All messages and indications, including LEDs, latched outputs, registers, and recordings, can be reset, acknowledged or cleared with the “Clear” button. Pressing this button activates a menu for selecting the wanted clearance or reset function. Events and alarms assigned to alarm LEDs can also be cleared with it.

1. Press the Clear button on the local HMI to bring up the clear options.

2. Use the Up/Down Arrow buttons to select the desired group for clearing.
3. Press the Enter button, change the value with the Up/Down Arrow buttons and press the Enter button.
4. The item is now cleared.
5. Repeat the steps to clear other items.

Note: An additional method to clearing the Trip LED and the Alarm LEDs is to press and hold the Clear button for 5 seconds and release. This will have cleared the Trip LED, and the Normal LED should now be lit up. Press the Clear button again for 5 seconds to clear the Alarm LEDs.
