QuickTurn[®] basket tray

Cut time, not cornersSM

- 01 Tray
- 02 30° Fitting
- 03 45° Fitting
- 04 Elevation change
- 05 L fitting
- 06 T fitting
- 07 X fitting
- 08 4" Waterfall
- 09 Extension loop
- 10 Solid top and bottom covers
- 11 Hold-down bracket
- 12 Cable tray divider
- 13 Center support
- 14 Trapeze support
- 15 Under floor mount
- 16 Splice washer kit
- 17 Wall mount

For innovative products and support, turn to ABB. From the earliest days of electrification over 100 years ago, ABB has been a leader in providing products for commercial and industrial construction, industrial plant maintenance, repair and operation, electrical utility distribution and original equipment manufacturing. We offer one of the broadest product lines in the electrical industry, supplying over 70% of the items used in a typical electrical application.

More than 6,000 electrical, industrial, specialty, and retail distributors stock and sell ABB products in their communities.

Install turns faster. Turn jobs sooner.

QuickTurn prefab fittings save time and money.

Cutting fittings for your basket tray installation is labor-intensive and time-consuming. It can also undermine proper grounding. That's why, in addition to straights, ABB's QuickTurn system features a full array of factory-made fittings for turns, T's and elevation changes. QuickTurn eliminates on-site fabrication and grounding worries, allowing you to install fittings up to 80% faster. And that can make it easier for you to turn a profit.

Take installation in a whole new direction.

Fittings made simple.

QuickTurn factory-made straights and fittings make installation and cable running easier.

- One-tool installation—simplifies the entire process
- A fitting for every need—streamlines work flow and materials handling
- No cutting—eliminates waste
- Low-resistance corner plates—makes pulling cables fast

Safety built right in.

QuickTurn's integrated grounding loops ensure that proper grounding connections are made every time. No secondary cables, lugs or straps to fool with.

With QuickTurn's prefabricated fittings, safety-conscious contractors can eliminate the dangerous, often sharp wire ends that result from on-site fabrication, minimizing injury risk to workers.

Durability inside and out.

QuickTurn is assembled in America. Its high-strength basket design provides structural integrity. And its special post-fabrication powder coat protects all welds from the elements. That makes QuickTurn a great choice for demanding locations. It's available in five different colors too, to accommodate a wide range of color schemes and architectural applications. It can also be painted to match the surrounding surfaces.

Need zinc-free components for your high-tech application? We can handle that too. Just ask!

A turn for the better.

Where do you want to go? QuickTurn can take you there, providing a higher level of versatility and control. Choose from a wide variety of configurations, sizes, colors and accessories, all backed by the support and service of ABB. Whether you have a question about installation or simply need extra connecting hardware, we are ready to help.

Learn more.

Contact your ABB representative or visit ABB.com to learn more about the QuickTurn basket tray system. With QuickTurn, you'll cut time, not corners.
