The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

### Product types concerned

<table>
<thead>
<tr>
<th>Product types</th>
<th>Current Frames</th>
</tr>
</thead>
<tbody>
<tr>
<td>DCS800 S01/S02</td>
<td>20...5200A, D1-D7</td>
</tr>
</tbody>
</table>

### Current life cycle status

Power Converter modules DCS800-S modules are in the Classic phase according to the ABB life cycle model outlined above.

### Life cycle plan

The plan for Classic phase is from 2022 until the end of 2026.

### Product availability in Classic phase

During the 1st year of classic phase (until end of 2022) new modules are available from series production to support our customers that need more time to transit to new DCS880 series. After 2023 new modules are available as spare parts for the following product types, until further notice:
