NOTES:

1. **WARNING:** This drawing does not illustrate the installation methods required for hazardous locations. Prior to any installation in a Classified Hazardous Location, verify installation methods by the Control Drawing referenced on the product's name tag and national and local codes.

2. To access the XMV termination board, remove the enclosure rear cover.

3. The RS-485 bus must be wired in a daisy-chain configuration. Star configurations are not allowed.

4. Maximum accumulated length for the RS-485 bus is 4000 feet.

5. To access the XMV termination board, remove the enclosure rear cover.

6. The RS-485 bus must be wired in a daisy-chain configuration. Star configurations are not allowed.

7. Maximum accumulated length for the RS-485 bus is 4000 feet.

6. **LED Indicators on TFIO:**
   - **Run LED** – Blinking indicates on-board PIC running.
   - **Activity LED** – Blinking indicates bus activity.
   - **Mode LED** – 00 = Normal 01 = Reset

7. **LED Operation:**
   - Register 0.7.7 = 0 – Power Save Mode (LEDs off when MMI disconnected)
   - Register 0.7.7 = 1 – LEDs on all the time.

8. Must have a Communications application instantiated for each COMM Module

**TIP:** While 0 is recommended for the first one, any address can be used (But keep in mind the original config files in our software are built with this address and factory tests will look for it).
