COURSE DESCRIPTION

G185
ACS800-87LC Start-up, Maintenance and Service Hands-on

Course Type and Description
This is a classroom course with hands-on lab activities supported by an instructor. Theory should be studied beforehand in the e-learning course G185e.

The course contains theoretical presentations and hands-on exercises with ACS800-87 Liquid cooled Wind Turbine Converter unit.

Course Duration
The course duration is 2 days.

Student Profile
This course is intended for electricians, technicians, and engineers, who install, operate and service ACS800-87LC Wind Turbine Converters.

Course Goal
The goal of this course is to teach students to start-up, adjust, operate, maintain, troubleshoot and repair ACS800-87LC Wind Turbine Converters.

Course Objective
Upon completion of this course, students will be able to:

- Commission and tune ACS800-87LC Wind Turbine Converters
- Use the fault tracing methods
- Replace the faulty parts and units
- Operate and maintain ACS800-87LC Wind Turbine Converters

Main Topics
- Reading and interpreting circuit diagrams
- Installation procedure
- Ethernet adapter communication
- Locating and identifying terminals, boards and other components
- Converter commissioning
- Changing the setting
- Fault indications and maintenance
- DriveWindow commissioning and maintenance tool operations

Prerequisites
Prior to attending this course, students should have

- Basic knowledge of electronics
- Experience in using PCs in the Windows environment
- G185e web course recommended
