Service note

ABB service suitcase for DC drives

Product specific drive service suitcases guarantee access to vital spare parts whenever and wherever they are needed.

Use of a service suitcase on-site may substantially shorten the lead time to troubleshoot a drive failure. It also reduces the time spent for locating the necessary parts and the service material carrying costs associated with traditional inventory maintenance.

—
01 The DC Drives service suitcase has been developed to guarantee on-site service personnel's access to critical spare parts.

Benefits

- Shortened response time to start the drive
- Guaranteed access to genuine, factory certified ABB parts
- Compact set of spare parts that is easy to use
- Robust construction to protect electronics during transportation
- Easy to transport, built as trolley version

Service provided

- Specific set of spare parts fitted into a compact suitcase
- ESD protection for parts
- Detailed content list for easy refill
