
Spec Setter Safety Switch 400-600A

Frequently Asked Questions

ABB is thrilled to announce an enhanced 400 and 600A Spec Setter General Duty and Heavy Duty Safety Switch. This new safety switch has improved mounting brackets to decrease installation time and labor costs. In addition, the clear line shield and neutral kit will be a standard offering. We are also pleased to announce that the viewing window option will be extended to this product offering. The ordering code will change, so please use the Empower configurator and be on the lookout for additional information. The Safer, The Better Spec Setter 400 and 600A Safety Switch will be available for order in September 2023.

FAQ

What is the reason for the change?

A new and improved design including a wall mounting bracket, all barriers for NEC 2020 compliance, and a new modern look.

Are the ordering codes changing?

Yes. Please refer to ‘400-600A Safety Switch Cross Reference with Outline Drawing Links’ Excel document for a detailed offering list.

Are the enclosure dimensions changing?

Yes. Please refer to ‘400-600A Safety Switch Cross Reference with Outline Drawing Links’ Excel document for a detailed offering list with outline drawings links. The outline drawings will also be available in Empower.

Can the old version still be ordered?

Yes through September 6, 2023. Beginning September 7, 2023, the new codes must be ordered, and all quotations must be updated. This date is subject to change.

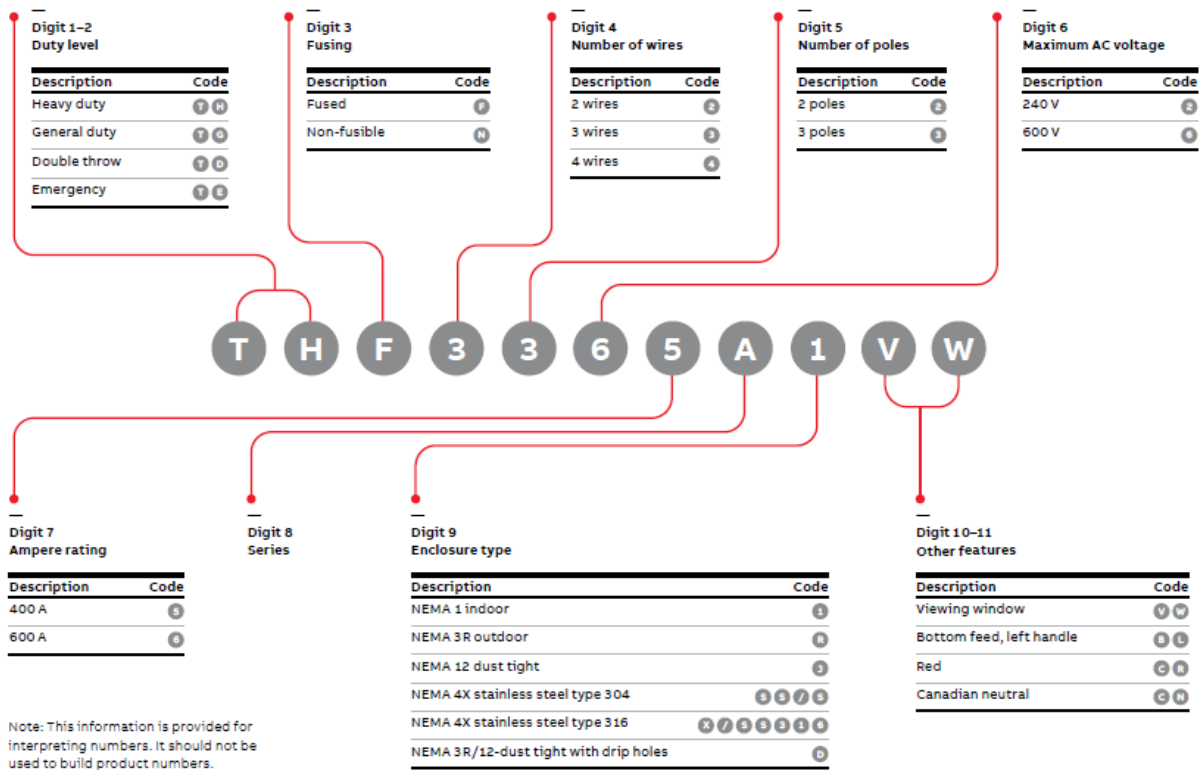

What about lead times?

Check Empower for lead times. They will improve as production is ramped up. We are expanding production with a new line in our Monterrey facility dedicated to this new design. This will enhance delivery performance for the 400/600A switches and help the primary factory in Saltillo.

Are the safety switches loaded in Empower?

No, the new ordering codes are not currently loaded in Empower. Please look for the Amped Up announcement for updates on product availability and additional information.
