Bases</b>                                | The connectors between the Terminal Bases and CPUs or Communication Modules must not be touched during operation. The same is valid for the I/O-Bus with all modules involved.  |
| <b>Against the influence of radiated (CW radiated)</b>                      | According to EN 61000-4-3, zone B, criterion A  |
| Test field strength   | 10 V/m  |
| <b>Against transient interference voltages (burst)</b>                      | According to EN 61000-4-4, zone B, criterion B  |
| Supply voltage units  | DC  |
| Digital inputs/outputs  | 24 V DC   |
| DC  | 2 kV  |
| 24 V DC   | 2 kV  |
| Analog inputs   | 1 kV  |
| <b>Against the influence of line-conducted interferences (CW conducted)</b> | According to EN 61000-4-6, zone B, criterion A  |
| Test voltage  | 10 V zone B   |
| <b>High energy surges</b>   | According to EN 61000-4-5, zone B, criterion B  |
| Power supply  | DC  |
| DC  | 1 kV CM (1) / 0.5 kV DM (2)   |
| DC I/O supply, add. DC-supply-out   | 0.5 kV CM (2) / 0.5 kV DM (2)   |
| I/O analog, I/O DC unshielded   | 1 kV CM (2) / 0.5 kV DM (2)   |
| <b>Radiation (radio disturbance)</b>  | According to EN 55011, group 1, class A   |

(1) High requirement for shipping classes is achieved with additional specific measures (see specific documentation).

(2) CM = Common Mode; DM = Differential Mode.

### Mechanical Data

#### Wiring method / terminals

|  |   |
|--|---|
| <b>Mounting</b>                                | Horizontal (DIN rail mounting)  |
| <b>Degree of protection</b>                    | IP20  |
| <b>Housing</b>                                 | According to UL 94  |
| <b>Vibration resistance acc. to EN 61131-2</b> | all three axes (DIN rail mounting)<br>5...11.9 Hz, continuous 3.5 mm<br>11.9...150 Hz, continuous 1 g |
| <b>Shock resistance</b>                        | All three axes<br>15 g, 11 ms, half-sinusoidal  |

#### Mounting of the modules

|   |                                |
|---|--------------------------------|
| <b>DIN rail according to DIN EN 50022</b> | 35 mm, depth 7.5 mm or 15 mm   |
| <b>Mounting with screws</b>               | Screws with a diameter of 4 mm |
| <b>Fastening torque</b>                   | 1.2 Nm                         |

# CP600-eCo and CP600

## Key features

- Housing
  - CP600-eCo: Plastic
  - CP600: Aluminium
- Front protection IP66
- Engineering software Panel Builder 600 integrated in Automation Builder

- Improved flexibility and integration
- Two versions available:
  - CP600-eCo / CP600: Configuration with Panel Builder 600 for clear tailor made visualization.
  - CP600-WEB: visualization of AC500 web server with Automation Builder visualization. The Automation Builder debugging and diagnostics screens can be converted effortlessly for use with CP600-WEB control panels.

- Brilliant colored display
- Free reusable 3D graphic elements (Widgets)
- Import tags from PLC, drives, motion controller and robots configuration within Automation Builder

- Slim design for easily installation even in compact spaces

## Network architecture

### Communication with AC500 – the perfect solution

Flexibility, real-time capability and maximum data transfer speed are just some of the communication demands automation systems must meet. With the AC500, ABB has developed a communication platform offering customer-oriented solutions for the most diverse communication tasks. Simple network configuration and diagnostics options using the Automation Builder enable ease of planning, implementation and commissioning thus saving engineering time and project costs. Among others, ABB's AC500 supports the following communication protocols:

#### PROFINET®

PROFINET® I/O meets the stringent requirements for real time Ethernet protocols in the world of automation. Very fast data transfer, integrated and standardized network structures from controller to field and flexible network management support users in the implementation of their automation solutions.

#### PROFIBUS DP®

PROFIBUS DP® delivers flexible configuration by means of a mono- and multi-master system structure and data transfer rates of up to 12 Mbit/s with twisted pair cables and/or optical fibers. PROFIBUS DP® allows for the connection of up to 126 devices (master/slave) to one bus segment thus enabling simple and reliable communication solutions.

#### CANopen®

With up to 127 participants and transmission speeds of 10 kbit/s up to 1 Mbit/s depending on bus length, CANopen® offers high-speed data transfer and high immunity in master/slave network topologies.

#### CS31-Bus

CS31-Bus is a high-performance, proprietary ABB communication standard featuring data transfer speeds of up to 187.5 kbit/s and enabling up to 31 bus participants to communicate via RS485, simple telephone cable or optical fiber.

### Modbus® TCP & RTU

Modbus® RTU is an open serial data protocol for master/slave networks of up to 31 network nodes. Different bus lengths depending on the type of serial communication interface enable data transfer speeds of up to 115.2 Kbit/s. Modbus® TCP is a common Ethernet-based network protocol.

### RCOM

RCOM is a proprietary ABB bus protocol for master/slave communication via RS232/485. Expandable to 254 RCOM slaves and provided with diverse diagnostics options, this protocol is ideal for applications in the water and waste water industry.

### Ethernet and Internet

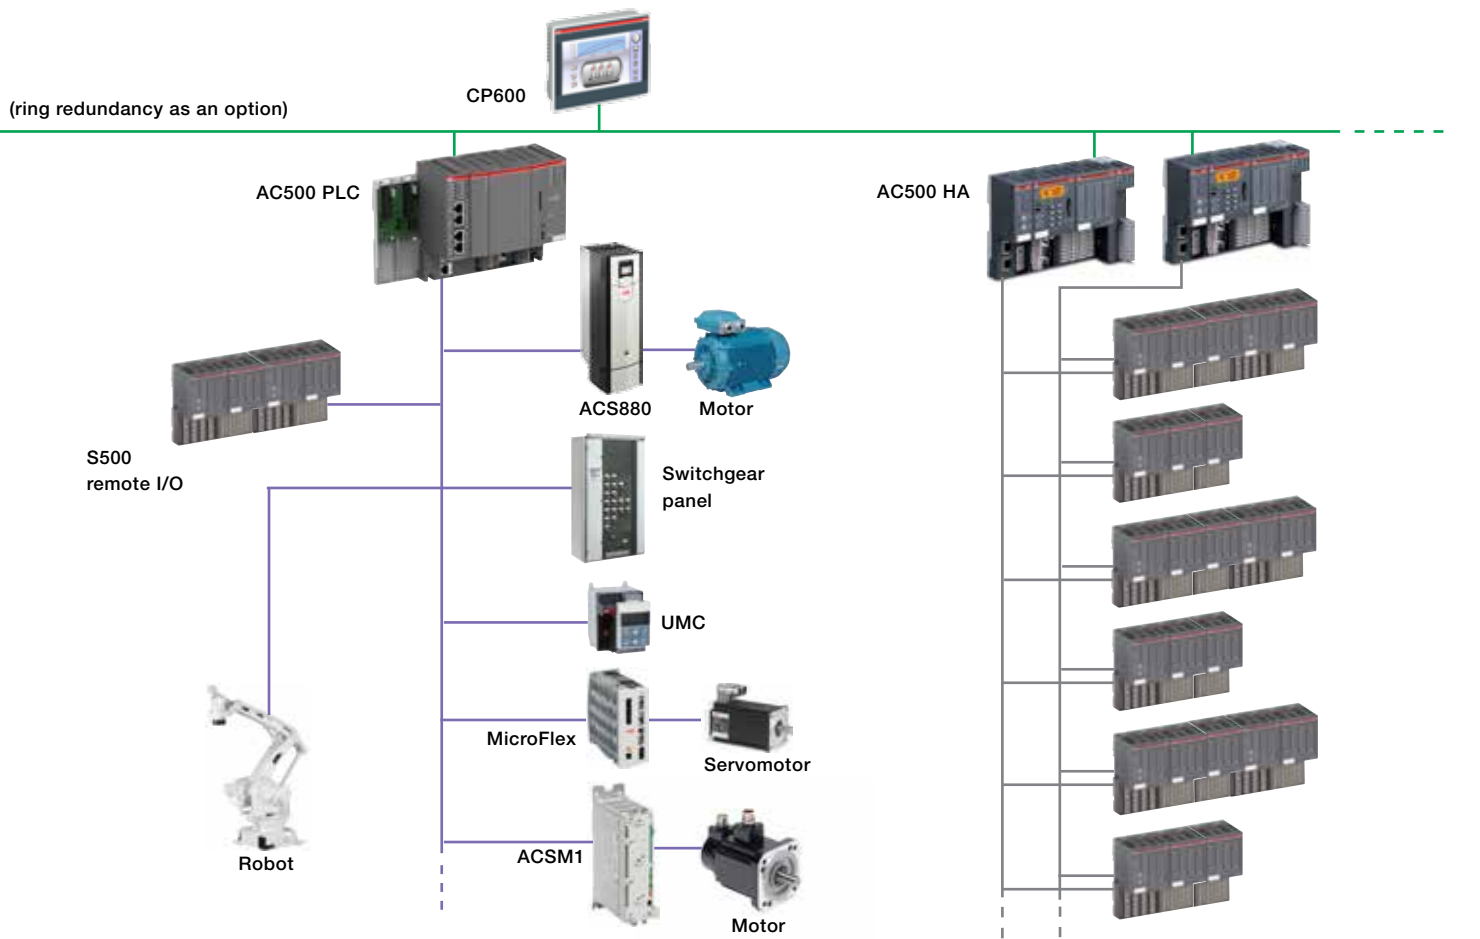

Integrated communication, high data transfer rates and the use of existing data networks enable simple, customer-specific solutions. Supported protocols are:

- HTTP for web server. Visualization for remote operation and maintenance
- FTP for data file transfer

- Simple Network Time Protocol (SNTP) offering PLC time synchronization using Internet-hosted time services
- SMTP for e-mails with attachments
- TCP and UDP ports programmable for project-specific protocols. Library functions available.
- IEC60870-5-104 telecontrol, mainly used for pipelines, water and waste-water. Suitable for protocol configuration with the Automation Builder software suite.
- DHCP for automatic IP address allocation
- PING for checking the connection with other automation devices

### EtherCAT®

EtherCAT® is an open Industrial Ethernet standard certified according to international standards IEC 61158, IEC 61784 and ISO 15745-4. Thanks to extremely high data transfer speeds, EtherCAT® can serve as real time Ethernet protocol for time critical motion control applications. Whether for "cam switch" functionalities or diverse master/slave network configurations, AC500 delivers the perfect solution for your application.

# Application descriptions

## AC500 HA offers hot standby redundancy

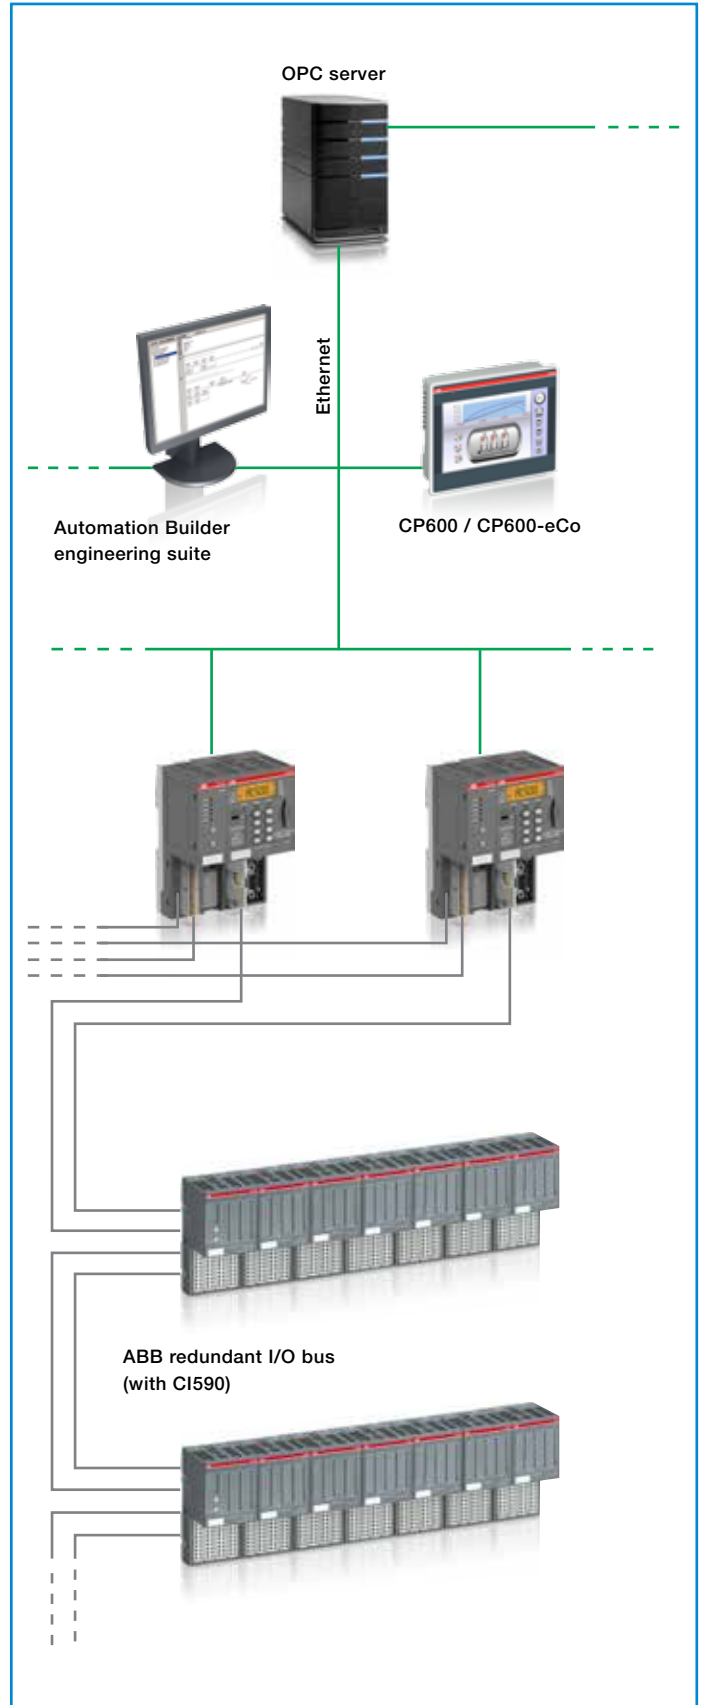

### Performance is the key

The high availability of AC500 HA prevents downtime caused by either human error or cabling/hardware/software malfunction. Redundant CPUs and the redundant I/O bus to the CI590 module reduce the risk of total system failure, thus enhancing system availability.

If critical data retention and the avoidance of downtime are paramount to your application, ABB's AC500 HA is the perfect solution.

What are the benefits of AC500 HA for your high availability solution?

- Hot standby: Both CPUs (and all communication or bus-lines) are hot: Permanently running in parallel, continuously synchronizing each other and monitoring the system. If the primary CPU is stopped, powered off or crashed, or if a CS31 line is disconnected, the other hot standby CPU takes over immediately by adopting primary status.
- Higher resource utilization, no downtimes caused by cabling/hardware/software failure thanks to redundant CPUs and redundant communication to I/O and Scada/HMI
- Cost efficiency and easy system maintenance through the use of standard hardware
- High availability is provided with standard CPUs from PM573-ETH to PM592-ETH: Cost matching hot standby quality for small or large systems
- 3 cycles or 50 ms changeover time
- Scalable: Up to a total of seven redundant I/O-busses via CM574 modules offer scalability of large-sized applications.

# Application descriptions

## Real-time Ethernet functionality

### RT-Ethernet modules

Modules are available with two different communication protocols based on Ethernet (PROFINET® I/O, EtherCAT®). Master couplers connect AC500 CPUs to remote I/O modules. Various interface modules offer the connection of decentralized I/O modules to the real-time Ethernet networks.

### Cam-switch functionality

Modules based on the decentralized real-time EtherCAT® interface technology with integrated I/Os and programmed with PLCopen® function blocks are available.

# Application descriptions

## Condition Monitoring with AC500 PLC

8

### Controller integrated or stand-alone condition monitoring

The AC500 condition monitoring module FM502 is a natural part of the AC500 platform and Automation Builder engineering suite, and can be used in different condition monitoring concepts, stand-alone or control integrated.

Due to the easy programming in PLC languages, it is usable for a variety of use cases and is especially suitable for plant, line and machine builders as easy extension of their offering.

If controller integrated

- it enables at very reasonable cost
- the best prediction horizon as it can measure online, when best measurement quality is given without scheduling production interruptions
- while continuously protecting the application in real time e.g. with the same or other sensor(s).
- Further inputs can be used as fast data logger e.g. precisely documenting process quality

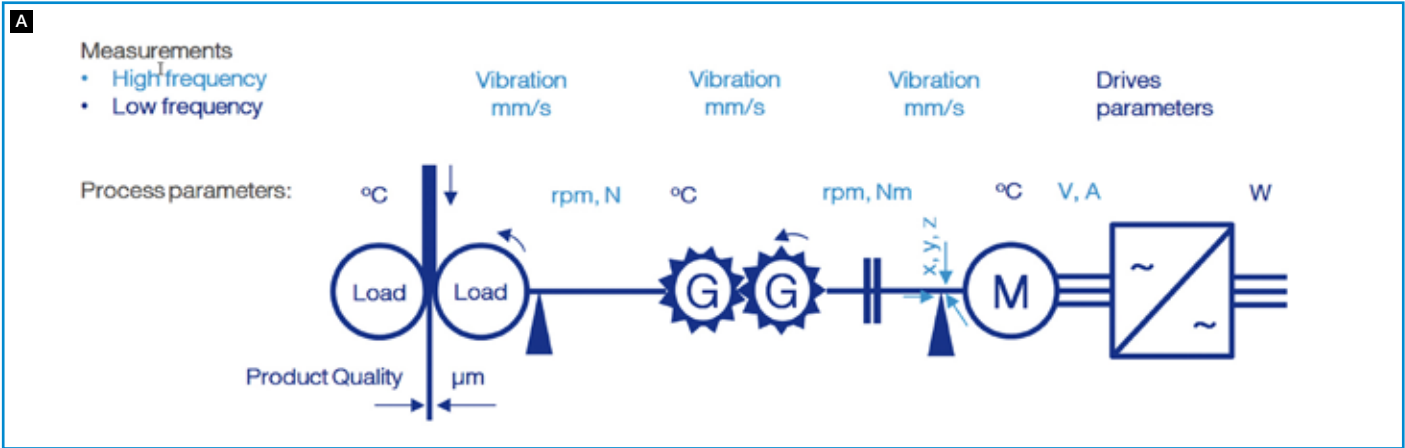

Therefore it is not only able to continually check the mechanical components but also gives fast protection for spontaneous and large failures even while measuring. The condition monitoring mode creates a database internally or externally for predictive maintenance. Automatic and user assisted responses can be enabled to prevent costly consequences including total failures.

As many as 16 vibration sensors + 2 encoder counters can be connected.

The recorded condition monitoring data can be stored in the CPU flash disc before communication or directly analyzed. Higher level indicators can be calculated and communicated to a local or remote HMI or database system.

### Predictive performance for your process or machines

- Easy and cost saving integration of condition monitoring into the AC500 platform
- Early detection of mechanical damages
- Fast protection from spontaneous failures
- Even complex C-code analytics can be used locally for meaningful own performance indicators
- Leads to optimized planning of maintenance instead of fixed, scheduled service and spontaneous repair
- No additional system or fixed software for diagnostics and visualization needed
- Easy storage of the data, locally (4GB) or in remote servers and databases
- Ideally suited also for retrofit of older equipment, as it can make use of mechanical reserves of still valuable equipment

A AC500 Condition Monitoring Module FM502-CMS: Controller integrated or stand-alone CMS covering a complete drive train. | B Acceleration sensor mounting for integrated condition monitoring in cold rolling mill. With local warnings by key performance indicators, first analysis with detailed verification possibility via CP600 and remote connectivity.

**Example: Cold rolling mill in steel processing:**

- One FM502-CMS module can execute differently configured measurements at the same time and can be reconfigured at runtime
- Several critical and unique components can be protected and condition predicted: Motors, gearbox, process (cold rolling mill)
- Production quality can be logged in parallel in real time
- Remote diagnostics expertise and detailed analysis and reports only in case of warnings

# Application descriptions

## Machine controllers based on AC500 PLC

### From simple to high end motion applications

- Convenient PLC portfolio for diverse applications
  - Simple machine control with AC500-eCo PLC
    - Point-to-point motion with PTO outputs or Modbus communication with the drive
  - Mid-range applications with AC500 PLC
    - EtherCAT communication with the drive or remote I/O and cam-switch for synchronized motion
  - High-end motion application with PM595
    - Axis interpolation e.g. for Delta robot
- Easy integration and excellent scalability using Automation Builder
- Motion library for complex applications

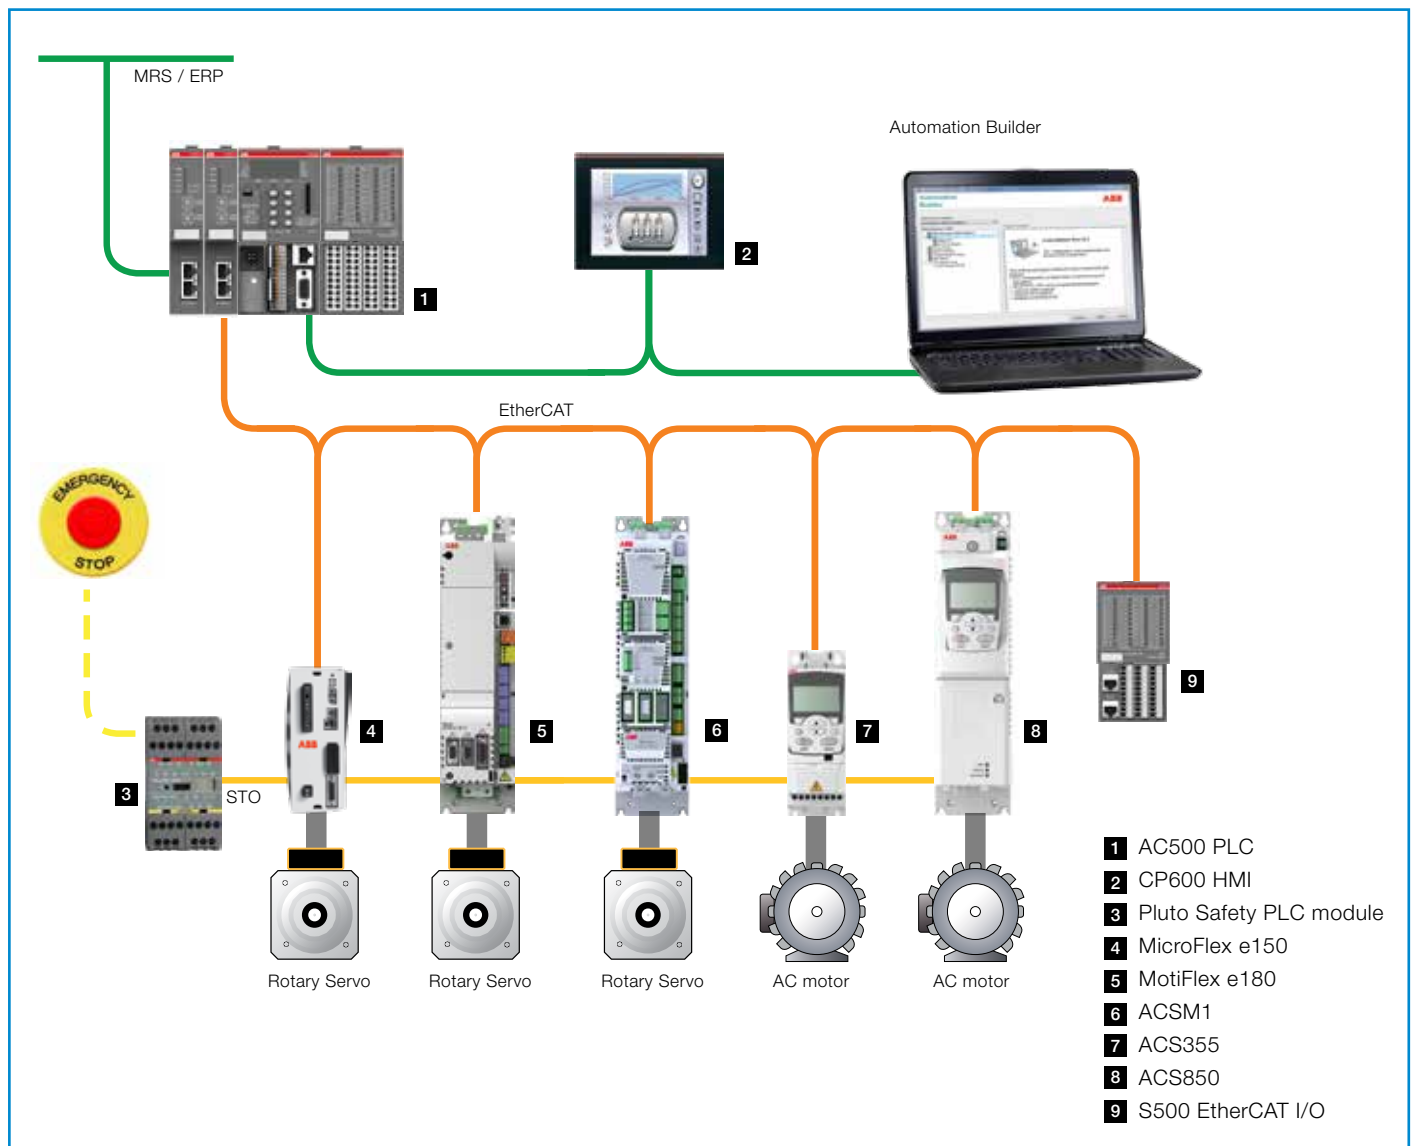

### Multi-axis motion coordination with EtherCAT®

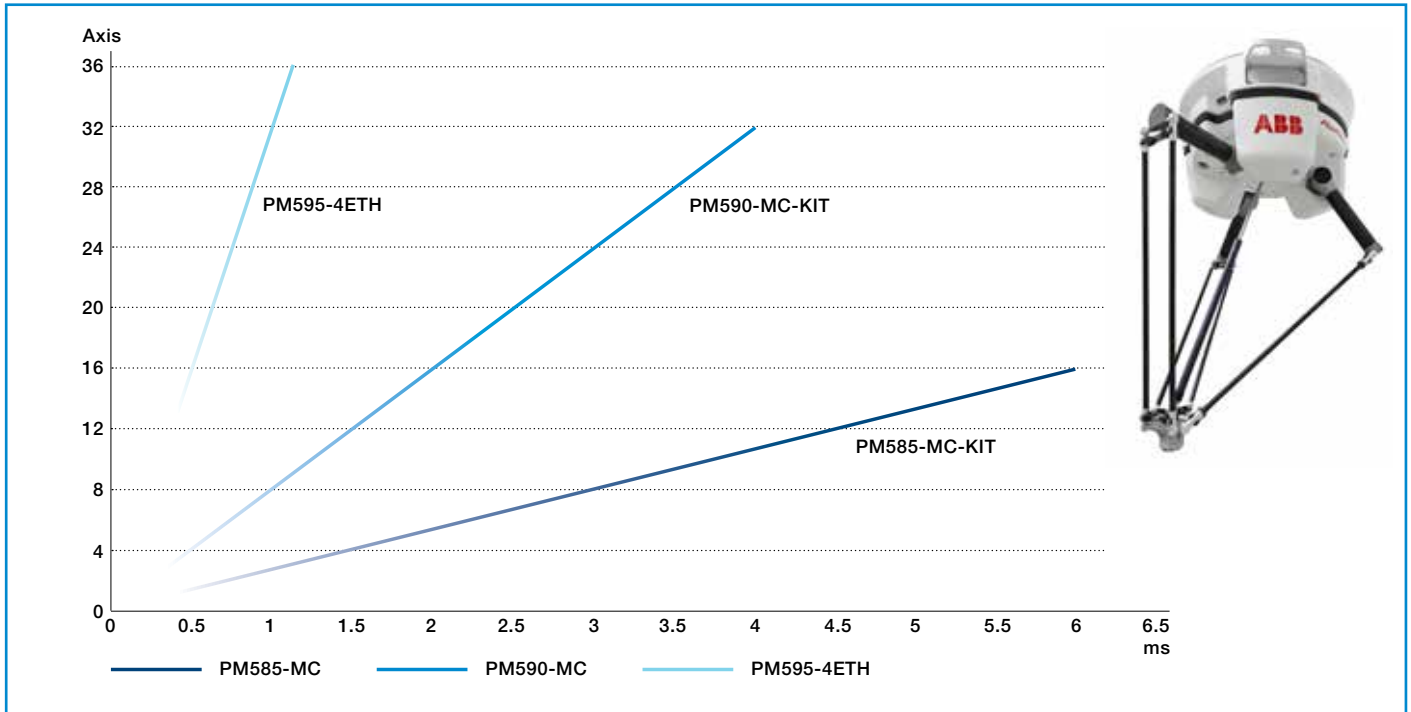

ABB's AC500 PLC using EtherCAT® real-time bus delivers high performance for multi-axis control applications.

The AC500 PLC provides an industry solution with IEC 61131-3 programming and PLCopen® motion functions in combination with ABB drives such as ACSM1 fitted with the FECA-01 EtherCAT module for higher power axes or ACS355 and ACS850 drives or with MicroFlex e150.

This popular high-performance motion bus provides simple 'daisy chain' connection.

EtherCAT multi-axis coordinated motion

Number synchronized Axis / ms

### EtherCAT AC500 machine controller kits

In order to simplify your application, ABB offers products for the implementation of machine control or motion control applications. These products can be purchased individually or as a kit.

Two available EtherCAT kits contain the components required for your application.

Depending on the required performance, the kit provides a powerful CPU, an EtherCAT master communication module and the respective terminal base.

The kit can be expanded using standard I/Os, other communication products or software solutions.

### AC500 Machine controller kits

| Program memory<br>kB | Cycle time in $\mu$ s per instruction min.<br>Bit/Word/Float. point | Integrated communication   | Type         | Order code      | Price | Weight (1 pce)<br>kg |

# PLC Trainer AC500

## Training packages with didactic models, software, teachware for schools and universities

### IEC61131-3 based programming of ABB AC500 PLCs for training purposes

The ABB PLC Trainer AC500 addresses learners and students starting from the basic logic programming over motivating exercises up to Ethernet communication tasks and visualization with an integrated web server.

Exercises range from the basic logical functions to best-practice examples for hot water heating with solar panels, parking bay monitoring or IR remote gate control.

Expansion possibilities like Motor or Traffic Light plug-on module and the Solar Tracking module will increase the motivation of the learners.

These training packages are built in cooperation with IKH Didactic Systems.

### PLC Trainer AC500 basic package

Description:

- 1 PLC Trainer ABB AC500 with AC500-eCo CPU
- 1 Power supply 230 V AC / 24 V DC
- 1 IR-remote control without batteries
- 45 Learning cards 110 x 81 mm laminated in transparent storage box
- Programming software, 45 practical exercises and solutions on USB stick
- 1 Programming cable.

# AC500-eCo Starter kit

## Getting started is so simple

## More functionality and enhanced scalability

### AC500-eCo Starter kit

The AC500-eCo Starter kit helps you to get familiar with ABB AC500 PLC offerings and the engineering tool within a very short time. Learn how to connect and setup the components provided in the starter kit and how to program the PLC by means of several simple example applications. The starter kit comes with CPU, programming cable, digital input simulator, engineering tool and getting started manual.

### Easy to use

The AC500-eCo from ABB is a range of uniquely scalable PLCs offering you unrivalled cost effectiveness for modern industrial automation applications. The AC500-eCo integrates perfectly into the AC500 family - this provides you with the option to build customized solutions based on the standard S500 and S500-eCo I/O range.

### Easy to learn

Offering all of the advantages you would expect from the AC500 family of devices, the AC500-eCo delivers an impressive set of powerful programming features. In addition, thanks to the fact that ABB uses a standard IEC61131-3 based programming system for the entire AC500 family, it is a snap to learn and configure.

### Ordering data

Each kit consists of CPU, programming cable, digital input simulator and engineering tool.

| CPU module in the starter kit | Programming cable (included) | Type          | Order code      | Price | Weight (1 pce)<br>kg |
|-------------------------------|------------------------------|---------------|-----------------|-------|----------------------|
| PM554-TP-ETH                  | Ethernet                     | TA574-D-T-ETH | 1SAP186200R0004 |       | 1.400                |

# AC31 adapter for retrofitting existing AC31 applications

## AC500 life cycle management protects your investment

### A long history

During more than 40 years in the PLC business, we have gained experience from hardwired, centralized and distributed PLCs to scalable PLCs. One of our previous product ranges, the AC31 series 90, was succeeded by the AC500 PLC platform.

For the protection of your investments and for ease of migration to the new AC500 PLC generation, ABB provides AC31 adapter modules based on AC500.

The modules have the same footprint, cabling and features as the previous AC31 series 90 products with up-to-date AC500 hardware.

AC31 adapter modules can replace existing AC31 devices which are either directly compatible or need minor adjustments to the existing user program.

### Main characteristics and architecture

The connection locations do not differ from the predecessor hardware and the number or type of I/O channels are comparable. For remote I/O products on the CS31 bus, I/Os of an existing field application can be modified without having to change the application or configuration. New modules can be configured with DIP switches.

Replacing the AC31 PLC with the 07KT98-x-AD PLC requires only minor program modifications using the Automation Builder engineering suite.

### Advantages at a glance

- Compatible with the existing AC31 series 90 remote I/O-modules, optionally with 1-to-1 replacement in the field, no change of application configuration required.
- Footprint identical to predecessor hardware.
- Automation Builder for PLC programming and reuse of existing programming with e.g. AC1131 software.
- Standard AC500 modules for seamless migration from AC31 to the new AC500.
- Longer life cycle of AC31 through migration to new solution.

### Ordering details

Please contact your local sales organization.

## Additional information

# Life cycle management for maximum return on investment

ABB has developed a PLC life cycle management model aimed at providing proactive services for maximizing availability and performance. This model not only provides optimum support to end-users but also a smooth transition to a new product when the PLC has come to the end of its lifetime.

The life cycle management model divides a product's life cycle into four phases: active, classic, limited and obsolete. Each phase has different implications for the end-user in terms of services provided.

## Product life cycle management model

### Active phase

The active phase starts when the product is launched. In the active phase the end user benefits from different warranty options and other services such as training and technical support. Complete life cycle services from spare parts and maintenance are also provided. The active phase ends when the volume production of a particular PLC ceases and ABB issues an announcement of the life cycle phase change.

### Classic phase

ABB PLC users continue to benefit from complete life cycle services throughout the classic phase. The classic phase is closely aligned with ABB's research and development work to provide continuing support for its PLC products while developing future generations. In the classic phase new hardware and software development may be required to provide the maintenance techniques and upgrades needed to guarantee that the PLC continues to operate at its peak performance. Migration to a new PLC product is recommended before the product has entered the limited phase.

### Limited phase

In the limited phase the product development has come to its end. Spare parts are available as long as components and materials can be obtained. Towards the end of the limited phase, services gradually become obsolete. In addition to the annual life cycle status reviews, ABB issues a life cycle phase change announcement, half a year prior the product becoming obsolete. This is the last opportunity to transfer to new technology before product services end.

### Obsolete phase

The product is transferred to the obsolete phase when it is no longer possible to provide services at reasonable cost or when ABB can no longer support the product technically or the old technology is not available.

### Benefits of life cycle management

PLC life cycle management maximizes the value of the equipment and its maintenance investments by:

- ensuring spare parts and ABB competence availability throughout the lifetime
- enabling efficient product support and maintenance for improved reliability
- adding functionality to the initial product by upgrading or retrofitting
- providing a smooth transition to new technology at the end of the product lifetime

Services offered for ABB's automation products span the entire asset lifetime, from the moment a customer makes the first inquiry to disposal and recycling of the product. Throughout the life cycle of an asset, ABB provides training, technical support and customized contracts, supported by one of the world's most extensive global sales and service networks.

#### **Pre-purchase**

ABB provides a range of services and support guiding the customers to the ideal products for their applications.

#### **Order and delivery**

Orders can be placed at any ABB office or channel partner. In some countries, ABB also offers an online order tracking system. ABB's sales and service network ensures timely deliveries and also offers express delivery.

#### **Installation and commissioning**

While many customers have the resources to perform installation and commissioning on their own, ABB and its channel partners offer professional installation and start-up services.

#### **Operation and maintenance**

From maintenance assessments, preventive maintenance, reconditioning of spare parts and repairs on-site or in workshops, ABB has all the options covered to keep their customers' processes operational.

#### **Upgrade and retrofit**

Frequently, ABB products can often be upgraded to the latest software or hardware in order to improve the performance of the application. Existing processes can be economically modernized by retrofitting with up-to-date technology.

#### **Replacement and recycling**

ABB provides assistance in the best replacement of products while ensuring disposal and recycling observing the local environmental regulations.
